(*b*) the Commissioners may, by written notice, require that any . . . . privy or urinal be altered, paved, repaired, . . . ventilated, or kept in such a state of repair as to admit of its being sufficiently cleaned, or be supplied with water, or be connected with a drain, or be stopped up or demolished.

(*2*) Every such notice shall be addressed,—

(*i*) if the building or land to which the . . . . privy or urinal belongs, or for the use of the occupants of which the same was constructed or is continued, is situate in a bustee to the owner or occupant of such building, or, at the option of the Commissioners—to the owner of the land, and

(*ii*) in other cases—to the occupier of the building or land.

(*3*) The expense of executing any work in pursuance of any such notice shall be paid by the person to whom the notice was addressed.

CHAPTER XXX.

DEMOLITION OR ALTERATION . . . OF WORK.

Demolition or alteration of work.

450. In any of the following cases, namely:—

(7) if any privy be placed in contravention of rule 1 or sub-rule (*1*) of rule 2 of Schedule XVI, ...

the Commissioners may apply to a Magistrate, and such Magistrate may make an order directing that the . . . . . privy . . . . .

(*a*) be demolished by the owner, or altered by him to the satisfaction of the Commissioners, or

(*b*) be demolished or altered by the Commissioners at the expense of the owner:

Provided that the Magistrate shall not make any such order without giving the owner and occupier full opportunity of adducing evidence and of being heard in defence.

CHAPTER XLIII.

BY-LAWS and RULES.

Powers of Commissioners in meeting for making by-laws

559. The Commissioners in meeting may make by-laws—

(12) regulating, in any particular not specifically provided for in Chapter XXI . . . . . or Schedule XVI, the construction of . . . . . privies and urinals . . . . . and the maintenance, control and cleansing of . . . . . privies and urinals . . . . . .

Type-plans to be annexed to by-laws.

560. There shall be annexed to by-laws made under . . . . clause (*12*) . . . of section 559 type-plans of all constructions referred to in them, and the said plans shall be open to the inspection of any applicant at the Municipal Office at all reasonable times.

Power to make rules for the amendment of Schedule XVI.

567. (*1*) The Local Government may make rules to regulate any of the matters referred to in section . . . . 314 . . . ., and may, by such rules, alter, add to or cancel any of the rules contained in Schedule . . . . XVI . . . . .

(*3*) All references in this Act to Schedule XVI shall be construed as referring to such Schedule as for the time being amended in exercise of the powers conferred by sub-section (*1*). . . . .

SCHEDULE XVI.

RULES AS TO PRIVIES AND URINALS.

[*See sections 314, 315 . . . , 319, 320, 326, 327, 328, 450 (7), 559 (12), 567, 574 and 575.*]

1. (*1*) No privy shall be placed in the space required by this Act to be left at the back of a building—

Regulation of site of privies.

(*a*) unless the total height of the privy does not exceed eleven feet, and

(*b*) . . . . unless there is a space of at least four feet between the nearest wall and the service aperture of the privy.

* The preliminary portions of sections 574 and 575 have already been extended to the town of Howrah by Notification No. 1869M., dated the 17th July 1903, published in the *Calcutta Gazette* of the 22nd *idem*, Part IB, page 147.

(2) No . . . privy situated in, or adjacent to, a building shall be placed at a distance of less than—

(i) six feet from any other building which is a pub ic building, or

(ii) four feet from any other building which is, or is likely to be, used as a dwelling-place, or as a place in which any person is, or is intended to be, employed in any manufacture, trade or business.

Upper floor.

2. (1) No privy shall be constructed on the upper floor of a building, unless it be solely used by the females and children residing in the zenana quarters. Any privy built on an upper floor must be similar in all respects to privies on the ground floor, and must be provided with ample steps or stairs for service. Every privy on an upper floor shall have another privy underneath it.

Provision of access to privy from street.

3. (1) If there is no convenient access from a street to any . . . privy, ... the Commissioners may, if they think fit, by written notice, require the owner of the privy to form a passage giving access to the privy from the street.

(2) Every notice served under sub rule (1) must require that such passage be formed at ground level, be not less than four feet wide, and be provided with a suitable door, and must inform the said owner that the passage may, at his option, be either open to the sky or covered in.

Models and type-plans.

4. Models and type-plans of privies and urinals, approved by the Commissioners, with estimates of the cost of constructing privies and urinals in accordance therewith, shall be kept in the Municipal Office, and shall be open to inspection by any person at all reasonable times without charge; but no person shall be bound to construct any privy or urinal in accordance with any such model or type-plan if the same be constructed in accordance with the other rules contained in this Schedule.

Drain.

5. (1) A drain must be provided for every . . . privy and every urinal.

(2) Such drain must be constructed of some impervious material, and must connect the floor of the privy or urinal—

(a) with a drain communicating with a municipal drain . . . , or

(b) if permitted by the Commissioners, with an impervious cesspool, the contents of which can be removed . . . . . either by hand or by flow after filtration.

Floor.

6. (1) The floor of every privy . . . . and urinal—

(a) must, if the Commissioners in any case so direct, be made of one of the following materials to be selected by the owner of the privy or urinal, that is to say, glazed tiles, artificial stone or cement, or

(b) if no such direction is given, must be made of thoroughly well-burnt earthen tiles or bricks plastered with cement and not merely pointed with cement, and

(c) must be in every part at a height of not less than six inches above the level of the surface of the ground adjoining the privy or urinal.

(2) The floor of every . . . privy and every urinal must have a fall or inclination of at least half an inch to the foot towards the drain prescribed by rule 5.

Walls and roof.

7. The walls and the roof of every privy and urinal shall be made of such materials as may be approved by the Commissioners:

Provided that—

(a) in the case of . . . privies, the entire surface of the walls below the platform shall either be rendered in cement or be made as prescribed in clause (a) or clause (b) of rule 6. . .

Platform.

8. The platform of every . . . . privy or urinal must either be plastered with cement or be made of some water-tight non-absorbent material such as that prescribed in rule 6, sub-rule (1); and must have a fall or inclination of at least half an inch to the foot towards the aperture.

Ventilation of privies and urinals in, or adjacent to, buildings.

9. Every privy or urinal situated in, or adjacent to, a building must have an opening, of not less than three square feet in area, in one of the walls of the privy or urinal, as near the top of the wall as may be practicable, and communicating directly with the open air.

Regulation of construction of privies.

10. Every privy must be constructed in accordance with the following provisions—

(a) the space beneath the platform of the privy must be of such dimensions as to admit of one or two movable receptacles for sewage, of a capacity not exceeding one cubic foot, being placed and fitted beneath the platform in such manner and position as will effectually prevent the deposit, otherwise than in such receptacle, of any sewage falling or thrown through the aperture of the platform;

(b) the privy must be so constructed as to afford adequate access to the said space for the purposes of cleansing such space and of placing therein and removing therefrom proper receptacles for sewage;

(c) the said receptacles must be water-tight, and must be made of metal if their capacity exceeds half a cubic foot, or of well-tarred earthenware or glazed stoneware if their capacity does not exceed half a cubic foot;

(d) the door for the insertion and removal of the receptacles must be made so as to completely cover the aperture.

16. If any privy or urinal erected or re-erected after the date of this notification is so constructed as to contravene any of the provisions of this Schedule, the Commissioners may, by written notice, whether or not the offender be prosecuted under this Act before a Magistrate, require— Enforcement of the foregoing rules.

(*a*) the occupier of the building to which the privy or urinal belongs, or

(*b*) (if the privy or urinal does not belong to a building) the owner of the land on which the privy or urinal stands,

to make such alterations as may be specified in the notice with the object of bringing the privy or urinal into conformity with the said provisions.

ANNEXURE II.

Acts of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 27th July, 1907, at 12 noon.

Present:

The Hon'ble Sir Andrew Fraser, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble Mr. F. A. Slacke.
The Hon'ble Mr. W. C. Macpherson, C.S.I.
The Hon'ble Mr. P. O'Kinealy, Advocate-General of Bengal.
The Hon'ble Mr. E. W. Collin.
The Hon'ble Mr. E. A. Gait, C.I.E.
The Hon'ble Mr. H. J. McIntosh.
The Hon'ble Mr. H. C. Streatfeild.
The Hon'ble Mr. G. Gordon.
The Hon'ble Mr. C. G. H. Allen.
The Hon'ble Babu Bhupendra Nath Basu, M.A., B.L.
The Hon'ble Babu Radha Charan Pal.
The Hon'ble Babu Jogendra Chandra Ghose, M.A., B.L.
The Hon'ble Mr. G. H. Sutherland.

NEW MEMBERS.

The Hon'ble Mr. W. C. Macpherson, C.S.I., the Hon'ble Mr. H. C. Streatfeild, the Hon'ble Mr. C. G. H. Allen and the Hon'ble Mr. G. H. Sutherland took their seats in the Council.

QUESTIONS AND ANSWERS.

SOBHA BAZAR MURDER CASE.

The Hon'ble BABU RADHA CHARAN PAL asked:—

(*a*) Will the Government be pleased to state what steps have been taken by the Calcutta Police to find out and bring the real murderer of the unfortunate man, "Ganga Uriya," who was killed at Sobha Bazar on the 24th May, 1905, since Girish Goala, whom the Police charged of having murdered Ganga, was acquitted ?

(*b*) Has the Government received any report or explanation on the subject from the Commissioner of Police ?

(*c*) If so, will the Government be pleased to publish it for public information ?

(*d*) Is it a fact that the Government sanctioned the institution of the suits brought by certain Police Officers against three daily papers of Calcutta for defamation in connection with the Sobha Bazar murder case and that the Government also defrayed the cost of the suits ?

(*e*) Under what circumstances was the sanction accorded, and the cost allowed to be paid ?

(*f*) What is the total amount of cost paid by the Government ?

The Hon'ble MR. GAIT replied :—

"(*a*) A reward of Rs. 5,000 was offered and further enquiries were made for a period of two months by two specially selected Inspectors, but without any success.

(*b*) A report was received from the Commissioner of Police. It was examined by two of the Lieutenant-Governor's legal advisers, who went carefully over all the facts of the case; and both of them were of opinion that the police were not guilty of the charges made against them in the press.

(*c*) The Commissioner's report contains controversial matter, and it is not advisable to publish it. I quote, however, the following extract from Mr. Halliday's remarks :—

'I personally released the lad Sovendra Krishna Deb on Rs. 500 bail. I did this against the wishes of my officers who asked me to place him before the Magistrate in order to discount the accusations that have since been made or implied against the police, and which they, knowing the eagerness with which any story against the police is seized on by the public and press, clearly foresaw.

'I refused to listen to their application, although I clearly foresaw that the cry would be raised that the police had arrested a Raja's relation and released him on receipt of money; because I considered that we should not be swayed by any such considerations, and because, beyond the accusations of the man Girish, whose entire conduct utterly failed to inspire confidence, there was not an iota of evidence against Sovendra Krishna. I considered that I should be acting wrongly in subjecting a man to the pain and distress of being placed in the dock on a charge of murder when there was no reliable evidence against him, merely in order to stop people making insinuations.

'The opinion of the Standing Counsel is important in this respect as it clearly shows that the police had no inclination in the matter at all one way or the other.

'There was no question of sending up Girish Ahir in order to avoid sending up Sovendra Krishna. Superintendent Aldridge verbally asked Mr. Hume to put the question to the Standing Counsel as to whether they could not both be sent up. Mr. Hume's written note shows that he did so.'

(*d*) Yes.

(*e*) The report of the Commissioner of Police and the independent examination of the facts above referred to convinced the Lieutenant-Governor that the charges of conspiracy, corruption, suborning of witnesses, perjury, etc., made by certain newspapers against the investigating officers were entirely baseless. The Judge who tried the case had been careful not to condemn the police; but these papers definitely made distinct charges of acts amounting

to criminal offences against these officers. One of the leading barristers of the Calcutta Bar whom they consulted advised them that the charges constituted a serious libel. They accordingly asked Government for sanction to proceed against these papers for libel. This sanction was accorded.

Subsequently when the suit had commenced these officers represented that they were unable to bear the cost of the proceedings in Court. And as the charges made against them referred to acts done by them in the execution of their duty, the Government gave them the necessary assistance to vindicate their character in Court.

(*f*) The amount of costs has not yet been reported."

STRAND-BANK ROAD AND PRASANNA COOMAR TAGORE GHAT.

The Hon'ble BABU RADHA CHARAN PAL asked:—

(*a*) Is the Government aware of the deplorable condition of the Strand-bank Road, to the north of the bridge under the Port Commissioners, which are full of ruts, holes and depressions and filled with mud, slush and other noxious matter, specially in the rainy season?

(*b*) Will the Government be pleased to move the Port Commissioners to thoroughly repair the roads, which are at present dangerous both to passenger and wheel traffic?

(*c*) Will the Government be pleased to ask the Port Commissioners to remove the silt-deposits which have accumulated and buried the steps of the Prasanna Coomar Tagore Ghât and other bathing ghâts on the Calcutta side of the river, where thousands of people, including women, bathe, and many of whom have met with accidents by stumbling over the pit-falls, hollows and heaps on the silted-up river-bank?

The Hon'ble MR. SLACKE, replied:—

"(*a*) and (*b*) The condition of the Strand-bank Road to the North of the Bridge, under the Port Commissioners, is not nearly so deplorable as depicted by the Hon'ble Member.

"The road from the floating bridge to Chitpore, with the exception of three or four very small patches, is in excellent repair. Near Nandibari Ghât the river has undermined the road retaining wall, but this is being repaired at a cost of Rs. 49,500 and in spite of this a good road is maintained with ample protection for passenger and vehicular traffic.

"(*c*) Prasanna Coomar Tagore's Ghât consists of a flight of steps approaching the bed of the river which is dry at low water. The slope is very easy and even, and there is no danger or risk to women bathing at this place. At other places on the river bank the silt has accumulated until it is nearly up to the road-level, but it is practically impossible to deal with the difficulty until the Port Commissioners' scheme for reclaiming a large area of this shoal-water is carried out.

"The Hon'ble Member is doubtless aware of all the facts of the case, as he himself was a Port Commissioner from October 1904 to October 1906."

CASE OF SACHINDRA KUMAR BOSE.

The Hon'ble BABU RADHA CHARAN PAL, said:—

(*a*) In reply to my question of the 2nd February last requesting the Government to kindly publish the Police inquiry regarding the tragic and suspicious death of a young Hindu of a respectable family, named Sachindra Kumar Bose, the Hon'ble Mr. Carlyle, Chief Secretary, was pleased to state that it was still under investigation, and that it would not serve any useful purpose to publish an incomplete Police inquiry. Will the Government be pleased to state whether the inquiry is now complete, and whether the Government is in a position now to publish it?

(*b*) Is it a fact that Babu Baroda Prosad Bose, the eldest brother of the deceased, applied to the Deputy Inspector-General of the Criminal Investigation Department for inquiry into the case by an expert detective, offering at the same time to pay Rs. 500 to the person or persons who shall be able to trace the cause of the death of the young man and to detect the murderer, if any, in the case ?

(*c*) If so, whether any expert detective was engaged, and whether any reward was notified.

The Hon'ble MR. GAIT replied :—

"(*a*) I have handed to the Hon'ble Member a statement showing the result of the inquiry.

(*b*) and (*c*) The reward was offered, not to the public but to the 'investigating officer who solved the mystery.' The offer was, therefore, not published in the Gazette. The case was inquired into personally by Mr. Cornish and by a specially selected officer of the Government Railway Police, who has since been taken into the Criminal Investigation Department. It also received the personal attention of Mr. Hyde, Mr. Duff, and the Deputy Inspector-General for Crime and Railways.

Statement referred to in the above answer.

Since Mr. Carlyle's answer was given, the four persons who travelled in the same compartment with the late Sachindra Kumar Bose on the night of his death have been traced and questioned. The result leaves very little doubt as to the fact that his death was accidental. It appears from their statements that the door of the bath-room got jammed and that a *mistri* was called in at Khurda Road station between 9 and 10 P.M. to plane it. This statement has been verified by questioning the *mistri* and by an examination of the door. The deceased was still reading when the other occupants of the compartment went to sleep. One of them woke up about 1 A.M. and endeavoured to enter the bath-room. Being unable to open the door he concluded that the deceased was there and used the bath-room of the adjoining compartment, the door between the two compartments being open. In the morning, the other occupants of the compartment, finding the door still jammed, used force and succeeded in opening it. The bath-room was empty. They did not think of informing the police of the disappearance of the deceased, because they assumed that he must have been left behind at some intermediate station. From the place where his body was found, it is clear that he must have fallen from the train shortly before midnight; and, having regard to the facts regarding the bath-room door, it is reasonable to infer that he visited the bath-room before settling down for the night, that the door again got jammed, and that, being unable to make himself heard or get out of the bath-room by the door, he attempted to do so by getting out through the window and, in so doing, fell from the train. Both the compartment in which the deceased was travelling and the adjoining compartment were full of people; and it is difficult to believe that there can have been any foul play. The other travellers were all respectable persons, and they were entire strangers to the deceased. None of his property was missing, except his walking-stick and a newspaper. There is absolutely no reason why his fellow-passengers should have done him any harm, and no one from outside could have entered the carriage and thrown him out without their knowledge.

CHIEF PRESIDENCY MAGISTRATE, CALCUTTA.

The Hon'ble BABU BHUPENDRA NATH BASU asked :—

(*a*) Will the Government be pleased to state how it proposes to fill up the vacancy arising by reason of the medical leave granted to Mr. Kingsford, the present Chief Magistrate of the Calcutta Police Court ?

(*b*) Is it the intention of the Government to give the appointment to a member of the Civil Service?

(*c*) Has not the present 2nd Presidency Magistrate officiated for the Chief Magistrate on a previous occasion?

(*d*) Does the Government consider it would be conducive to the interests of the administration if an outsider is brought in superseding the claims of the holders of the appointments next in order to that of the Chief Presidency Magistrate?

The HON'BLE MR. GAIT replied :—

"It is not at all certain that Mr. Kingsford will have to take leave. It is hoped that it will not be necessary for him to do so."

ADMINISTRATION AND RE-CONSTITUTION OF THE SONTHAL PARGANAS.

The Hon'ble BABU BHUPENDRA NATH BASU, in the absence of the Hon'ble Babu Jogendra Nath Mukharji, asked:—

(*a*) Will the Government be pleased to state whether the questions raised in course of the last Budget debate regarding the administration and re-constitution of the Sonthal Parganas have been considered by it? If so, at what stage of consideration they are at present?

(*b*) Will the Government be pleased to state when it will be in a position either to pronounce its decision or to submit its proposals regarding the Sonthal Parganas to the Government of India?

The Hon'ble MR. STREATFEILD replied:—

"The report of the Commissioner of the Bhagalpur Division on the subject of the administration of the Sonthal Parganas has not yet reached Government. The question is one of some complexity owing to the diversity of classes and races whose interests have to be considered, and Government is not at present in a position to make any definite pronouncement as to when a final decision is likely to be arrived at. It is proposed to hold a conference to discuss this matter during the coming cold season after the Commissioner's report is received."

THE CALCUTTA PORT (AMENDMENT) BILL, 1907.

The Hon'ble Mr. Slacke moved for leave to introduce a Bill to amend the Calcutta Port Act, 1890.

He said:—"I think it is needless for me to enter into any detailed account which led to this Bill being drafted, since the reasons are very clearly shown in the Statement of Objects and Reasons."

The motion was put and agreed to.

The Hon'ble Mr. Slacke introduced the Bill and moved that it be read in Council.

The motion was put and agreed to, and Secretary accordingly read the title of the Bill.

The Hon'ble Mr. Slacke also moved that the Bill be taken into consideration by the Council at the next meeting.

He said:—"Hon'ble Members will observe that one of the objects of the Bill is to give the Port Commissioners power to issue debentures in such form as may be most convenient to the public. The amendment which has just been printed has received the sanction of the Government of India, and will be circulated amongst Hon'ble Members before the next meeting of Council for their consideration. With these remarks I would ask that the Bill be taken into consideration at the next meeting of Council.

The motion was put and agreed to.

THE CALCUTTA AND SUBURBAN POLICE (AMENDMENT) BILL, 1907.

The Hon'ble Mr. Gait moved for leave to introduce a Bill to amend the Calcutta Police Act, 1866, and the Calcutta Suburban Police Act, 1866. He said:—

"Sir, I have to move for leave to introduce a Bill to amend the Calcutta Police Act, IV of 1866, and the Calcutta Suburban Police Act, II of 1866. The object of the Bill is to enable the Commissioner of Police, Calcutta, to order the discontinuance of the use of houses as brothels, or for the purposes of prostitution, or as places of assignation, in the town of Calcutta.

"The evils attendant on the existence of houses of ill-fame in close proximity to colleges, schools and hostels have long been recognized; and two years ago, a Bill was introduced into this Council, which afterwards became the Bengal Disorderly Houses Act, 1906, with the object of enabling the District Magistrate to take action to close such houses in Mufassal Municipalities and in any other areas outside Calcutta to which the Act might be extended. The circumstances of Calcutta are peculiar, and it was impossible to provide for that city in the general Act for Bengal. As soon as the latter had been passed, the question of legislating for Calcutta was taken up, and the Bill which I now ask leave to introduce is the result. It has been drafted on the lines recommended by an influential committee, presided over by Mr. Justice Geidt, which was appointed last year by His Honour the Lieutenant-Governor to consider the whole question. Its provisions are much the same as those of the Act now in force in the rest of the Province. Special provision has been made, however, for the so-called 'empty houses' which are used as places of assignation.

"The Bill takes the form of an amendment of the Calcutta and Calcutta Suburban Police Acts, 1866, and the opportunity has been taken to make certain other minor amendments in those Acts which experience has shown to be necessary.

"The proposed amendments are explained in detail in the Statement of Objects and Reasons, which accompanies the Bill."

The Hon'ble BABU RADHA CHURN PAL said:—

"Your Honour—I welcome the introduction of this Bill, as it gives power to the Police to deal with houses of ill-fame and disorderly houses in the vicinity of any educational institution, or of any boarding-house, hostel or mess used or occupied by students, or any place of public worship or recreation. In this respect it gives a wider scope to the powers of the Police in closing such houses. Further, the Bill gives power to the Police to close any house, room or place in the town which is used for immoral purposes. I find this amendment of section 43 of Bengal Act IV of 1866 applies to the Calcutta Police only, and does not apply to the Suburban Police, which is also under the Commissioner of Police. The new provision should apply equally to Calcutta and its suburbs, for as Your Honour is well aware that the suburbs is expanding and peopled by large and increasing population of *bhadra-loka* class. I am sure this is an oversight, and I hope in the Select Committee section 17 of the Calcutta Suburban Police Act of 1866, which corresponds with section 43 of the Calcutta Police Act, will also be amended.

"The Bill, however, makes a fundamental change in the procedure to be adopted by the Police in closing such houses. Under the present Act, the Commissioner of Police is bound to issue a summons to the owner or occupier of a house to appear before him to answer to the charge of allowing a house to be used for immoral or disorderly purposes. He is obliged to hold a regular judicial inquiry in which the accused may be defended by a counsel or a pleader and the witnesses may be examined and cross-examined. A regular trial is held, and all the facts are elucidated, and the Commissioner is enabled to come to a right finding. This wholesome procedure, I find, is contemplated to be abolished. The Police Commissioner will be vested with summary power, and the judicial inquiry will be substituted by departmental inquiry based chiefly on the information and report of subordinate Police-officers, without

allowing the accused the right of legal defence or the right of appeal, which it is the proud privilege of the meanest subject of the British Crown, even if he is a murderer caught red-handed in the streets of Calcutta.

"Your Honour will be pleased to observe that 'summons to the owner or occupier of a house' in the original Act is proposed to be substituted by a simple 'notice.' I am afraid this may be productive of difficulties to innocent and ignorant owners and occupiers. There is no provision to prove the due service of notice, and there is nothing to prevent the *ex-parte* decision of the Commissioner of Police in the absence of the accused. The service of the summons must be proved, and if the person summoned does not attend, the Commissioner may issue a warrant for the attendance of the accused. At any rate, the accused, owner or occupier of a house, under the present Act, must know the action taken against him, whereas under the proposed law it may be so manipulated by inimically-disposed persons that the service of notice may not be made on the right party and the case disposed of behind his back.

"It is worthy of note that in the proposed Bill in section 43D, while the Commissioner's decision directing the discontinuance of music in certain cases is appealable by an aggrieved person to a Magistrate, his order as regards alleged places of ill-fame and disorderly houses, based not on judicial inquiry as at present but on mere executive inquiry in which the subordinate Police will largely share, shall not be questioned in any Court of Law. It is provided in the proposed section 43B that the failure to comply with the order of the Commissioner will render the owner or occupier of a house to penalty of a daily fine or imprisonment unless he is able to prove before the Magistrate that the order should have been passed against some other person than himself. I submit to Your Honour that the accused should not be fettered in his defence. He should not be deprived of his right to question whether the Commissioner's decision is correct or not, more especially as it will be based on summary inquiry. It is obviously hard and unfair that he is not only required to prove his innocence but also to prove that some one else is guilty, and that the order should be passed against that person. It may be that in a certain case the information given by the thana people is entirely wrong or is the outcome of some malicious and designing person who wants to molest the owner or occupier of a house. Such an unfortunate man or woman will be exposed to all sorts of harassment and oppression in the hands of the Police, and to take away the right of judicial investigation of the case is to make over a British subject to the tender mercy of the Police, bound hand and foot.

"Your Honour, by all means let the houses of ill-fame be closed, which is the noble object of the Bill and with which we all sympathize, but I cannot endorse the extinction of the right of an aggrieved person to question the legality and propriety of an executive order in a Court of Law and thus open a wide door of oppression and malpractice to the Police which occupies a not enviable position in this city. We are proud to live under the aegis of British rule. We are grateful for the blessings of peace and security and I fervently hope that no Act of the Legislature will be so framed that it will take away that security and make the people's existence dependent upon the good grace of the Police.

"Before I sit down I desire to draw Your Honour's attention to section 43C of the Act which gives power to the owner or lessor to determine the lease or tenancy of any house in respect to which an order of closure has been passed. I submit a similar power ought to be given to the lessee, tenant or occupier to terminate the lease notwithstanding anything contained in any other law for the time being in force.

The Hon'ble BABU BHUPENDRA NATH BASU said:—"I must congratulate Your Honour's Government on the introduction of this measure in Council, and on behalf of that large interest which I have the honour to represent in Your Honour's Council—the education of the Province of Bengal. I have to offer our humble thanks to Your Honour personally for the interest which

Your Honour has taken in the introduction of this measure in this Council. And, Sir, it may not be perhaps out of place for me to mention to my colleagues that not long ago I had taken the liberty to invite Your Honour to pass through one of the most crowded and busy thoroughfares of this city to inspect for yourself the social conditions which prevailed in that locality to the very serious detriment of the morals of our young men in particular and of the public in general. Your Honour was good enough on the occasion when Your Honour attended the prize distribution of the Oriental Seminary, which has the misfortune of being situated in Chitpur Road, to take early steps for the mitigation of the nuisance with which the people of Calcutta were threatened, and I am glad that during Your Honour's tenure of office this Bill has been introduced.

"For a long time past the people of Calcutta, as well as of the mufassal, have submitted representations to Government, both in public meetings as well as by memorials, that some summary power should be vested in the executive authorities to deal with this class of nuisance. In this City of Calcutta itself this nuisance has been recognised for a long time past as a grave and a serious danger. I remember many years ago a young man committed a murder in a house of ill fame in College Street. The people of Calcutta represented the matter to the then Commissioner of Police, Sir John Lambert, who took prompt steps to remove the nuisance from the vicinity of the colleges and schools situated in College Square. With the usual vigor that characterised Sir John Lambert, he took the measure in hand and promptly removed those houses from the neighbourhood of the Presidency College with the result that ever since this sad tragedy, which took place about twenty years ago, a similar case has not occurred; but I have been told by friends and guardians of boys in the mufassal that they find it very difficult to send their young boys to Calcutta to attend schools, where they find the thoroughfares leading to the schools and colleges so beset with temptations, a grievance with which Your Honour has sympathised by inaugurating the scheme of establishing a College at Ranchi.

"This measure, if passed into law, will place in the hands of the Police an effective weapon in dealing with this class of nuisances, and I hope at no distant time it will free those streets of Calcutta from one of the greatest blots. It is intolerable that our schools, colleges and hostels, which, under the new system of University education, must be a feature of education, should be surrounded as they are at present by these houses of ill-fame, and that our young men should be exposed to all the temptations of such life away from parental control. Therefore, on behalf of the interests which I have the honour to represent in this Council, as well as on behalf of the public, I welcome the introduction of this measure. I do not think it will be presumptuous on my part to congratulate myself that I have been to some extent, though in a very humble degree, instrumental in bringing about this measure.

"I can quite appreciate the objections which my friend the Hon'ble Babu Radha Churn Pal has raised, namely, that the powers given may at times be a dangerous weapon in the hands of the Police, that it may be an instrument of oppression upon the innocent and the ignorant. I find that my name is proposed as a member of the Select Committee which is to sit to consider the provisions of this Bill. I will therefore not commit myself to any opinion upon the matters which have been raised by my friend, but associated as I have been with three or four Commissioners of Police of Calcutta in succession, I am able to bear testimony that, so far as these gentlemen are concerned, they may be safely trusted to exercise the powers to be conferred on them by this Bill with discretion, moderation and judgment. If the Commissioner of Police cannot remove a house of ill-fame from a prominent place in Calcutta unless the whole thing has to be threshed out in a Court of Law, it will, I am afraid, be a dead-letter to introduce legislation like this into our Statute Book, and I know, Sir, from experience in the past, that Commissioners of Police in succession, on many occasions, who have been approached by respectable residents of a locality have experienced great difficulty in dealing with the question, inasmuch as they would have had to hold a judicial inquiry, in the nature of a trial, and go through

all the processes which such an inquiry involves, and at the end probably lead to nothing, but at the same time I fully sympathise with the apprehensions which my friend entertains, and I am sure they will be given proper consideration in the Select Committee and, if possible, safeguards will be introduced to protect the innocent from oppression, and at the same time enable those who are victims of a nuisance like this to protect their children from contamination.

"There is one other provision in this Bill to which some exception has been taken in some quarters, namely, the power of the Commissioner to prevent noises of music in certain places and on certain occasions; the late instance in which magisterial slumbers were disturbed by holy music in a way in which, as the Magistrate expressed it, made 'night hideous', has not unjustly raised an apprehension in some quarters that this law might be utilized for purposes like these, and that the performance of religious exercises or devotions might be interfered with. The Bill, however, makes clear provision that no religious music is to be interfered with, and to those Members of this Council who are residents of Calcutta, I may safely say that there are occasions when, during day or night, whether at home or in public streets, it may safely be put an end to.

"I do think that the provisions of this Bill are wholesome, and I am sure the objections which my hon'ble friend has promulgated will be fully considered in the Select Committee, so that the Bill may be ultimately so framed as to be free from all objections."

The Hon'ble BABU JOGENDRA CHANDRA GHOSE, said:—"I also beg to offer my congratulations to Your Honour on the introduction of this Bill as to which much need not be said at this stage, but certain objections have been raised to certain sections of the Bill to which a few observations should be made at this stage. The Hon'ble Babu Radha Churn Pal has objected to section 43 B on the ground that the decision of a Magistrate on the question, whether an order of the Commissioner of Police should have been passed against some person other than the accused, is final. This section is what is called a penalty section, and if an order is disobeyed, there must be the ordinary penal provision. I fail to see, therefore, the force of the objection raised as against section 43B. Then, again, objection is raised to section 43, sub-section (4), which provides that—

'The decision of the Commissioner of Police that a house, room or place is used in any manner, or for any purpose, described in clauses (*a*), (*b*), (*c*) or (*d*) of sub-section (*1*), shall be final, and the legality or propriety thereof shall not be questioned in any trial or judicial proceeding in any Court.'

"Some power should be given to the Commissioner to make a speedy inquiry, and the clause has been introduced to avoid the delay which, under the present state of the law takes place. I cannot say, without further consideration, whether the wording of the section is as it should be, but that there should be a speedy procedure admits of no question. I cannot see the justice of the observations that any such beneficient measures tend to endanger British justice. I do not see why reference should be made to this on every occasion. Then section 43D is a section which requires some consideration. The objections, raised in the Press to which my friend the Hon'ble Babu Bhupendra Nath Basu has referred as to disturbance of magisterial slumbers, this part of the Bill may require to be slightly amended. With these observations I beg to support the Bill on principle."

The motion was put and agreed to.

The Hon'ble Mr. Gait introduced the Bill and moved that it be read in Council.

The motion was put and agreed to, and Secretary accordingly read the title of the Bill.

The Hon'ble MR. GAIT said :—

"Sir, I have just moved for leave to introduce a Bill to amend the Calcutta Police Act, IV of 1866, and the Calcutta Suburban Police Act, II of 1866, giving the Commissioner of Police, Calcutta, power to order the discontinuance of the use of certain houses of ill-fame in the town and suburbs of Calcutta, and the same having been introduced and read in Council, I have to move that it be referred to a Select Committee consisting of the Hon'ble Mr. Collin, the Hon'ble Mr. Allen, the Hon'ble Babu Bhupendra Nath Basu, the Hon'ble Babu Radha Churn Pal, the Hon'ble Babu Jogendra Chandra Ghose and the Mover.

The motion was put and agreed to.

The Council was then adjourned to Saturday, the 7th September, 1907.

AUSTRALIA—Torres strait.

Decapolis reef—Head of beacon restored.

No. 351 (first publication).—With reference to Notice to Mariners No. 268, dated the 3rd June 1907, issued by this office, the Port Master, Brisbane, has given further notice (No. 7 of 1907) that the head of the Decapolis Reef Beacon, which was reported to be off, has now been restored.

EASTERN ARCHIPELAGO—Celebes island, east coast.

Tomori gulf and approaches—Existence and non-existence of certain shoals.

No. 352 (first publication).—The British Admiralty has given notice (No. 844 of 1907) of the existence and non-existence of the undermentioned shoals in the gulf of Tomori and its approaches:—

(*a*) Telegraph reef. This reef, originally reported in 1863, was unsuccessfully searched for in 1905, and has now again been looked for without any indication of its existence being discovered. As this danger is unknown to the natives in the vicinity it has been erased from the chart.

Approximate position, lat. 2° 10′ S., long. 121° 47′ E.

Whilst searching for this danger a shoal was found to exist in a position situated at a distance of 7 miles N. 68° E. from tanjong Bohunbelo, in approximately lat. 2° 6′ S., long. 121° 45′ E., on chart No. 361*b*.

(*b*) Tomori gulf. A reef about 1½ cables long in a north-west and south-east direction, and half a cable broad, with a least depth of 3 feet on it, exists in a position situated at a distance of 2 miles S. 2° E. from Batu island in the entrance to Tomori gulf.

Approximate position, lat. 1° 59½′ S., long. 121° 30½′ E.

At a distance of about 1 cable S. 68° W. from this reef, another reef exists with less than 3 fathoms over it.

(*c*) Tanjong Rata. Four reefs, with a depth of about one fathom over them, extend for a distance of about one mile from tanjong Rata; the westernmost reef being situated in approximately lat. 1° 35′ S, long. 122° 6½′ E., and the easternmost in lat. 1° 35′ S., long. 122° 8′ E. Between tanjong Rata and Teon depths of 10 to 12 fathoms were obtained, where the chart shows $\frac{1}{12}$ fathoms in lat. 1° 36′ S., long. 122° 6′ E.

(*d*) Peling strait. In the approximate position, lat. 1° 36′ S., long. 122° 20′ E., shown on the chart as dangerous, no bottom could be obtained with 100 fathoms of line.

The significations of dangers have consequently been erased from the Admiralty publications.

(*Variation 2° Easterly in 1907.*)

This Notice affects the following Admiralty Charts:—Australia, northern portion No. 2759a; China Sea, No. 1263; Eastern Archipelago, No. 942a; Tomori gulf to Salayar strait, No. 3616; Tomori gulf on chart No. 2195: also Eastern Archipelago, Part II, 1904, pages 369, 370.

EASTERN ARCHIPELAGO—Savu and Rotti islands.

Seba and Baah roads—Alteration in lights.

No. 353 (first publication).—With reference to Notice to Mariners No. 210, dated 13th May 1907, issued by this office, the British Admiralty has given further notice (No. 816 of 1907) that the character of the lights at Seba and Baah have been altered from white fixed to *white group occulting*, showing groups of three eclipses *every thirty seconds*, thus:—light, *fifteen seconds;* eclipse, *three seconds;* light, *three seconds;* eclipse, *three seconds;* light, *three seconds;* eclipse, *three seconds.* The lights are of the 4th order.

Approximate position, Seba light, lat. 10° 30′ S., long. 121° 50′ E.

Approximate position, Baah light, lat. 10° 43′ S., long. 123° 3′ E.

This Notice affects the following Admiralty Charts:—Australia, northern portion No 2759a; western approaches to Torres strait, No. 475; Eastern Archipelago, No. 942a; plans of Seba and Baah roads on chart No. 2468: also List of Lights, Part VI, 1907, Nos. 513, 514; Eastern Archipelago, Part II, 1904, pages 233, 241.

EASTERN ARCHIPELAGO—Timar, west coast—Koepang bay.

Fort Concordia light—Character altered.

No. 354 (first publication).—With reference to Notice to Mariners No. 386, dated 12th October 1907, issued by this office, the British Admiralty has given further notice (No. 847 of 1907) that the character of Fort Concordia light, Koepang bay, has been altered from white fixed to a *white flashing* light *every three seconds*, thus:—light, *one second;* eclipse, *two seconds*, visible in clear weather from a distance of 12 miles.

Approximate position, lat. 10° 10′ S., long. 123° 34½′ E.

This Notice affects the following Admiralty Charts:—Australia, northern portion; No. 2759a; Australia, N.-W. Coast, No. 475; Eastern Archipelago, No. 942a; Koepang bay with plan of Koepang road, No. 3296: also List of Lights, Part VI, 1907, No. 515; Eastern Archipelago, Part II, 1904, page 244.

CHINA SEA—Cochin China.

Kam Ranh bay—Lights established.

No. 355 (first publication).—The British Admiralty has given Notice (No 886 of 1907) that the undermentioned lights have been established in Kam Ranh bay as follows:—

(*a*) A *white fixed* light, elevated 192 feet above high water, and visible in clear weather from a distance of 12 miles from the bearing of N. 36° E., through north and west, to S. 54° E., has been established in a white masonry tower, 19 feet high, erected on the north-eastern extremity of Hon Chut, the light power being 430 candles. The light has a power of 590 candles between the bearings of S. 36° W., through west, to N. 54° W.

Approximate position, N.E. point of Hon Chut on chart No. 3028, lat. 11° 47½′ N., long. 109° 12½′ E.

(*b*) A *white fixed* light, elevated 251 feet above high water, and visible in clear weather from a distance of 8 miles from the bearing of N. 39° W., through north and east, to S. 54° E., has been established in a white masonry structure, 4 feet high, erected on the north-eastern point of entrance into the harbour situated at a distance of $2\frac{4}{10}$ miles N. 28° W. from the Observation spot. Its power is 80 candles.

(*Variation 2° Easterly in 1907.*)

This Notice affects the following Admiralty Charts;—China sea, Nos. 2660a, 2661a; Fan rang bay to Tong king gulf, No. 1542; Saigon river to Kam Ranh bay, No. 1261: Kam Ranh bay to Vung Ro bay, No 1008; Kam Ranh bay, No 3028: also List of Lights, Part VI, 1907, page 133; and China Sea Directory, vol. No. 337 (second publication).—With reference to Notice to Mariners No. 264, dated 31st May 1907, issued by this office, the British Admiralty has given further notice (No. 820 of 1907) that a *white flashing* light *every five seconds*, elevated 328 feet above high water, which was exhibited experimentally from a white cylindrical tower of masonry, 23 feet high, erected on Itaperina or Ytapere point, in the approach to Fort Dauphin, has now been permanently established. The flashes of this light are of very short duration.

Approximate position, lat. 24° 58½′ S., long. 47° 7′ E.

This Notice affects the following Admiralty Charts:—Delagoa bay to cape Guardafui No. 597; cape St. Mary to Bevato island, No. 760: also, List of Lights, Part VI, 1907, page 21; and Islands of the Southern Indian Ocean, 1904, page 126.

EASTERN ARCHIPELAGO—BORNEO—SOUTH COAST.

Malatayor point shoal—Extending Southward.

No. 338 (second publication).—With reference to Notice to Mariners No. 63, dated 8th February 1907, issued by this office, the British Admiralty has given further notice (No. 828 of 1907), that shoal water extends a long distance south of the 2¼ fathoms patch, situated about 27 miles to the southward of Malatayor or Melataor point, depths of 4½ fathoms having been obtained 40 miles off Malatayor in lat. 4° 6′ S.

A sounding of 4½ fathoms has therefore been placed on the chart in approximately lat. 4° 6′ S., long. 113° 38′ E, and the 5-fathom contour line extended to that position.

This Notice affects the following Admiralty Charts:—Australia No. 2759a; China Sea, No. 1263; Eastern archipelago, No. 941b: Also, Eastern Archipelago, vol. II., 1904, page 263; and Supplement, 1906, page 14.

SOUTH AFRICA—CAPE COLONY.

Port Alfred—Obstructions in Eastern approach.

No. 339 (second publication).—The British Admiralty has given notice (No. 829 of 1907), that the S.S. *Kilbrennan* struck some obstruction off Riet point, in the eastern approach to port Alfred, on 28th March 1907, and foundered in a depth of 10½ fathoms at an estimated distance of 2½ miles from Riet point. The distance off when she struck was estimated at from 3 to 3½ miles. It is to be observed that no bearings are recorded, although there were both lighthouses and beacons in sight, and that the position of the obstruction is very doubtful. Moreover, as other vessels have foundered near Riet point, the *Kilbrennan* may

have struck wreckage. Under any circumstances, the *Kilbrennan* herself is now a danger, and Mariners are warned to give the land a berth of nearly 4 miles in passing Riet point.

Approximate position, Reit point, lat. 33° 34′ S., long. 27° 0½′ E.

This Notice affects the following admiralty Chart:—Cape St. Francis to Waterloo bay, No. 2685: Also, Africa Pilot, part III, 1905, page 144.

No. 340 (second publication).—With reference to Notice to Mariners No. 296, dated 22nd June 1907, issued by this office, the British Admiralty has given further notice (No. 835 of 1907) that a *red fixed* lantern light, elevated 130 feet above high water, and visible in clear weather from a distance of 7 miles from the bearing of N. 18° W., through north and east, to S. 85° W., has been established on a white pole, 12 feet high, erected on the north-western extremity of Kanimo island, east coast of Luzon.

Approximate position on chart No. 2577, lat. 14° 6′ N., long. 123° 1′ E.

(*Variation Nil in 1907.*)

This Notice affects the following Admiralty Charts:—The Philippine islands, No. 943; St. Bernardino to Mindoro strait, No. 2577: Also, List of Lights, Part VI., 1907, page 127; and Eastern Archipelago, Part I., 1902, page 375.

PACIFIC OCEAN.—THE PHILIPPINE ISLANDS—SEBU.

Port Sebu—amended depth over shoal—Non-existence of shoal.

No. 341 (second publication).—With reference to Notice to Mariners No 125, dated 9th April 1904, the British Admiralty has given further notice (No. 836 of 1907) that the depth over the shoal situated at a distance of $2\frac{1}{10}$ cables S. 73° E. from Fort San Pedro lighthouse, port Sebu, is 3¾ fathoms, and not 2¾ fathoms as previously stated in the above Notice. A conical buoy, painted in black and red horizontal bands, has been placed to mark the position.

Approximate position, lat. 10° 17½′ N., long. 123° 54½′ E.

Also, that the shoal of 4¼ fathoms shown on the chart at a distance of 2¼ miles S. 30° W. from Fort San Pedro lighthouse does not exist, there being a depth of 5¼ fathoms over the position.

(*Variation 1° Easterly in 1907.*)

This Notice affects the following Admiralty Chart:—Port Sebu, No. 3193: Also Eastern Archipelago, part I. 1902, page 283; and Supplement, 1906, page 22.

Mariners are hereby warned.

BAY OF BENGAL—Burma coast.

Caution.—Bassein river—Orestes buoy adrift.

No. 346 (second publication).—A telegraphic communication has been received from the Principal Port Officer, Burma, stating that the Orestes buoy at the entrance to the Bassein river has gone adrift and cannot be relaid before the monsoon is over.

Mariners are hereby warned.

AUSTRALIA—Flat-top Island.

Mackay anchorage.

No. 326 (third publication).—The Portmaster, Brisbane, has given notice (No. 6 of 1907) that to enable Masters of vessels to anchor to the westward of Flat-top Island in a secure position, with not less than 18 feet L. W. S., two lanterns showing white lights will be erected in the following positions:—One in line with the Light-house bearing S. 54° E, corr. mag., and one in line with the low light at the S. W. end of Flat-top bearing S. 26° E. corr. mag., at the intersection of which two leads a vessel may anchor. These lights will be exhibited on and after 15th June.

Whilst a fixed position is thus laid down where a vessel may swing with not less than 18 feet at L.W.S., Masters of vessels may proceed inside this intersection, according to the state of the tide and the duration of their detention at the anchorage.

Chart affected, No. 347; Australia Directory, vol. 2.

3. A statement showing the receipts and expenditure of the Fire-Brigade Fund is annexed to this report. The year opened with a balance of Rs. 17,404-4-9, the receipts amounted to Rs. 1,00,629-2-2, and the total expenditure to Rs. 97,561-13-2, leaving a balance of Rs. 20,471-9-9 at the close of the year.

Receipts.—Fees under the Petroleum Act and sale-proceeds of unserviceable stores exceeded the forecast by Rs. 73-8 and Rs. 511-14 9, respectivoly; hire of engines and sale-proceeds of horses realized Rs. 245-3-5 and Rs. 180, respectively; no fines under the Petroleum Act or Fire Brigade Act were received during the year. The net result was an increase in receipts of Rs. 921-2-2 over the estimate.

Expenditure—

(*a*) Under the head of establishment, the increase is due to the grant of grain compensation allowance. The decrease against Lall Bazar and Chitpur is chiefly due to the change in the incumbency of the Engineers, and that at other stations represents savings in the rank of khalasis, etc.

(*b*) The net decrease amounting to Rs. 4,433-15-5 under the head of "Contingencies," is mostly due to savings under the following heads:—

	Rs.	A.	P.
Repairs of buildings and look-out ...	2,549	4	5
Purchase of harness	1,365	0	0
Feed and keep of horses	845	12	2

(*c*) Under the head of "Other charges," there was a net increase of Rs. 384-12-7 due solely to increased expenditure on account of "Water pressure."

Out of the closing balance of Rs. 20,471-9-9, a sum of Rs. 17,000, estimated in the Budget for 1907-08 as the anticipated balance on 31st March 1907, has been taken as a set-off in determining the contribution payable by the several Municipalities during the current year.

4. The following table gives the number of fires and the way they were dealt with:—

Description of fire.	Number of fires.	Number of fires attended by fire-brigade.	Number of fires extinguished by neighbours or residents, etc.	Number of fires extinguished by Dock and Mill fire-engines and appliances.	Remarks.

Fires at which property destroyed, valued at Rs. 50 or more ...	51	36	13	2	
Fires at which property destroyed, valued at less than Rs. 50 ...	70	6	64	...	

Fourteen of these fires occurred in buildings licensed under Act I of 1893, in which property to the value of Rs. 19,76,265 was destroyed.

The total estimated value of the property destroyed by fire was Rs. 20,74,993-6 against Rs. 14,53,800-15, the value of the property destroyed in 1905-06.

The following were the most serious fires:—

1. On the 14th May 1906, a fire broke out at No. 297, Upper Circular Road, and destroyed some household furniture, about 1,000 maunds of waste paper, and damaged a two-storied house. The fire lasted for 11 hours and the loss was estimated at Rs. 30,000.

2. On the 8th November 1906, a fire broke out at the Hooghly Hydraulic Jute Press and destroyed two double storied godowns and one single-storied godown containing jute in kutcha bales and drums. The fire lasted for 24 hours and the loss was estimated at Rs. 2,25,000.

3. On the 6th January 1907, a fire broke out at No. 2/2, Ram Kanto Bose's Street, and destroyed a two-storied building containing about 2,500 maunds of jute. The fire lasted for 4½ hours and the loss was estimated at Rs. 30,000.

4. On the 28th January 1907, a fire broke out at No. 22, Garden Reach Road (Garden Reach Spinning and Manufacturing Co.), and destroyed a large three-storied building containing cotton and machinery. The fire lasted for more than 13 hours and the loss was estimated at Rs. 5,00,000.

5. On the 8th February 1907, a fire broke out at the Canal Jute Press and destroyed a double-storied building containing jute and machinery. The fire lasted for 48 hours nearly and the loss was estimated at Rs. 6,00,000.

6. On the 27th February 1907, a fire broke out at the Sibpur Jute Mill and destroyed a large one-storied building containing gunny and machinery. The fire lasted for 6¾ hours and the loss was estimated at Rs. 1,50,000.

7. On the 6th March 1907, a fire broke out at the Ganges Jute Mill, Sibpur, and destroyed a large single-storied godown containing about 27,000 maunds of jute in kutcha bales. The fire lasted for 46 hours and the loss was estimated at Rs. 2,50,000.

8 On the 12th March 1907, a fire broke out at the Ganges Jute Mill, Sibpur, and destroyed a single-storied godown containing about 20,000 maunds of jute in kutcha bales. The fire lasted for 45½ hours and the loss was estimated at Rs. 2,00,000.

5. Four licenses were granted under section 36, Act I of 1893, for letting off fire-works, rockets, etc. None of them were suspended under section 37 of the Act during the year. Four persons were arrested and convicted (fined) for letting-off fire-works under section 66, Act IV of 1866, Police Act.

One prosecution was instituted under Act IV of 1884 for possessing fire-works for sale. The accused was convicted and fined. One license for sale of fire-works was cancelled.

6. A memorandum of fires in the town and suburbs of Calcutta and in Howrah is attached.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF JUNE 1907.

DURING the first week of the month under report, weather was fairly dry in the western districts, with the exception of a few falls of rain in Behar, but in Eastern Bengal and Assam and Bengal rain was of daily occurrence, Assam being the region where it was heaviest and most general. Cherrapoonjee registered 42½" during the week, 19" of which fell in the twenty-four hours ending at 8 A.M. on June 6th. Skies were moderately to thickly clouded over the greater part of the division, and temperature was fairly normal, except on the first two days of the week, when it was in excess in the south-western districts and in defect in the north-eastern.

During the second week of the month rain was reported from all parts of the division except Behar, and was of daily occurrence in Assam. Skies were almost clear in the western districts on the 6th and 7th, but on the remaining days they were moderately to thickly clouded everywhere. Temperature was generally in excess in Chota Nagpur and the adjacent districts, and below normal in the north-eastern districts. The weather during the third week of the month was affected by a severe cyclonic storm described below, which may be said to have introduced the monsoon into Bengal. Rain fell generally over the whole reporting area, and was moderate to heavy on the 19th and 20th. Skies were thickly clouded, and temperature was fairly normal except on the last two days of the week, when it was considerably lower than usual in Chota Nagpur and Behar. In the fourth week also a severe cyclonic storm materially influenced the weather, rain being reported from all parts of the two Provinces, and being heavy in Bengal and Chota Nagpur. Skies were moderately to heavily clouded, and temperature was below normal in Chota Nagpur and the adjoining districts on the 21st, 22nd, 26th and 27th and nearly normal elsewhere.

During the last few days of the month the monsoon current gave rain daily in Eastern Bengal and Assam, but precipitation was light to the west.

The weather in the bay was marked by two cyclonic disturbances unusual both on account of their place of origin and their severity. An area of low pressure existed for some days in the bay, but it was not till the 13th that it showed signs of concentrating in the neighbourhood of Waltair. On the 15th it had developed into a storm and commenced to move slowly in a northerly or north-easterly direction. During the night of the 17th it increased rapidly in severity, and in consequence of the 2 A.M. observation it was considered desirable to hoist the danger signal at dawn at Calcutta and the river ports indicating the possible advance of a storm up the river. It crossed the coast in the afternoon slightly to the east of Saugor, and travelling in a direction nearly north passed close to Calcutta, curving sharply to the west, when it was to the north of that station. It then moved slowly to the west, and reaching the east of the United Provinces filled up on the 22nd, owing mainly to the failure of the Arabian sea current to provide the supply of moisture necessary for its continued existence.

This storm was remarkable for the very heavy seas and the comparative lightness of the winds that accompanied it.

The second disturbance was first shown on the morning of the 22nd as a well-marked depression lying to the east of the Sandheads. It intensified during the next two days into a severe storm, and crossing the coast on the 24th passed practically over Calcutta, curving like its predecessor rapidly to the west. It advanced into the Central Provinces and became merged in the trough of low pressure on the 27th. It gave 8½ inches of rain to Calcutta, and was accompanied by violent winds which caused considerable damage to trees, telegraph-posts, etc., in the city.

Summary of Temperature.—Mean temperature was about 2° in defect over Assam, but about normal over the rest of the reporting area. The highest temperature recorded was 113·4, and this was reported from Chaibassa. The lowest was 67·7, and this was reported from Purnea.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of June 1907:—

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province.

Rainfall was in slight defect in Eastern Bengal and in parts of Orissa, but was in excess over the remainder of the reporting area.

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, dark gloomy; d, drizzling rain; p, passing temporary showers; K, thunderstorm.

DRAFT NOTIFICATION.

The , *1907*—.Under sub-section (5) of section 190 of the Bengal Tenancy Act, 1885 (VIII of 1885), the following Rules are published for general information.

The rules published on 21st December 1885 and all subsequent modifications are hereby cancelled and withdrawn.

E. A. GAIT,
Offg. Chief Secy. to the Govt of Bengal.

Government Rules under the Bengal Tenancy Act, 1885 (VIII of 1885), [as modified by subsequent legislation.]

CHAPTER I.—GENERAL.

Section 189.

1. In carrying out the following rules, Revenue-officers shall have regard to the instructions of the Board of Revenue for the guidance of Revenue-officers, so far as such instructions are consistent with the rules herein prescribed under Act VIII of 1885.

2. Except where otherwise provided for by law or by these rules, all proceedings and orders of Revenue-officers, passed in the discharge of any duty imposed upon them by or under this Act, shall be subject to the supervision and control of the Board of Revenue; and the orders of each Revenue-officer under this Act shall be subject to the supervision and control of the Revenue-officers to whom he may be declared by the Board of Revenue to be, for the purposes of the Act, subordinate.

The Collector and the Commissioner, in whose jurisdiction operations under these rules are in progress, shall be entitled to inform themselves of the nature and progress of such operations.

3 Where no other mode of service of notice is prescribed by the Bengal Tenancy Act or by these rules, service shall be effected in the manner prescribed for the service of summons on a defendant under the Code of Civil Procedure, if the notice is addressed to only one person; and if it is addressed to a number of persons occupying or owning land in the same village, the notice shall be served in the manner prescribed for the service of summons on a defendant under the Code of Civil Procedure, *or* by proclamation and beat of drum, and by posting it, in the presence of not less than two persons, on some conspicuous place in the village, and also by fixing it up in the village office, if any, where the rent is usually paid

---

CHAPTER II.—STAPLE FOOD-CROPS AND PRICE-LISTS.

1. *Section 59 (1).*—The local areas under this section shall be those entered in Schedule II annexed to these rules, and the mart specified in the same schedule for each local area shall be that at which prices shall be recorded.

2. *Section 59 (7).*—The Collector, after such inquiry into the relative extent to which particular food-crops are grown in his district, as he may think necessary, shall cause a notice to be affixed

in his office, and in the sub-divisional office, specifying the food-crop or food-crops which in his opinion is or are most extensively grown in each local area.

The notice shall distinguish, as far as may be practicable, between crops grown on high lands and crops grown on low lands; and shall fix a day, not being later than fifteen days, after the publication of such notice, on which objections will be taken into consideration.

On the day so fixed the Collector shall take into his consideration the objections, if any, to the enumeration of staple food-crops proposed in the notice; and shall report his opinion thereon to the Board of Revenue.

The Board of Revenue shall submit the Collector's opinion to the Local Government, with such remarks as may seem to them necessary.

The Local Government, after considering the reports of the Collector and the Board of Revenue, shall determine and notify in the Calcutta Gazette what shall be deemed staple food crops in each local area.

3. Price-lists of staple food-crops shall be prepared on one market day in the month at intervals of not less than twenty days. This market day shall be selected by the Collector, subject to the control of the Board of Revenue.

4. The price recorded for each staple food-crop shall be the prevailing retail price at which that crop was actually sold in the mart to which the price-list refers on the day selected under the last preceding rule.

5. (1) Price-lists shall ordinarily be prepared by a gazetted officer not below the rank of a Sub-Deputy Collector. But in special cases where a Sub-Deputy Collector is not available, the Collector, with the sanction of the Commissioner, may authorise a kanungo to prepare the lists.

(2) Where prices are recorded at marts, other than those at the head-quarters of districts, the Collector may, with the sanction of the Commissioner, authorize a Sub-Registrar to prepare the lists on days when no gazetted officer not below the rank of Sub-Deputy Collector, or no kanungo is present in the town or village where the mart is held.

6. Every officer charged with the preparation of price-lists shall keep a record showing, as far as practicable—

(*a*) the date of his visit to the mart at which prices are to be recorded;

(*b*) the names of vendors and purchasers, the quantities sold, and the price thereof, for any sales effected in his presence.

7. When price-lists are prepared at the sadar sub-division by an officer other than a Covenanted Deputy Collector, or at other sub-divisions by an officer subordinate to the Sub-divisional Officer, or by a Sub-Registrar, they shall be submitted to the Covenanted Deputy Collector, or to a Deputy Collector specially nominated by the Collector for the purpose, or to the Sub-divisional Officer as the case may be. Such officer shall scrutinize the lists; he may call for explanation and cause manifest errors to be corrected; and, having satisfied himself of the accuracy of the lists, he shall countersign them.

8. The price-lists shall be published for not less than one week at the marts to which they respectively refer, at the Collector's or Sub-divisional Office, and at every police-station and munsifi in the local area.

9. After the expiry of the term of publication of the price-lists in the mart to which they refer, as mentioned in the last preceding rule, the lists shall be submitted to the Board with any objections made to them, and with the opinions of the officers who prepared and countersigned them, and of the Collector, on such objections.

CHAPTER III.—LANDLORDS' IMPROVEMENTS.

1. *Section 80.*—An application for the registration of a landlord's improvement may be presented to the Collector of the district or to the officer in charge of the sub-division in which the land benefited by the improvement so situated, or to any Assistant or Deputy Collector who may be specially appointed by the Government to receive such application. It shall, as far as practicable, be in the form specified in Schedule I appended to these rules.

2. The officer receiving the application may, if he thinks fit, require the applicant to present as many copies of the application as there are tenants mentioned in column 8 of the application, or as there are villages mentioned in column 2; and he may, as the case may be, either forward by registered letter copies to the tenants whose names are specified, or may give notice to the tenants by causing a copy to be fixed up in the presence of not less than two persons in some conspicuous place in every such village.

In either case he shall fix a date for hearing objections to the application, and shall cause that date to be notified to the parties concerned, either by entering it in the copies forwarded by registered letter, or by proclaiming it by beat of drum and by posting, in the presence of not less than two persons, a notice declaring it in each village.

The expenses of such service shall be borne by the applicant for registration.

3. The officer may make over the application to any of his subordinates, not being below the rank of a Sub-Deputy Collector for local inquiry and report, and shall in that case fix a date for hearing the report, and shall cause such date to be notified to the parties concerned in the manner set forth in rule 2. The inquiry shall be limited to the ascertainment of the fact whether the alleged improvement is of such a nature as to come within the meaning of section 76 (2) of the Bengal Tenancy Act, or not, and whether the cost of the improvement has been correctly stated in the application.

4. On the date so fixed, or on any date to which the proceedings may be adjourned, the officer shall hear summarily such of the parties and their witnesses as may attend, and shall consider any report submitted to him under rule 3. He shall then decide whether the work is an improvement as defined in section 76 (2) of the Bengal Tenancy Act, and whether the landlord is entitled to register it, and shall accordingly order it to be registered with such modifications of the figure in column 6 of the application as he may deem fit or refuse registration.

5. Nothing hereinbefore contained shall preclude the officer receiving the application from holding a local inquiry in person, and from ordering the improvement to be registered, or refusing registration in accordance with the result of the inquiry so held.

6. If an order refusing to register an improvement is passed by an officer lower in rank than the Collector of the district, such order shall not take effect until confirmed by the Collector of the district.

7. *Section 81(1).*—Evidence relating to any improvement under this sub-section shall be recorded by the Revenue-officer specified in rule 1 of this Chapter, who shall exercise the powers of a Civil Court in the trial of suits, and shall be guided by the provisions of sections 182 and 184 of the Code of Civil Procedure.

CHAPTER IV.—RECORD OF PROPRIETORS' PRIVATE LANDS.

1. *Section 118.*—Applications under this section may be made to the Collector of the district, or to the officer in charge of the sub-division in which the land in question is situated, or to any Assistant or Deputy Collector specially empowered by Government to receive such applications. If the application is made to the Collector of the district, he may transfer it for disposal to any officer empowered by Government to receive it.

2. The application shall be signed by the party making it, and shall contain the following particulars so far as the applicant is able to furnish them :—

(*a*) the name, tauzi number, and Government revenue of the estate ;

(*b*) the names of the registered proprietors, and the share held by each ;

(*c*) the specification of each plot of land referred to in the application, showing the village in which it is situated and the area and boundaries of each plot, if known ;

(*d*) the names of the tenants (if any) in occupation of each such plot ; and

(*e*) the grounds of the application.

3. On receipt of the application the officer shall make such inquiry as he may think fit by examining the applicant or his agent, and may call for further particulars before ordering further proceedings.

4. If the area of the lands has not been already ascertained by measurement made by competent agency under the authority of Government, or if for sufficient reason a further measurement is considered desirable, the officer shall order the lands to be measured and shall estimate the cost of measurement in accordance with the rules for the time being in force for the measurement of lands in partition cases, and shall require the applicant to deposit the amount either at once or in such instalments as he may deem fit.

CHAPTER V.—SERVICE OF NOTICES.

1. *Sections 12, 13, 15 and 18.*—Notices under these sections shall contain, so far as may be possible, the particulars given in the forms specified in Schedule I.

2. Where there is a sole landlord, or where two or more persons are joint-landlords, and have a common agent such as is referred to in section 188, or a common manager appointed under section 95, the notices shall be served on such sole landlord or his agent, or on such common agent or manager, as the case may be, in the manner prescribed for the service of summons on a defendant under the Code of Civil Procedure.

3. Where there is more than one landlord, and no common agent or manager has been appointed, the notices shall be served by posting it in the landlord's village office, if any, or, if there is no village office, by fixing it up on some conspicuous place on the tenure or raiyati holding as the case may be in the presence of not less than two persons.

A copy of the notice shall also be forwarded by post, in a letter registered under Chapter VI of the Indian Post Office Act, 1898 (VI of 1898), to each of the persons named in the notice

4. In the cases mentioned in rule 2, the landlord's fee shall be transmitted by Money Order to the sole landlord or his agent, or to the common agent or manager, as the case may be, at the time when the notice is issued.

5. If, in cases where the amount of landlord's fee is transmitted by Money Order, the sole landlord or his agent or the common agent or manager refuses to accept payment thereof, and in all other cases where no application is made for payment of the landlord's fee, the amount shall be kept in deposit in the Collector's office for three years from the date of the service of the notice, and on the expiry of that time it shall be forfeited to the Government.

6. The officer who signs the notices shall initial the entry on account of the landlord's fee in the Deposit Register kept in the Treasury.

7. *Section 46 (2)*.—The agreement under this section shall be filed in the Court having jurisdiction to entertain a suit for arrears of rent of the holding, and shall be served on the raiyat in the manner prescribed for the service of summons on defendant under the Code of Civil Procedure, on payment of the fee prescribed by the High Court.

8. *Section 46 (4).*—The notice under this section shall be filed in the Court having jurisdiction to entertain a suit for arrears of rent of the holding, and shall be served on the landlord in the manner prescribed for the service of a summons on a defendant under the Code of Civil Procedure, on payment of the process fee prescribed by the High Court.

9. *Section 63 (2).*—In cases (*a*), (*b*) and (*d*) of section 61 herein referred to, the notice of the receipt of the deposit shall be served by forwarding the notice by post in a letter registered under Chapter VI of the Indian Post Office Act, 1898(VI of 1898), or, where the Court may deem it necessary, in the manner prescribed for the service of a summons on a defendant under the Code of Civil Procedure.

10. *Section 72(2).*—The general notice referred to in this sub-section may be published by the transferee by fixing up a written notice to the tenants in the village office or in the presence of not less than two persons in some conspicuous place on the lands, and by proclaiming to the tenants by beat of drum, in every village to which the transfer extends, that the interest of the former landlord has passed to the transferee. The transferee may, if he thinks fit, apply for service of the notice to the Civil Court having jurisdiction to entertain a suit for arrears of rent of the holding, and the Court shall thereupon serve the notice as hereinbefore prescribed on payment of the process-fee prescribed by the High Court.

11. *Section 73.*—Notice under this section shall be in writing and shall be delivered to the landlord or his agent, or, where two or more persons are joint-landlords, to their common agent referred to in section 188, or to their common manager appointed under section 95, as the case may be, at the landlord's village office, or at such other convenient place as may be appointed by the landlord for the payment of rent under sub-section (2) of section 54.

12. The raiyat may, if he thinks fit, cause the notice to be served through the Civil Court having jurisdiction to entertain a suit for arrears of rent of the holding in the manner prescribed for the service of a summons on a defendant under the Code of Civil Procedure, on payment of the process-fee prescribed by the High Court.

13. *Section 86 (2) and (4).*—If the raiyat elects to proceed under the second sub-section of this section, he may personally serve a written notice of his intention to surrender on his landlord ; but if he elects to proceed under the fourth sub-section of the section, the notice of the raiyat's intention to surrender shall be served on the landlord in the manner prescribed for the service of a summons on a defendant under the Code of Civil Procedure, on payment of the process-fee prescribed by the High Court.

14. *Section 87.*—A notice of the tenant's abandonment of his holding under sub-section (2) of this section shall be in the form specified in Schedule I, shall be published by beat of drum upon the holding alleged to be abandoned, and a copy thereof shall be affixed, in the presence of not less than two witnesses, to some dwelling-house, or tree, or other conspicuous object upon the holding. The fee payable by the landlord shall be Re 1.

15. *Section 155.*—Notice to the tenant under this section shall be filed in the Court having jurisdiction to entertain a suit for arrears of rent of the holding, and shall be served in the manner prescribed for the service of a summons on a defendant under the Code of Civil Procedure, on payment of the fee prescribed by the High Court.

16. Every requisition from the Civil Court to the Collector for certified copies of, or extracts from, the record-of-rights shall, so far as may be possible, contain the particulars specified in the Form in Schedule I. The copy or extract shall be certified to be correct by such officer as may be appointed by the Collector for the purpose.

CHAPTER VI.

THE PROCEDURE TO BE FOLLOWED BY REVENUE-OFFICERS IN REGARD TO THE RECORD-OF RIGHTS AND SETTLEMENT.

1. (*a*) Every Revenue-officer appointed by the Local Government under the designation of "Settlement Officer" or "Assistant Settlement Officer" for the purpose of making surveys, records-of-right, settlement of rents, determination of proprietor's private lands and such like proceedings, or any one or more of them, under the Bengal Tenancy Act, 1885, is hereby vested with—

(i) all the powers exercisable by a Civil Court in the trial of suits;

(ii) powers to enter upon any land and to survey, demarcate and make a map of the same;

(iii) all the powers of an Assistant Superintendent of Survey and a Deputy Collector under the Bengal Survey Act, 1875; and

(iv) power to cut and thresh the crops on any land and weigh the produce with a view to estimating the capabilities of the soil.

(*b*) A Revenue-officer who, under the designation of "Settlement Officer," has been appointed by the Local Government for the purpose of making a survey and record-of-rights and settlement of rents under Chapter X of the Bengal Tenancy Act, 1885, shall have power to make over to any officer subordinate to him (who has been duly empowered, under the designation of Assistant Settlement Officer, to act as a Revenue-officer under the provisions of the same Chapter of the same Act),

(*i*) objections preferred under section 103A,

(*ii*) the settlement of fair rents (including the preparation of a table of rates),

(*iii*) the preparation of a Settlement Rent-Roll, under Chapter X, Part II, of the Act, in any area,

(*iv*) applications for the settlement of fair rents under section 105,

(*v*) suits instituted for the trial of disputes under section 106 of that Act, and

(*vi*) applications for the commutation of rents under section 40.

(*c*) A Revenue-officer so appointed under the designation of Settlement Officer shall, on the application of any person interested and after giving notice to other persons interested, and hearing any objections preferred, or of his own motion without giving such notice, have power to withdraw, from the file of any Assistant Settlement Officer subordinate to him, any of the matters specified in rule 1 (*b*) above, and to dispose of them himself, or to transfer them for disposal to any other Assistant Settlement Officer subordinate to him who has been duly empowered to act as a Revenue officer.

(*d*) On the application of either party to a suit under section 106, after giving notice to the other party and hearing any objections preferred, or of his own motion without giving such notice, a Revenue-officer so appointed under the designation of Settlement Officer may transfer to such competent Civil Court as the District Judge may designate the trial of a suit or of any class of suits instituted for the decision of a dispute or disputes which involve important and complicated questions of right and title or claims to be put in possession.

(*e*) In the case of an uninhabited village, any general notice to be served or publication to be made under the rules in this Chapter may be served or made in any inhabited village contiguous to that village, or if there be no inhabited village contiguous to that village, in the inhabited village nearest to that village or in the village in which the tenants and occupants of the lands of the uninhabited village are believed by the Revenue-officer to reside.

2. Deputy Superintendents of Survey and Assistant Superintendents of Survey employed in operations under these rules are hereby declared to be Revenue-officers for the purpose of performing any duty imposed upon them by these rules, or by instructions consistent with these rules, issued by the Board of Revenue. They are hereby vested with the powers specified in section 189 (1) (*b*), provided that an Assistant Superintendent shall not exercise the powers vested in a Superintendent under the Bengal Survey Act, 1875 (Ben. Act V of 1875).

Procedure for Cadastral Survey, Record-of-rights and Settlement of Rents.

3. The processes will be—

A.—Demarcation of boundaries.
B.—Measurement.
C.—Khanapuri, *i.e.*, preliminary preparation of the record.
D.—Attestation of the record.
E.—Publication of the draft record.
F.—Disposal of objections under section 103A.
G.—Settlement of fair rents in cases in which a settlement of revenue is being or is about to be made.
H.—Final publication of the record-of-rights.
I.—The settlement of fair rents on the application of the parties under section 105, and the trial of suits for the decision of disputes under section 106, in cases in which a settlement of revenue is not being or is not about to be made.

A.—Demarcation of Boundaries.

4. (*a*) In the demarcation of village boundaries, the area contained within the exterior boundaries of the village maps of the revenue survey shall be preserved, as far as possible, as the unit of survey and record.

(*b*) Where there is no dispute, the boundary of the village according to possession shall be followed for the purposes of map and record.

(*c*) Where there is a dispute as to a village boundary, the Revenue-officer shall decide the dispute under the Bengal Survey Act, 1875 (Ben. Act V of 1875).

(*d*) Where the Settlement Officer is of opinion that the village maps prepared at the Revenue Survey are not suitable as the unit of survey and record, he shall issue notice of the inquiry to all parties concerned in the manner prescribed, and after such local inquiry in the presence of the parties as he may consider necessary shall determine the area to be included in the village. He shall then submit his proceedings to the Board through such superior authorities as the Board may prescribe; and such area as the Board may, after such further inquiry as may be deemed necessary, declare to be included in a village shall be adopted as the unit of survey and record-of-rights:

Provided that in all cases where the Revenue Survey village is not adopted as the unit of survey, the Settlement Officer shall draw up a statement, in such form as the Board may prescribe, showing the areas adopted as the unit of survey as compared with the areas contained in the village maps of the Revenue Survey; and such statement shall be filed in the Collector's Office.

(*e*) Where no Revenue Survey maps have been prepared, the Revenue officer appointed under the designation of Settlement Officer shall issue notice to all parties concerned in the manner prescribed, and after such local inquiry in the presence of the parties as he may consider necessary, shall determine the area to be included in the village. He shall then submit his proceedings to the Collector, and such area as the Collector, after such further inquiry as he deems necessary, and with the sanction of the Board of Revenue, by general or special order, declares to constitute a village shall be adopted as the unit of survey and record-of-rights.

(*f*) In cases where the procedure prescribed in sub-clauses (*d*) and (*e*) have been adopted the Board of Revenue shall submit a report to Government for issue of the notification prescribed by section 3 (10) (*b*) of the Bengal Tenancy Act.

(*g*) The notice under rule 4 (*d*) and (*e*) of the inquiry to be held shall be given by proclamation and beat of drum and by posting it in the presence of not less than two persons in some convenient place or places in the lands to which it refers.

5. Boundary pillars of a permanent nature shall be erected at every point where the boundaries of three or more villages meet, and may be erected wherever the Revenue-officer considers it necessary to define by pillars the boundaries of estates or tenures, or of lands which have been the subject of dispute.

B.—Measurement.

6. A field map of every village shall be prepared. It shall show the boundaries of every field separately held, or of such plot of land as the instructions of the Board of Revenue for giving effect to these rules may lay down.

C.—Khanapuri, i.e., *Preliminary Preparation of the Record.*

7. The following are the principal documents to be prepared in the course of a survey and the preparation of a record-of-rights under Chapter X of the Bengal Tenancy Act, 1885 :—

Village map.	Khewat.
Khasra.	Khatian.
Parchas.	Terij.

These and any other papers prescribed by the Board of Revenue shall be prepared in such manner as the Board may prescribe.

8 The record-of-rights, which shall be published under section 103A of the Bengal Tenancy Act, 1885, shall be contained in the khewat and the khatian and such other papers as may be specified by general or special order of the Board of Revenue in the case of any local area.

9. (*a*) The proprietary khewat shall show the character and extent of proprietary interests. It shall be first drawn up with reference to the registers maintained by the Collector under the provisions of the Land Registration Act, 1876 (Ben. Act VII of 1876). As the record-writing proceeds, the proprietary khewat shall be altered in accordance with the facts of possession. The Settlement Officer shall, from time to time, under such instructions as the Board of Revenue may prescribe in this behalf, give information to the Collector of all alterations made in the khewat, and the Collector shall thereupon take action to make such corrections as may be necessary in his registers prepared under the Land Registration Act. If the Collector, after inquiry under the Land Registration Act, finds that any entry in the khewat is incorrect, a note shall be made in the khewat of his finding.

(*b*) A khewat shall ordinarily be prepared to show the character and extent of the interest of tenure-holders, such of their interests as are of a raiyati nature being also recorded in the khatian.

10. (*a*) The khatian shall show in detail for all the lands of the village, estate by estate, landlord by landlord, tenant by tenant, and occupant by occupant, the lands included in each estate owned by each landlord and occupied by each tenant or occupant, with particulars of rent and area and of the incidents of each tenancy.

(*b*) Lands cultivated or otherwise held direct by the proprietor shall be shown in detail in the khatian, and shall be entered either as proprietor's private land, or as land held by the proprietor, but not private land in accordance with the provisions of Chapter XI of the Bengal Tenancy Act, 1885.

D.—Attestation of the Record.

11. (*a*) When the map, khasra, khewat, and khatian for a village have been prepared in the manner prescribed by these rules and by instructions of the Board of Revenue consistent with them, the Revenue-officer shall issue a notification in such form, as may be approved by the Board, fixing a day which shall be

not less than a week from the date of publication of the notification, on which he will be present at some place to be specified at or near the village, for the purpose of attesting and completing the record-of-rights.

(*b*) The notification shall further state that on the day so fixed, or on any other day to which the proceedings may be adjourned, the Revenue-officer will record rents and status and deal with objections relating to entries in the record or omissions therefrom; and it shall require all parties interested in the subject-matter of the inquiry to attend at the time and place specified, with their *parchas*, and with such evidence as they have to offer in connection with the proceedings.

(*c*) Such notification shall be published by proclamation and beat of drum, and fixed up, in the presence of not less than two persons, in some conspicuous place in the village to which it refers.

12. The Revenue-officer may also, if he deem fit, take such additional measures under the powers conferred on him by rule 1 of this Chapter, as he may deem desirable to procure the attendance, at the place specified in the notification issued under the last preceding rule, of the occupants, under-raiyats, raiyats, tenure-holders, landlords and proprietors, or their authorised agents.

13. On the date specified in the notification issued under rule 11, or on any other date to which the proceedings may be adjourned, the entries which have been made in the khewat and in each khatain shall be read out in the presence of such of the interested parties as are in attendance.

If the correctness of any entry is questioned, the Revenue-officer shall dispose of the objection after local inquiry or otherwise:

Provided that if the correctness of the measurement be objected to, and a fresh measurement be demanded, the Revenue-officer may require the cost of the re-measurement to be deposited.

If the measurement shows the original measurement to have been inaccurate, the amount deposited, or any portion of it, may, if the Revenue-officer thinks fit, be refunded to the objector.

14. The Revenue-officer shall ascertain what raiyats claim the right to hold at fixed rates or fixed rents, explaining, as far as may be necessary, the provisions of the Bengal Tenancy Act, 1885, in this respect. If the right claimed is disputed by the landlord the Revenue-officer shall call on the claimants for proofs of such right. It is sufficient for the claimant to establish the presumption mentioned in section 50 (2), and if that presumption be not rebutted by the landlord, the claimant shall be recorded as a raiyat at fixed rates of rent, or a fixed rent, as the case may be.

15. The Revenue-officer shall ascertain which of the raiyats are settled raiyats, or occupancy raiyats, as the case may be, and shall record them as such, having regard to the presumption of section 20 (7) of the Bengal Tenancy Act, 1885.

16. The Revenue-officer shall ascertain what raiyats are non-occupancy, and to this end he shall be entitled to call upon the landlord or his agent to produce a statement showing the names of the raiyats alleged by him to be non-occupancy raiyats. On the production of such statement, the Revenue-officer shall explain to the raiyats whose names are entered in the statement, and who have not already been recorded as occupancy or settled raiyats, the nature of the presumption raised by section 20 (7) of the Bengal Tenancy Act, 1885. If, after such explanation, a raiyat admits himself to be a non-occupancy raiyat, he shall be recorded as such. If he does not admit himself to be a non-occupancy raiyat, the Revenue-officer shall call on the landlord to prove the allegation made by him in regard to such raiyat.

17. Abwabs shall not be recorded. Cesses which are authorised by law shall be recorded separately from the rent in the khatian.

18 The Revenue-officer shall summarily ascertain the tenant's present rent, and record it in the appropriate column of the khatians as the rent payable in respect of the land held by the tenant.

19. If while the record is being prepared, the landlord and tenant agree as to the rent, which shall be recorded as payable, the Revenue-officer, if he has been vested with powers under section 103C of the Bengal Tenancy Act, 1885, as amended by Bengal Act I of 1907, may, if he is satisfied that the rent agreed upon is fair and equitable but not otherwise, settle such rent as a fair and equitable rent, although the terms of the agreement are such that, if they were embodied in a contract, they could not be enforced under the Bengal Tenancy Act.

20. If the Revenue-officer has not been vested with powers under section 109C, he may, if he considers that the provisions of that section should be applied in respect of the rent of any tenure or holding, submit a report to any Revenue-officer, who has been vested with powers under section 109C in the local area for which the record-of-rights is being prepared: and such Revenue-officer after giving notice to the landlord and tenant, and after such further inquiry as he may deem necessary, may, if he is satisfied that the rent agreed upon by the landlord and tenant is fair and equitable, but not otherwise, settle such rent as a fair and equitable rent, although the terms of the agreement are such that, if they were embodied in a contract, they could not be enforced under the Bengal Tenancy Act.

21. Proceedings for the settlement of rents under section 109C shall be drawn up in such form as the Board of Revenue may prescribe; and all rents settled under clause (*1*), section 109C or revised by the Board of Revenue under clause (*5*) section 109C shall be entered in the record-of-rights.

22. When the record-of-rights and of existing rents has been prepared and attested in the manner prescribed in Rules 11 to 18, and when the record shall have been arranged and corrected in accordance with the orders which the Revenue-officer may have passed, he shall record a proceeding in which he shall state that attestation of the records of the village has been completed, and shall then cause the draft record-of-rights to be published in the village in the manner provided in Rule 23.

E.—Publication of the Draft Record.

23 (*a*) As soon as the record-of-rights has been prepared and attested, a notice shall be posted up at the landlord's office in the village or, in the presence of not less than two persons, in some conspicuous place in the village, stating that the draft of the record will be published in the village on a day to be specified, not less than a week from the date of the posting of such notice, and calling on all persons interested to attend on the date so specified:

Provided that the draft of the record shall not be published until the proceeding under Rule 22 has been recorded.

(*b*) On the date fixed for the publication of the draft record, the Revenue-officer shall either proceed to the village himself and read the contents of the record in the presence of the parties who attend, or he shall depute an officer, not below the rank of kanungo, who shall read out the contents of the record in the presence of as many of the parties as attend, and the Revenue-officer or the officer deputed by him, as the case may be, shall at the same time inform the parties who attend that the Draft Record will be open for inspection for not less than one month in the office of the Revenue-officer, or in such other convenient place as the Revenue-officer may determine.

The Revenue-officer shall receive and consider any objection which may be made to any entry during the period named.

F.—Disposal of Objections under section 103A.

24. When an objection is made within and before the expiry of the period of publication of the Draft Record prescribed under Rule 23 (*b*) regarding the correctness of an entry, or as to the propriety of any omission, notice of the objection shall be served on all persons whose interest may, in the opinion of the Revenue-officer, be affected thereby, and they shall be called upon to attend at such time and place as the Revenue-officer may fix for the disposal of the objection.

If no person attends to contest the objection, the objection may be allowed and the record amended accordingly, or the person who made the objection may, if the Revenue-officer thinks fit, be called upon to produce evidence in support of his objection.

All such objections shall be dealt with summarily under such instructions as the Board of Revenue may prescribe.

G.—Settlement of Fair Rents in cases in which a Settlement of Revenue is being, or is about to be, made.

25. If it does not appear to the Revenue-officer expedient to settle the rents of tenants of every class in an estate or tenure belonging to the Government, the Revenue-officer shall submit a report for the orders of the Government under the proviso to section 104 of the Bengal Tenancy Act, 1885, as amended by Bengal Act I of 1907.

26. In the case of a settlement of fair rents under Part II of Chapter X of the Bengal Tenancy Act, 1885, when a settlement of revenue is being, or is about to be, made, the Revenue-officer shall serve a notice by proclamation and beat of drum, and by posting it, in the presence of not less than two persons, in some conspicuous place in the village comprising the lands under settlement.

The notice shall be in such form as may be approved by the Board of Revenue, and shall set forth that on a date named and at a place named, the Revenue-officer will settle fair rents in respect of all estates, tenures or holdings, and for unsettled lands included in such village. A schedule may, when the Revenue-officer thinks fit, be appended to the notice, giving such particulars as he may think necessary relating to the names and numbers of all estates, tenures, and holdings paying revenue or rent to Government, and of unsettled lands for which rent will be settled. Such notice shall be served at least one week previous to the date fixed for settlement of fair rents. When such notice has been served it shall be held that all persons have, subject to the provisions of Rule 34 (*b*), been sufficiently warned of the date fixed:

Provided that in cases in which a table of rates is prepared under the provisions of section 104B, the notice shall not be published until the table of rates has been confirmed under sub-section (*5*) of that section.

27. A table of rates shall not ordinarily be prepared when it is found that the tenants of the local area in question hold their lands at lump rentals, and no rates actually exist, or when the rates are so numerous and varied, and are so little dependent on the class of soil, that no table of existing rates can be prepared. When the above conditions do not obtain, and it is possible to prepare a table of existing rates which are generally of a uniform character and in accordance with certain ascertainable classes of soil, a table of rates may be prepared in accordance with the provisions of section 104A (*c*):

Provided that when the Revenue-officer is of opinion, for reasons to be recorded by him in writing, and submitted to, and approved by, the authority empowered to confirm the table of rates, that the rents stated as the existing rents by the landlord and tenants are not the rents that are legally payable, and that it is impossible to ascertain those rents, a table of rates fairly and equitably payable may be prepared and shall be based on the rates or rents payable in those neighbouring villages, the lands of which are fairly comparable with the lands of the village.

28. When the Revenue-officer has decided to settle rents in any local area on the basis of a table of rates, under section 104A (*c*), he shall first prepare a table of existing rates and shall then either maintain those rates or shall proceed to enhance or reduce them, having regard to the general principles laid down in the Bengal Tenancy Act, 1885, for the enhancement or reduction of rents and especially to section 80 (*b*), (*c*) and (*d*).

29. The table of rates finally prepared by the Revenue-officer and published by him under section 104B (2), shall contain the particulars noted in section 104B (1) and shall show—

(a) the classes of land as locally known, that have been adopted in the fixation of rates;

(b) the area, expressed in local measure, for which each rate is fixed;

(c) the existing rates, if any, taken as the basis of the table of rates; and

(d) the rates fixed as fairly and equitably payable for that area of land of each class of land for each class of tenant whose rent is liable to alteration.

30. (a) When a table of rates has been prepared under section 104B, a notice shall be posted up in the landlord's office in the village or in the presence of not less than two persons in some conspicuous place in the village, stating that the table of rates will be published in the village on a day to be specified, not less than a week from the date of the posting of such notice, and calling on all persons interested to attend on the date so specified.

(b) On the date fixed for the publication of the table of rates the Revenue-officer shall proceed to the village and shall explain to so many of the parties as attend, the proposed rates and the grounds on which they are based, and shall hear and consider any objections that may be raised to any entries in the table. He shall at the same time inform the parties who attend that the table of rates will be open to inspection for not less than one month in the office of the Revenue-officer, or in such other convenient place as the Revenue-officer may determine, and that any person who objects to any entry in the table of rates may present a petition to him on the subject, within one month of the date of the publication of the table of rates, which will be duly considered under section 104B (3).

31. The Revenue-officer shall record the grounds of his final order in every case in which he disposes of an objection to a table of rates under section 104B (4).

32. In submitting his proceedings to the confirming authority under section 104B (4), the Revenue-officer shall describe the land classification adopted by him for the purposes of his table of rates, and shall show in tabular form the rates which were found by him to exist for the classes of land described, and the rates he proposes to substitute for the existing rates, explaining in each case his grounds for maintaining, enhancing or reducing the rates.

33. (a) The following Revenue Authorities are empowered under section 104B (4) to confirm tables of rates prepared under the Bengal Tenancy Act:—

(i) when the total rents to which the table of rates is to be applied will not, in the opinion of the Revenue-officer, exceed Rs. 5,000, the Commissioner of the Division; and

(ii) when the total rents in question will, in the opinion of the Revenue-officer, exceed Rs. 5,000, the Board of Revenue.

(b) The following Revenue Authorities are empowered, under section 104B (4), to confirm Settlement Rent-Rolls prepared under the Bengal Tenancy Act:—

(i) in all cases in which the Settlement Rent-Roll has been prepared by an Assistant Settlement Officer, and the Settlement Officer is of the rank of a Collector, the Settlement Officer; and

(ii) in all other cases the Collector or other Revenue Authority to whom the Settlement Officer is declared by the Board of Revenue to be immediately subordinate.

34. On the date fixed in rule 26 above, or on any subsequent date to which the proceedings may be adjourned, the Revenue-officer shall read, or cause to be read aloud in his presence, the name of each tenant whose rent has to be settled, the area of his tenancy, and the existing rent, and shall proceed

to settle a fair rent for every such tenant under the provisions of section 104A (*1*) (*a*), (*b*), (*d*) or section 104C:

Provided that when a Revenue-officer proposes to alter an existing rent, and the parties have not attended in compliance with the general notice prescribed in rule 26 above, the Revenue-officer shall serve each person interested with a special notice, and the fair rent shall not be settled in the absence of such person until after due service of such special notice has been proved.

35. The Settlement Rent-Roll shall contain the particulars prescribed in section 104A (2), and the fair rent settled for each tenant shall be entered in it by the Revenue-officer himself at the time that such rent is settled.

36. As soon as the Settlement Rent-Roll has been prepared, it shall be published in the manner prescribed for the publication of the Draft Record in rule 23, and the Revenue-officer, or the officer deputed by him to read out the contents of the Settlement Rent-Roll, as the case may be, shall at the same time inform the parties who attend that the Settlement Rent-Roll will be open to inspection for not less than one month in the office of the Revenue-officer, or in such other convenient place as the Revenue-officer may determine, and that any person who objects to any entry in the Settlement Rent-Roll or omission therefrom may present a petition to the Revenue-officer on the subject within one month of the date of the publication of the Settlement Rent-Roll, which will be duly considered under section 104E.

37. All objections presented under rule 30 or rule 36 shall be dealt with in accordance with the provisions of rule 24, in the same way as objections presented under section 103A. An appeal presented under section 104G (*1*) shall lie to the officer to whom the Revenue-officer who has passed the order appealed against is immediately subordinate:

Provided that a second appeal shall lie from any order on appeal settling the amount of a fair rent passed by a Settlement Officer or Collector under this rule to the Commissioner of the Division, and that, when the proposed annual rental of any tenancy exceeds 100 rupees *per annum*, a final appeal shall, in all such cases, lie to the Board of Revenue.

38. As soon as the Settlement Rent-Roll has been sanctioned by the Confirming Authority, it shall be incorporated in the record-of-rights by the entry of the fair rents settled in a column of the khatian to be set apart for that purpose.

39. Rules 26 to 38 (both inclusive) shall apply, so far as may be, to a settlement of rents under section 112 of the Bengal Tenancy Act, 1885, as amended by Bengal Act I of 1907.

H.—Final publication of the Record-of-rights.

40. When all objections under section 103A have been disposed of as provided for in rule 24 above, and, in cases in which a settlement of revenue is being, or is about to be, made, the Settlement Rent-Roll has been incorporated in the record-of-rights, as provided in rule 38, and the Revenue-officer has corrected the Draft Record in accordance with the orders passed by him on such objections or in the course of the preparation of the Settlement Rent-Roll, he shall finally frame the record and cause it to be published by notifying that its contents will be read out in the village on a date to be specified, not less than a week from the date of the publication of such notice, and by reading it out himself or causing it to be read in the village on the date so specified, in the manner prescribed in rule 23, in the presence of the parties or of as many of them as attend.

41. When all the records-of-rights in any local area have been finally published, the Revenue-officer shall submit a report to the Local Government, containing such particulars as may be necessary in order to enable the Local Government to issue a notification under sub-section (*2*) of section 103B of the Bengal Tenancy Act, 1885, as amended by Bengal Act I of 1907.

I.—The settlement of fair rents on the application of the parties under section 105, and the trial of suits for the decision of disputes under section 106 in cases in which a settlement of revenue is not being, or is not about to be, made.

42. When the landlord or tenant applies for the settlement of a fair rent, he shall be considered as plaintiff and the opposite party as defendant, and the Revenue-officer shall proceed as is directed in rules 43 to 48 of this Chapter.

43. When the estate or tenure is managed by the Court of Wards or by a Manager appointed by the District Judge under section 95 of the Act and a settlement of revenue is not being, or is not about to be, made, the procedure laid down in these rules for recording or settling rents shall be followed, the Manager of the estate or the tenure being regarded as the landlord.

44. When a landlord or tenant applies for the settlement of a fair rent, notice shall be served on every person interested in the application together with a copy of the application, or extract therefrom, or summary thereof, so far as the application concerns such person.

45. With the consent of the Revenue-officer, any number of tenants occupying land under the same landlord in the same village may make a joint application for the settlement of rents, or may be joined as defendants in the same proceeding on a similar application by the landlord :

Provided that if at any time it shall appear to the Revenue-officer that the question between any two of the parties of whom one is so joined with others cannot conveniently be so jointly tried, he may order a separate trial to be held of that question, or he may pass such order, in accordance with the Code of Civil Procedure, for the joint or separate disposal of the application as he may think fit.

46. (*a*) On the date fixed for the settlement of fair rents, or any subsequent date to which the proceedings may be adjourned, the Revenue-officer shall read aloud, or cause to be read aloud in his presence, the name of each tenant whose rent has to be settled, the area of his tenancy, and the existing rent, and shall then proceed to settle a fair rent under the provisions of section 105.

(*b*) Where a landlord or tenant does not attend, after due service of notice has been proved, the procedure may be *ex parte*.

(*c*) Where a landlord or tenant appears and the fair rent is not settled under sub-section (*5*) or sub-section (*6*) of section 105, that is, by the acceptance by the parties of a rent proposed by the Revenue-officer, or compromise, the Revenue-officer shall record evidence in the manner prescribed in clause (*f*) of section 148 of the Bengal Tenancy Act, 1885, for the trial of rent-suits, and shall settle a fair and equitable rent according to law :

Provided that in important cases the Revenue-officer may, in his discretion, record evidence at length.

(*d*) When a fair rent has been settled under these rules, it shall be entered in the khatian as the rent payable in respect of the holding from the date prescribed by section 110.

47. It shall not be necessary for a Revenue-officer to draw up a separate decree with regard to the fair rent settled ; but the entry made in his decision or schedule attached thereto with regard to the fair rent settled shall be held to be a decree.

48. Proceedings under sections 105A and 106 of the Bengal Tenancy Act, 1885, as amended by Bengal Act I of 1907, shall be dealt with in all respects as suits between the parties.

Supply of copies of the Record-of-rights to Parties interested.

49. (*a*) The Revenue-officer having completed the record-of-rights, shall clause copies of it to be made, one of which, or extracts from which, will be made over to the landlord concerned, or, where there are more landlords than one, to their common manager, as the case may be, or, if there be no common agent or common manager, to such person among the landlords as the Revenue-officer may think fit, and one to the Collector of the district.

(*b*) An extract from the record-of-rights relating to his tenancy shall be given to every tenant under the seal of the Revenue-officer and under the signature of an officer duly authorised by the Revenue-officer to give copies.

(*c*) Copies of records, or of extracts from them, supplied to landlords and tenants under this rule shall be given free or on payment according as in the case of each local area the Local Government may direct. When payment is required, the sums so recovered shall be adjusted against the expenses incurred on account of survey and settlement.

(*d*) If the Local Government so directs, copies of the maps shall be prepared and distributed to the landlords and tenants concerned, and in such a case the foregoing rules regarding copies of, or extracts from, the record shall apply to such copies of the maps.

Final Reports.

50. The Local Government may, if it thinks fit, direct that a final report be written, in English, for each village and each local area under survey.

The report for the village shall show—

(*a*) the number of tenants of each class, with the area held and rental paid by them ;

(*b*) the area and classification of the village lands ;

(*c*) the rental before settlement, and according to settlement, and the number of fair rents settled, with explanation of increase or decrease ;

(*d*) when settlement of land-revenue is being made, the amount of Government revenue, before and after re-settlement, grounds of assessment, and comparison of gross assets with new assessment ;

(*e*) the rates of rent prevailing before settlement, and the rates settled, if any ;

(*f*) proximity to markets, and facilities for irrigation ;

(*g*) village customs, including customs as to payment of village officials ;

(*h*) arrangements made for maintenance of records ; and

(*i*) other matters deserving of notice which have been excluded from the record-of-rights.

The report for the whole area under survey shall contain the following particulars :—

(*i*).—General description of the tract.

(*ii*).—Its fiscal history.

(*iii*).—Statistical results.

(*iv*).—Comparison of condition of the tract as regards rentals before and after survey.

(*v*).—Financial results, including approximate division of expenses under the heads—

(*a*) survey,

(*b*) record-of-rights, and

(*c*) preparation and distribution of records.

Applications under section 103 for Survey and Record-of-Rights.

51. These applications shall be made to the Collector of the district.

52. The application shall specify—

(*a*) the status of the applicant, viz., whether he is a proprietor or a tenure-holder ;

(*b*) the particulars specified in section 102, of the Bengal Tenancy Act, in respect of which the application is made ; and

(*c*) the number of tenants occupying the estate or tenure or part thereof in respect of which the application is made, the total rent payable by them at the time, and the estimated area covered by the application (so far as the applicant is able to give these particulars).

53. (*a*) If the application is made by a proprietor, it shall not be admitted unless the name of the applicant and the extent of his interest are registered under Bengal Act VII of 1876.

(*b*) If the application is made by a tenure-holder, it shall not be admitted unless the right of the tenure-holder and the extent of his interest is admitted by the superior landlord or is proved to the satisfaction of the Collector.

54. On receipt of the application, the Collector shall forward it to the Commissioner with any remarks which he may think necessary.

55. The Commissioner may call for further information or may require the application to be amended.

56. If the Commissioner considers that the application cannot be granted with advantage to the interests of all persons concerned, he may reject it. If he approves it, he shall forward the application with an expression of his opinion for the orders of the Board of Revenue.

57. A Commissioner rejecting an application shall record his reason for doing so, and the applicant, if dissatisfied with the order, may appeal within one month to the Board of Revenue.

58. When an application is referred to the Board under rule 55, or an appeal is preferred under rule 56, the Board may call for further information, if necessary, and shall pass such orders as it may think fit for allowing or rejecting the application.

59. As soon as an application is allowed, the Collector shall call upon the applicant to deposit eight annas *per* acre of the estimated extent of the estate or tenure or part thereof in respect of which the application has been allowed. If the Collector is unable to estimate the area, he shall require a deposit at the rate of Rs. 2 for each tenant. If the amount does not exceed Rs. 500, the applicant must deposit the whole amount in advance. If it exceeds Rs. 500, the applicant shall deposit the sum of Rs. 500 and shall give such security as the Collector may require for the payment of the balance of the deposit in such instalments as the Collector may from time to time demand.

If the amount deposited as above proves more than sufficient to cover the cost of the proceedings, the unexpended balance will be refunded on their termination.

If the amount deposited proves insufficient to cover the cost, the applicant shall, when required by the Collector, deposit from time to time such further sums as the Collector may think necessary for the completion of the proceedings. If he shall fail to do so, the proceedings may be stopped and the order allowing the application cancelled.

59. In conducting the operations, the Revenue-officer shall proceed in accordance with the rules for the guidance of officers acting under orders made under section 101.

CHAPTER VII.—GENERAL SCALE OF FEES.

1. *Section 189 (1).—Service of Notices.*—For the service of every notice under this Act, not being a notice issued by any Revenue or Civil Court [fees for serving which are regulated by the Court Fees Act, 1870 (VII of 1870)], and not being provided for by any other rule made under this Act, a process-fee of 12 annas shall be levied, if the notice be directed to one or more persons residing in the same village.

2. Where such notices are directed to several persons resident in different villages, a fee of 12 annas shall be levied for service in each village.

3. In addition to the above fee, the actual charge which must be incurred, if it is necessary to travel by railway or boat, or cross ferries, shall be levied from and paid by the person at whose instance the process is issued before issue of the process. If a peon carries more than one process involving charges for railway-fare, boat-hire, etc., the sum leviable shall be charged, in equal shares, upon all the processes so carried. The rates at which such boat-hire is to be charged shall be the same as those fixed for criminal processes under rule VII of the rules prescribed by the High Court under clause (2) of section 20 of Act VII of 1870, and shall be sufficient only to cover, on the whole, the actual cost

of hiring boats, or of such boat establishment as it may be necessary to maintain for the purpose of serving processes of these classes.

4. If a peon is detained at the place of service for more than 24 hours at the request of the person at whose instance the process was issued, or of his agent, such person or agent shall then and there pay demurrage at the rate of 5 annas a day. Unless this demurrage is paid, the peon shall decline to wait. No demurrage shall be charged if the delay was not due to the person requiring the process or to his agent.

5. *Section 61 (2).—Deposits of Rent.*—For deposits of rent under section 61 (2), 4 annas for every such deposit of Rs. 25 or less, with an additional 4 annas for every Rs. 25, or part of Rs. 25, in excess:

Provided that in no case shall the fee exceed the sum of Rs. 5.

6. *Section 134.—Distraint of Crops.*—The following scale of charges is prescribed, on account of processes for distraint and sale under the Bengal Tenancy Act:—

(*a*) in respect of the warrant of distraint—8 annas;

(*b*) in respect of each man necessary to effect the distraint and also to ensure safe custody, where such man is to be left in actual possession—4 annas a day; and

(*c*) in respect of action taken under clause (2), section 126, for the reaping, storing, or preservation of the crop distrained—4 annas a day for every person employed, and in addition actual hire of threshing-floor or store-house, if necessary.

In addition to the charges under clauses (*a*), (*b*) and (*c*) above, railway-fare, boat-hire, and ferry charges may be levied, when necessary, as under rule 3 of this Chapter.

NOTICE.

ENTRANCE EXAMINATION.

A TEST-EXAMINATION of private students and school-masters for admission to the ensuing Entrance examination will be held at the Office of the Inspector of Schools, Presidency Division, 12 Dalhousie Square, Calcutta, on Monday, the 9th, and Tuesday, the 10th December 1907. Such candidates only as reside in any of the districts of the Presidency Division, including Calcutta, will be admitted to the examination.

2. Candidates who do not appear from any recognised school, *i.e.*, who have not attended any recognised school since the 1st of September next preceding the examination, will be treated as private students. They will be required to furnish satisfactory proof that they have not read in any recognised school from that date. They should produce certificates of conduct and progress in studies from the authorities of the last school where they read, and also a certificate from other reliable authorities regarding conduct and progress after leaving school. The transfer certificates granted to them by the authorities of the schools in which they studied last, or the Registrar's receipt for the fee paid in the case of those candidates who previously appeared at the Entrance examination, must be submitted in original along with the application for permission to appear at the test-examination.

3. *Bond-fide* teachers employed in any of the schools in the Presidency Division may be admitted to the examination if they can produce certificates of service and character from their employers or from the Deputy Inspector of the district concerned.

4. Each candidate should submit to this office, not later than the 18th November 1907, his application for admission to the test-examination, stating the following particulars:—

(1) Age, (2) residence, (3) father's name (4) second language besides English, and (5) whether he appeared at any previous Entrance examination.

5. The admission-fee for the examination is Rs. 4 for each candidate, and is to be remitted with the application within the prescribed date, after which a fine of Rs 2 is to be imposed for each week's delay.

6. No private student will be admitted to the test-examination unless accompanied, for the purpose of identification, by some person known to this office.

7. Candidates who are sent up by this office must appear at the Calcutta Examination Centre.

8. Those who reside at a distance from Calcutta may, with special permission, present themselves at the test-examination held by the head-master of the nearest zilla or Government high school under the control of the Inspector of Schools, Presidency Division, on condition that they appear at the centre selected by the candidates from that institution. The head-master of such school is hereby authorized to sign the applications, which must afterwards be countersigned by the undersigned. The fees and fines paid by these candidates as per paragraph 5 above should be utilized in meeting the cost of the examination.

9. The Entrance examination in 1908 will be held on the 2nd March 1908 and following days.

10. Applications and fees for admission to the examination must reach the Office of the Registrar on or before the 20th January 1908.

F.A. AND B.A. EXAMINATIONS.

Deputy Inspectors, Sub-Inspectors, and *bond-fide* teachers of English schools in the Presidency Division who have served as such for full two academical years, or for six months in the case of those who were admitted to a former examination of the same class, will be admitted to the above examinations on production of certificates of character and length of service (with dates) from their employers. *Their applications must reach this office on or before the 10th January 1908.*

1. In accordance with section 9, Chapter XV, of the Revised Regulations dealing with the registration of University students, all candidates, who intend to appear at any of the ensuing examinations of the University of Calcutta otherwise than as students of some affiliated institutions and who have applied for or have obtained the special permission of the Senate for the purpose, are required to apply to the Registrar of the Calcutta University

for the registration of their names as University students. No person will be deemed a "University student" unless and until his name has been duly registered, and none but "University students" will be eligible for admission to any University examination other than the Entrance or Matriculation. A registration fee of Rs. 2 must accompany every application.

2. Candidates for the B A examination must send their F.A. Certificates, and candidates for the F.A. examination their Entrance Certificates, together with a letter, in original, from the Senate of the Calcutta University, permitting them to appear at the examination.

3. Candidates should carefully read the printed form of application and supply all the informations required by the University, including the Registrar's receipt in the case of those school-masters who were admitted to a previous examination of the same class.

4. The F.A. and B.A. examinations in 1908 will be held on the 23rd March 1908 and following days.

5. Applications with the countersignature of the undersigned and fees for admission to the above examinations must be sent to the *Office of the Registrar on or before the 8th February 1908* by the candidates direct.

LAND SALE NOTICES.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Joint Assisted Siding at Bhalgarah, off Gopalichuck siding on the Damuda Branch, East Indian Railway, in the district of Manbhum, will be put up to sale at 12 o'clock (noon), on Wednesday, the 7th August 1907, corresponding with the 22nd Srabon 1314 B.S., at the Jheria Rajbati.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

Shina Gawa Bay—Wreck in—.

No. 362 (first publication).—The British Admiralty has given notice (No. 892 of 1907) that the wreck of a sailing vessel with one mast above water lies sunk in Shina gawa bay, in a position situated 14½ cables S. 15° E. from Shina gawa lighthouse.

Approximate position, lat. 35° 36½′ N., long. 139° 45¾′ E.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Chart :—Gulf of Tokyo, No. 2657 : Also, Sailing Directions for Japan, &c., 1904, page 373.

CHINA SEA—Taiwan (Formosa) west coast.

Nan wan and Haikau wan—Particulars of shoals in—.

No. 363 (first publication).—The British Admiralty has given notice (No. 893 of 1907) containing particulars regarding certain shoals in Nan wan and Haikau wan, as follows:—

Nan wan—

(*a*) A shoal, with a depth of 3¼ fathoms over it, exists in Taihanroku anchorage, in a position situated at a distance of 1½ cables S. 25° E. from East rock. This shoal is connected to the northward with East rock, but to the southward it is steep-to, the depth increasing suddenly to 12 fathoms.

(*b*) A shoal, with a depth of 3 fathoms over it, exists in Taihanroku anchorage, in a position from which West rock bears S. 55° W., distant 3¾ cables, and Baan-rock N. 1° E. This rock is half a cable long in a north-easterly and south-westerly direction, and a quarter of a cable broad, and is steep-to.

Approximate position, lat. 21° 57½′ N., long. 120° 45½′ E.

With reference to Notice to Mariners No. 442 of 1906 (No. 199, dated 1st June 1906, issued by this office):—

(*c*) An examination of the danger given in the above-mentioned Notice shows that it is a pinnacle rock, now named Daifuseki, with a depth of about 5 feet over it, in a position situated at a distance of 3$\frac{5}{10}$ miles N. 65° W. from Nan sha light. The depths around it are irregular.

Approximate position, lat. 21° 56′ 30″ N., long. 120° 47′ 5″ E.

Haikau wan—

1. A shoal, named Tsuikinosa, with a depth of 3 feet over it, exists in Haikau wan, in approximately lat. 22° 6′ 35″ N., long 120° 42′ 10″ E. This shoal, which is about 4 cables long in a northerly and southerly direction, and one cable broad, has depths of 5 fathoms around it.

2. The undermentioned dangers have been searched for without success, and as they are unknown to the local fisherman, it is considered that they do not exist; they have in consequence been expunged from the charts:—

(*a*) The shoal, of 2½ fathoms, in approximately lat. 22° 7′ N., long. 120° 41′ E.

A depth of 19 fathoms has been obtained over this position.

(*b*) The bank of 9 fathoms, marked P.D., in approximately lat. 22° 8′ N long. 120° 39′ E.

A depth of 67 fathoms was obtained over this position.

(*Variation 1° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Formosa island and strait, No. 1968; plan of Taihanroku anchorage on chart No. 1641: Also, China Sea Directory, vol. III, 1904, pages 238, 239; and Supplement, 1907, page 58.

CEYLON—South coast.

Point de Galle harbour—Shoal in approach,—Intended buoyage.

No. 364 (first publication).—With reference to Notices to Mariners No. 302, dated 22nd June 1907, and No. 324, dated 5th July 1907, issued by this office, the British Admiralty has given further notice (No. 897 of 1907) that information, dated 4th June 1907, has been received from Commander H. B. T. Somerville, H. M. Surveying vessel *Sealark*, of the existence of a shoal, with a least depth of 22 feet over it, in the approach to Point de Galle harbour, situated in a position from which Point de Galle lighthouse bears No. 34° W., distant 5$\frac{2}{10}$ cables, and the eastern extremity of Gibbet island N. 35° E.

Approximate position, lat. 6° 1′ N., long. 80° 13′ E.

Also, the Government of Ceylon has given Notice that about the middle of November next the undermentioned buoys will be established as follows:—

(*a*) A red spherical buoy will be placed near Bloomfield rock, situated at a distance of $6\frac{1}{10}$ cables S. 50° E., from Point de Galle lighthouse.

(*b*) A black spherical buoy will be placed near Sealark rocks, situated at a distance of $5\frac{1}{10}$ cables S. 33° E., from Point de Galle lighthouse.

(*c*) A green buoy will be placed to the southward of the midships section of the wreck of the *Secundra*, in place of the two red buoys now marking the position.

Further Notice will be given when the above buoys have been established.

(*Variation 1° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Approaches to Point de Galle, No. 819; Point de Galle harbour, No. 820: also Bay of Bengal Pilot, 1901, page 85; and West Coast of Hindustan Pilot, 1898, page 83.

AUSTRALIA, EAST COAST—Coral sea.

Bellona Reef—Sand cay reported.

No. 365 (first publication).—The British Admiralty has given Notice (No. 900 of 1907) that a sand cay, about 6 feet high, and 2½ cables long, and surrounded by breakers which extend for a long line in a north-westerly direction, is reported to exist to the eastward of Middle Bellona reef, in approximately lat. 21° 21′ S., long. 159° 37′ E.

This Notice affects the following Admiralty Charts:—Pacific ocean, No. 780; Coral sea, No. 2763: also Australia Directory, vol. II, 1898, page 531; and Supplement, 1900, page 35.

AFRICA—EAST COAST.

Pungue River Entrance—Shoal reported in—

No. 366 (first publication).—The British Admiralty has given notice (No. 911 of 1907) that the Commanders of the S.Ss. *Princessin* and *Clan Macdougal* report having touched on a shoal, with a depth of 3 fathoms over it, to the eastward of the Pungue river entrance, at a distance of about 2 miles south-eastward from the black conical buoy A. From it Macuti point light bears between N. 22° W. and N. 34° W., distant about 8 miles. This shoal will be examined.

Approximate position, lat. 19° 56¼′ S., long. 34° 59½′ E.

(*Variation 15° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Delagoa bay to river Zambesi No. 648; Beira harbour, No. 1003: Also, Africa Pilot, Part III, 1905, page 224.

KOREA, WEST COAST—Chemulpho approach.

Hoku Choshisho (North Watcher) Light—Intended alteration.

No. 367 (first publication).—With reference to Notice to Mariners No. 325, dated 9th October 1903, issued by this office, the British Admiralty has given further Notice (No. 912 of 1907) that the character of Hoku Choshisho (North Watcher) light, in the approach to Chemulpho, will shortly be altered from flashing to *white fixed.*

Approximate position, lat. 37° 19¾′ N., long. 126° 28¾′ E.

This Notice affects the following Admiralty Chart:—Chemulpho anchorage, No. 1870: Also, List of Lights, Part VI, 1907, No. 912; and Sailing Directions for Korea, &c., 1904, page 57.

JAPAN—South-west coast.

Me sima—Non-existence of shoal southward of—.

No. 368 (first publication).—With reference to Notice to Mariners No. 316, dated 12th August 1905, issued by this office, the British Admiralty has given further notice (No. 914 of 1907) that a careful examination has been made over an area of some miles in extent for the shoal reported by the Master of the British S.S. *Thomas Turnbull* to exist to the south-eastward of Me sima, in approximately lat. 31° 49′ N., long. 128° 28′ E., a sounding of 107 fathoms, sand bottom, being obtained in this position.

No indication of any danger was observed, which, had it existed, would have manifested itself, in consequence of the prevalence of rough weather at the time when this search was being made; the local fishermen also appear to be unacquainted with any danger in this locality. Under these circumstances it is considered that this shoal does not exist. It has therefore been expunged from the charts.

This Notice affects the following Admiralty Charts :—Pacific, No. 2459; China sea, No. 1863; Nipon, &c, No. 2347; Amoy to Nagasaki, No. 2412; Western Coast of Nipon and Kiusiu, No. 358: Also, Sailing Directions for Japan, &c, 1904, page 588; and Supplement, 1906, page 41.

CHINA SEA—Singapore Strait.

Caution—Singapore Harbour Works.

No. 369 (first publication).—The British Admiralty has given notice (No. 919 of 1907) in which Mariners are cautioned to give the reclamation works, now in progress off Telok Ayer quay, a wide berth, as also all vessels displaying a red flag, which will be a mark to distinguish craft employed in connection with these works.

Approximate position, lat. 1° 17′ N., long. 103° 51′ E.

This Notice affects the following Admiralty Chart :—Singapore road, No. 1995: Also, China Directory, vol. I, 1906, page 243.

AUSTRALIA—Victoria—Port Phillip.

Altona shoal—Buoy replaced by light-buoy.

No. 370 (first publication) —With reference to Notice to Mariners No. 316, dated 5th July 1907, issued by this office, the British Admiralty has given further notice (No. 923 of 1907) that the project of establishing a light beacon on the extremity of the shoal extending from Altona, port Phillip, having been abandoned, the black can-buoy marking the anchorage off Altona for vessels discharging explosives will be replaced on 22nd August next by a light-buoy exhibiting a *white fixed* light.

Approximate position of buoy, lat. 37° 53½′ S., long. 144° 51½′ E.

This Notice affects the following Admiralty Chart :—Port Phillip, No. 1171b: Also, Australia Directory, vol. I, 1897, page 464; and Supplement, 1900, page 17.

PACIFIC OCEAN—The Philippine islands—Negros, east coast.

Tañon Strait—Shoal in—.

No. 371 (first publication).—The British Admiralty has given notice (No. 927 of 1907) of the existence of a shoal, awash at low water, in Tañon strait, off the east coast of Negros island, situated in a position from which Tinaogan wharf bears S. 45° W., distance 2 miles, and Bagumbayan town N. 54° W.

This reef, which is about 1½ miles long in a northerly and southerly direction, consists of numerous heads, some of which are awash at low water, whilst others have depths of from 2 to 7 feet over them, with deep water between the heads. The channel between this reef and the coast of Negros island does not appear to be a safe one.

EASTERN ARCHIPELAGO—Celebes island, east coast.

Tomori gulf and approaches—Existence and non-existence of certain shoals.

No. 352 (second publication).—The British Admiralty has given notice (No. 844 of 1907) of the existence and non-existence of the undermentioned shoals in the gulf of Tomori and its approaches:—

(*a*) Telegraph reef. This reef, originally reported in 1863, was unsuccessfully searched for in 1905, and has now again been looked for without any indication of its existence being discovered. As this danger is unknown to the natives in the vicinity it has been erased from the chart.

Approximate position, lat. 2° 10′ S., long. 121° 47′ E.

Whilst searching for this danger a shoal was found to exist in a position situated at a distance of 7 miles N. 68° E. from tanjong Bohunbelo, in approximately lat. 2° 6′ S., long. 121° 45′ E., on chart No. 361*b*.

(*b*) Tomori gulf. A reef about 1½ cables long in a north-west and south-east direction, and half a cable broad, with a least depth of 3 feet on it, exists in a position situated at a distance of 2 miles S. 2° E. from Batu island in the entrance to Tomori gulf.

Approximate position, lat. 1° 59½′ S., long. 121° 30½′ E.

At a distance of about 1 cable S. 68° W. from this reef, another reef exists with less than 3 fathoms over it.

(*c*) Tanjong Rata. Four reefs, with a depth of about one fathom over them, extend for a distance of about one mile from tanjong Rata; the westernmost reef being situated in approximately lat. 1° 35′ S., long. 122° 6½′ E., and the easternmost in lat. 1° 35′ S., long. 122° 8′ E. Between tanjong Rata and Teon depths of 10 to 12 fathoms were obtained, where the chart shows $\frac{1}{15}$ fathoms in lat. 1° 36′ S., long. 122° 6′ E.

(*d*) Peling strait. In the approximate position, lat. 1° 36′ S., long. 122° 20′ E., shown on the chart as dangerous, no bottom could be obtained with 100 fathoms of line.

The significations of dangers have consequently been erased from the Admiralty publications.

PACIFIC OCEAN.—The Philippine Islands—Sebu.

Port Sebu—amended depth over shoal—Non-existence of shoal.

No. 341 (third publication).—With reference to Notice to Mariners No. 125, dated 9th April 1904, the British Admiralty has given further notice (No. 836 of 1907) that the depth over the shoal situated at a distance of $2\frac{1}{10}$ cables S. 73° E. from Fort San Pedro lighthouse, port Sebu, is 3¾ fathoms, and not 2¾ fathoms as previously stated in the above Notice. A conical buoy, painted in black and red horizontal bands, has been placed to mark the position.

Approximate position, lat. 10° 17½′ N., long. 123° 54½′ E.

Also, that the shoal of 4½ fathoms shown on the chart at a distance of 2¼ miles S. 30° W. from Fort San Pedro lighthouse does not exist, there being a depth of 5½ fathoms over the position.

(*Variation 1° Easterly in 1907.*)

This Notice affects the following Admiralty Chart:—Port Sebu, No. 3193: Also Eastern Archipelago, part I. 1902, page 283; and Supplement, 1906, page 22.

CHINA SEA—Natuna islands.

Yong Sabal bank—Non-existence of—

No. 342 (third publication).—The British Admiralty has given notice (No. 842 of 1907) that a search has been made without success for Yong Sabal bank, Natuna islands, depths of between 34 and 41 fathoms being obtained in and around the reported position. This bank, which was put on from the Netherlands chart, but the existence of which has never been confirmed, has consequently been erased from the chart.

Approximate position, lat. 2° 57′ N., long. 107° 26′ E.

This Notice affects the following Admiralty Charts:—China sea, Nos. 2660a and 1263; Natuna islands, No. 1348: also China Sea Directory, vol. II, 1906, page 92.

EASTERN ARCHIPELAGO—Celebes island, south coast.

Salayar strait—Discoloured water reported in approach.

No. 343 (third publication).—The British Admiralty has given notice (No. 843 of 1907) that a patch of discoloured water on which there was a surf is reported to have been seen in the western approach to Salayar strait by H.N.M.S. *Siboga*.

Approximate position, lat. 5° 44′ S., long. 119° 58½′ E.

This Notice affects the following Admiralty Charts:—Eastern Archipelago, No. 941b; Makassar strait, No. 2637; Tomori gulf to Salayar strait, No. 3616: also Sailing Directions for Eastern Archipelago, Part II, 1904, page 348; and Supplement, 1906, page 18.

GENERAL SUMMARY.—Rain was general during the week, the fall being heavy in Muzaffarpur, Sambalpur, Palamau and Cooch Behar, moderate in Hooghly, Darjeeling, Manbhum and Singhbhum and light elsewhere. Transplantation of paddy is going on, but rain is still wanted in many districts for this operation. Jute and sugarcane are generally doing well. A little damage has been done by floods to paddy and jute in parts of Burdwan, the 24-Parganas and Darbhanga, and by insects in Burdwan and Nadia. In Darbhanga the number of persons gratuitously relieved in the undeclared area is 242, and in the famine area 8,667. The number of persons on relief-works is 3,080. Cattle-disease is reported from eight districts. Fodder is insufficient in parts of the 24-Parganas and Purnea. Water-supply is sufficient everywhere. The price of common rice has risen in three and fallen in thirteen districts.

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; p, passing temporary showers; d, drizzling rain.

No. 2791-L.R.—The 9th August 1907.—The following rules are published for general information :—

Rules for the Suspension and Remission of Land-revenue on account of Agricultural Calamities in Permanently-Settled Estates in Bengal.

1. In a permanently-settled area in which, under the rules of the Bengal Famine Code, test-works have been opened, a landlord may apply for suspension of collection of the revenue of any estate situated within the area in which test-works have been opened. The applicant shall give an undertaking not to collect any rents, either directly or through the medium of the Courts, from his tenure-holders and raiyats during the period for which he applies for suspension of revenue, and shall satisfy the Collector from the zamindari accounts and from such inquiries as the Collector may find it possible to make, that there are substantial current and arrear rents which have not been collected.

The Collector shall submit such applications with his recommendations through the Commissioner and the Board of Revenue for the orders of Government.

2. In a permanently-settled area in which, under the rules of the Bengal Famine Code, test-works have been opened, where the landlord is willing to remit the rent of the current year or of any portion of that year, and where the Collector is satisfied from an inspection of the landlord's accounts and such inquiry from the tenure-holders and raiyats as may by practicable, that a legal and binding remission can and will actually be made, and that due intimation of the remission will be given to the tenure-holders and raiyats of any estate, a recommendation for the remission of the land-revenue of that estate may be submitted through the Commissioner and the Board for the orders of Government.

The remission proposed shall bear the same proportion to the rent remitted as the total revenue demand bears to the rent demand.

Where rent-paying tenures intervene between the landlord and the cultivator, no remission to such a tenure-holder shall be included in the calculation unless the remission granted to the tenure-holder is extended to the cultivator in the proportion which the rent of the tenure-holder bears to the total rents of his cultivating raiyats.

3. In all cases of suspension under these rules subsequent collection of revenue and rent shall be made without interest.

4. In all cases of suspension and remission under these rules the Collector shall send the necessary particulars for each estate, and shall state the period for which suspensions and remissions are sanctioned, to the Courts engaged in the trial of rent suits.

INTRODUCTORY REMARKS.

1. IT is unnecessary to state at length on this occasion the defects which exist in respect of the courses of study followed in standards III to VI, or as regards the text-books in use in schools teaching those standards, because the subject has already been discussed in public. In General Department, Education, Resolution No. 658, dated the 7th February 1905, it was stated that the principal points in respect of which rural schools in Bengal were deficient were—

(1) that the courses of instruction were too long, too advanced and diversified; and
(2) that the prescribed text-books were not written in simple language commonly used by the people.

2. The question has been further discussed in General Department, Education, Resolution No. 1028T.—G., dated the 10th June 1907, with which the revised syllabuses for standards I and II and the arrangements made for writing suitable text-books for those standards have been promulgated. In the Resolution just referred to it has been explained that it is unnecessary, and indeed impracticable, to have separate courses of study and text-books for rural and urban schools. The Resolution therefore states that the revised syllabuses and the arrangements made for the preparation of text-books apply to schools in both rural and urban areas.

3. In paragraphs 81, 106 and 115 of my Report on Public Instruction in Bengal for 1905-06 I stated that the scheme of vernacular education, as sanctioned by Government in the year 1901, had resulted in comparatively empty lower classes in Government and aided high schools. I also stated that the effect of the system had been generally to retard the progress of vernacular education in standards III to VI. I observed that parents were anxious enough to send their children to Government and aided high schools, as soon as they were fit for entry into the classes where the medium of instruction was English, because in general the teaching in such schools was better; but that parents not unfrequently had their children educated up to that stage in privately managed schools, which were not subject to the vernacular system of education. I stated that it was hoped that the revision of the courses of study in the vernacular, which was being taken in hand, would result in modifying this anomalous state of affairs. I indicated that the defects in the vernacular courses of study followed in standards III to VI, and in the text-books used in schools teaching according to those standards, were the same as those which had been found in the courses of study followed in lower primary schools and in the text-books used in such schools.

4. As regards the teaching of English in high and middle English schools I observed, in paragraph 82 of my Report on Public Instruction in Bengal for 1905-06, that the lower classes of privately managed schools were preferred to similar classes in Government and aided schools, because more importance is attached to the teaching of English in the former schools. I stated that in Government and aided high schools English was taught as a second language in the four classes below the fourth class, in which class teaching through the medium of English begins. I observed, however, that the transition from the fifth to the fourth class was too abrupt, and that it was long before a student had any idea of what was being taught to him through the medium of English. I stated that the revision of the courses of study in classes below the high school stage was under consideration, and that this question would then be carefully considered. I indicated that possibly some system of oral instruction in English in the lower classes would be suggested.

5. In the ensuing paragraphs I give a brief account of the syllabuses proposed by the Special Committee for Standards III to VI.

THE ENGLISH SYLLABUS.

6. The Special Committee are chiefly indebted to Mr. W. W. Hornell and the Rev. J. Lamb for this syllabus. English is taught only in high and middle English schools. It is not proposed to make any change in this respect. According to standing orders the teaching of English as a second language is begun in the schools referred to in standard III, and continues till the end of the vernacular course terminating with standard VI. It is not proposed

to alter this arrangement, because it is considered that the main course of instruction up to the stage indicated is rightly imparted through the medium of the vernacular. There is however good reason for believing that sufficient attention is not paid to the teaching of English in the standards referred to.

7. In the first place, the Special Committee propose that English should be taught for eight hours a week in high and middle English schools for boys, and for seven hours a week in high and middle English schools for girls, instead of, as heretofore, for four hours only. Secondly, it is considered that if the teaching of English is to be successful, the modern developments of language teaching cannot be ignored. The Special Committee therefore propose that the teaching of English should in future be based on the principles of what is known as the "Direct Method." In the introduction to the syllabus an attempt has been made to set forth the main principles of this method, and to make a few suggestions for their application.

THE VERNACULAR SYLLABUS.

8. THE Special Committee are indebted to the Revd. J. F. Hewitt and Babu Ishan Chandra Ghose for this syllabus. The main syllabus will be applicable to all classes of schools, but in middle vernacular and upper primary schools the additional writing syllabus appended to the main syllabus will also be taught. Six hours a week will be assigned to this branch of instruction in high and middle English schools, but in middle vernacular and upper primary schools one-and-a-half additional hours will be devoted to the additional writing syllabus.

THE ARITHMETIC SYLLABUS.

9. THE Special Committee are indebted to the Revd. J. Mitchell and Babu Srikanta Karmakar for this syllabus. The main syllabus will be applicable to all classes of schools, but in middle vernacular and upper primary schools the additional *Subhankari* syllabus will also be taught. Four hours a week will be assigned to this branch of instruction in high and middle English schools, but two additional hours will be devoted to the additional *Subhankari* syllabus in middle vernacular and upper primary schools.

SCIENCE SYLLABUS.

10. THE Special Committee received much assistance in regard to this syllabus from Professors Cunningham, Mahalanabis and P. C. Ray. The syllabus contains four subjects, viz., natural phenomena, plant-life, animal-life and elementary physical science. Three of these subjects only are compulsory. In standard III these are the three first-named; while in standards IV to VI natural phenomena and plant-life are compulsory, a choice being allowed for a third subject between animal-life and elementary physics. The treatment of the first three subjects follows that adopted in respect of these subjects in the syllabus for the lower standards already published. Two hours a week will be devoted to this branch of instruction.

THE HYGIENE SYLLABUS FOR BOYS' SCHOOLS, AND THE HYGIENE AND DOMESTIC ECONOMY SYLLABUS FOR GIRLS' SCHOOLS.

11. THE Special Committee are indebted to the Rev. J. F. Hewitt, Professor Mahalanabis, and Rai Jhuni Lal Bose Bahadur for the hygiene syllabus for boys' schools, and to Miss Brock for the hygiene and domestic economy syllabus for girls' schools. These subjects will be taken as part of the science course, to which two hours a week will be devoted, as indicated in the last paragraph.

THE HISTORY AND GEOGRAPHY SYLLABUSES.

12. THE Special Committee are chiefly indebted for these syllabuses to Professor J. N. Das Gupta and Mr. Arden Wood, respectively. Two hours a week will be devoted to each of these subjects.

THE DRAWING SYLLABUS.

13. THE Special Committee are indebted for this syllabus to Miss Brock, Miss Dyson and Miss White. Two hours a week will be devoted to this subject.

THE GEOMETRICAL DRAWING AND EXPERIMENTAL GEOMETRY SYLLABUS.

14. THE Special Committee are indebted to Mr. Küchler for this syllabus. This subject will be taken in schools for boys only, and one hour a week will be devoted to it.

THE MENSURATION SYLLABUS.

15. THE Special Committee are indebted to Mr. Küchler for this syllabus. This subject will be taken in middle vernacular and upper primary schools for boys only, and one and-a-half hours a week will be devoted to it in such schools.

DRILL.

16. No syl[illegible] is required. One hour a week will be devoted to this subject. This subject will be o[illegible] in girls' schools.

MANUAL WORK.

17. THIS subject will be taken in middle vernacular and upper primary schools; and it will be optional. No syllabus will be prescribed for it, but work will be done according to any syllabus approved by the Inspector of the Division. If this subject is taken, three hours a week will be devoted to it.

THE NEEDLE-WORK SYLLABUS.

18. THE Special Committee are indebted to Miss Brook, Sister Mary Victoria and Miss Dyson for this syllabus. In high and middle English schools for girls, seven, instead of eight, hours a week will be allotted to English, while geometrical drawing and experimental geometry will not be taken. The two hours thus set free will be assigned to needle-work in such schools.

SCHOOL GARDENING.

19. THE instructions given in the "Note on School Gardens," which is appended to the syllabuses for the Infant section and standards I and II for both boys' and girls' schools, and of which a copy is given at the end of the syllabuses now submitted, will apply equally in the case of schools teaching standards III to VI.

LIST OF DISTRIBUTION OF HOURS.

20. I SUBMIT in the form of a statement a list of distribution of hours both for boys' and girls' schools according to the proposed syllabuses.

A. EARLE,

Director of Public Instruction, Bengal.

The 20th June 1907.

SYLLABUS OF STUDIES FOR STANDARDS III TO VI.

INTRODUCTION TO THE ENGLISH SYLLABUS.

1. THE object of teaching a foreign language to children at school—and to the great majority of Indian children in Bengal English is a foreign language—is to put them in possession of that language. To possess a language, one must be able to understand it when spoken, and speak it so as to be understood, understand it when read, and read it so as to be understood, write it idiomatically and correctly, and as a crowning accomplishment translate it into the nearest possible equivalent, which the foreign language affords. Language is based on speech, and a child learns its mother-tongue by actual situations giving rise to actual wants and occasions of conversation.

2. The system which recognizes these principles and bases its processes upon them is known as the "Direct Method," and the fundamental principle of this method is that the essential condition of acquiring a language is the acquisition of what the Germans call *Sprachgefuhl* that "instinctive tendency towards correct idiom," which in every language is far more important than grammar as a determining factor in its growth, and as an arbiter in questions of taste. The acquisition of a foreign language has been defined as the translation of experience into that language, which means that in teaching a foreign language the teacher has to establish an entirely new set of associations with the pupils' accumulated stock of experience, or in other words that it is with the pupil's mental representations and not with his linguistic expression of them that the new linguistic forms have to be connected. The object of the method is to build up an entirely new *Sprachgefühl* by reproducing in the pupil as far as possible the process which builds up in him his *Sprachgefühl* for his mother-tongue. It insists that a foreign language ought to be learned as nearly as possible in the same way as that in which a child acquires his own vernacular.

3. The adoption of the principles of the direct method means that in the future the key-note of the teaching of English to Indian children in Bengal must be the attempt to reproduce the process by which a child acquires his own vernacular; and the first practical conclusion which may be deduced from these premises is that an Indian child's first step in English must be the within the range of his most familiar experience. The teacher should open the campaign with sentences corresponding to actions on his part. The class sees what he is doing, and repeats the words after him. This soon leads on to question and answer, and before long conversations can be held with the class. In these stages the vernacular should be avoided as much as possible, but it need not, and indeed should not, be absolutely interdicted. Repetition of phrases learnt should be habitually practised, and when they have become part of the children's mental equipment, the teacher should begin to note these phrases on the black-board, taking care to select those which are most familiar. At this stage the children should never be told that such and such a symbol represents a certain English sound, nor should they be asked at this stage what the sound of a word is. They should be told that they are going to learn how a certain word, which they know, is written, and the peculiarities of its orthography should be introduced to them.

4. As regards grammar, the principle on which the reformed method insists is that it should be taught inductively, and applying this principle to the earliest stages of linguistic teaching on the lines proposed, it will be easily apparent that it is not difficult to arrange the teaching in such a way that, while the pupil thinks that he is merely performing or seeing performed a series of actions, he will in reality be learning the chief forms of the verb. The pupil will thus from the first be learning as it were his grammar in the concrete. As soon as a number of forms have been assimilated, he may be made to classify them, and thus to induce the main rules of conjugation and concord to be used henceforth as tests of grammatical accuracy to be applied to the English expressions which *sense experience* calls up. The chief means of assimilation under the direct method is the reproduction of the foreign expressions associated with *sense experiences* without the intervention of the mother-tongue.

5. It cannot be too strongly emphasised that the direct method does not, as was at one time erroneously supposed, ignore the importance of grammar or even leave it to soak in of itself, as it does largely in the case of the mother-tongue. On the contrary grammar teaching and grammar drill are really integral parts of the system, and it is probably not an exaggeration to say that the method ought, if it is properly worked, to make ungrammatical speaking or writing almost an impossibility. This is clear when one compares the processes of the direct method with those of the old grammatical method. Under the old method the first thing put into the pupil's brain was an abstract grammatical scaffolding. Abstract logical processes presided over the translation, both from and into the foreign language, the consequence being that the sense was often neglected, if not completely sacrificed. Indeed, when translating into the foreign language, the final foreign product built up bit by bit like a mosaic was barely tested, as a piece of original composition in that language would be, the whole interest lay in the process of building and the finished product as a whole was scarcely regarded. The direct method advances more slowly, but at every stage the pupil is fully equipped to express himself within his limits, "concrete" grammar having developed in him the habit of applying grammatical tests, as he goes along; whereas under the old system, after mastering the application of rules in isolated sentences, the pupil came to the transition to connected pieces, and any one who has taught composition in this way knows how long and laborious this transition is. It is easier to awaken a child's interest in *sense* than in *grammar*. It is easier to teach him correct expression by teaching him *grammar* through sense than by teaching grammar first by itself (or rather through nonsense sentences) and then making him apply the rules learnt to *sense*.

6. We have in fact two pitfalls to avoid, on the one hand the neglect of *grammar teaching* and *grammar drill* under the new system, on the other hand the continuance of the isolated, formal teaching of grammar which now prevails. The new ideal bids us teach grammar, as far as possible, in a *concrete* or living form, not merely for the purpose of "inducing" the laws of accidence and syntax, but above all—and this is the novelty—for the purpose of teaching before such induction the particular forms in detail, and for the purpose of drill after induction. It is evident that the habit of *direct association* must tend to make the application of the above laws instinctive from the beginning, for the *direct association* enables the child to dispense with most of the analysis which according to the old method was necessary before he could construct correct expression. It makes all the difference whether a child, when the class are opening their books, says to himself spontaneously "we," it immediately occurring to him that "we" is followed by "are" or whether he reasons as follows: "we" personal pronoun, first person, plural, therefore the verb must be, etc. It is not at all the same thing whether, when a child is told to put a story into the past as told by one of the actors in it, he *visualises* the whole thing as done by himself this day last week or a year ago, and thus evokes a series of "I did," "I went," "I said," in answer to successive questions "what did I do then," or whether he reasons either in the vernacular or in English, "these verbs must be put into the past tense because it it is spoken narrative." In fact the direct method introduces what amounts to a re-classification of the grammatical facts of language based on frequency of use, and even the inductions from these classifications should be presented, at first, whenever possible, in *concrete* form. It is perhaps unnecessary to add that only such inductions are advisable as are likely to prove of practical help to the pupil as a test of the correctness of the foreign expression evoked by the *sense memory*. The object is not to put the pupil in possession of a complete grammatical scheme of the language.

7. The conclusions which seem to follow from these premises are: (*a*) that in the elementary stage the teacher must use as his instrument for teaching and driving home the main facts of grammar that which make the deepest impression on the sense memory, viz, the process of describing actual objects or pictures of objects, and that of expressing actions actually performed, seen, foreseen or remembered; (*b*) that, later on, when the habit of *visualisation* has taken the place of the actual *sense experience*, and object-lessons and action series have given place to graduated short stories as the centre of study, these should be the vehicles for inculcating further essential points of grammar, which will thus, until they become part of the pupil's common or so to speak automatic stock of grammatical knowledge, be associated by a definite context, itself secured by *direct association*. Exercises for the practice of special grammatical points are indispensable, but they must be based on familiar material, so as never to lose the support of *direct association* and the element of *reality*.

They must, moreover, be presented in the most concrete form possible. As an example of how this principle may be carried out in practice, it is suggested that to exercise a pupil in the rules of concord, he might be told to re-write a story with which he is well acquainted, as if there were two actors instead of one, or, as if the hero was a woman instead of a man, or, as if the hero was telling the story himself. The point to be emphasised with reference to such an exercise is that it presents itself to the pupil, not as a mere formal exercise in grammar, *but as modification of the mental representation* which the text calls up, a modification which demands another linguistic form. As such it has the invaluable advantage of combining the exercise of common sense with the application of grammatical tests. In such an exercise the pupil begins to feel a new power, for he is in some small measure creating.

8. The English readers which the reformed method requires present a problem of no small difficulty. In Germany where the direct method is followed most consistently, especially in connection with the teaching of English, the great majority of the English readers in use aim at being distinctively English in every way. Their object is to bring before the minds of the children the *Realien*, the actualities, of English life. According to these text-books the English lesson is not only to be conducted in English, but it is to be about England or something distinctively English. The very atmosphere of the class rooms is to be as English as possible, and great importance is attached to having the walls decorated with maps and pictures of England and things English. It has been decided that it is impracticable to attempt to bring home the actualities of English life and English environment to Indian children, but the advantage of giving English teaching an English setting is apparent, and should not be lost sight of. In this connection the value of pictures not only as affording explanations, but also as providing topics of conversation, may be emphasised. The supreme test, however, as to whether a reader conforms to the spirit of the direct method or not, is the extent to which the matter which it contains is such that it can enter into the experience of the children, that they can *visualize* it. In the earliest stages of language study it is the *sense experience* which calls up the foreign expression connected with it. When it is necessary to transcend the limits of *sense experience*, the same principle holds good, only *visualization* takes the place of actual *sense experience*. The acquisition of the foreign language is still the translation of experience into that language.

9. It remains to define the function of translation in the new system. Here again the root principle of the direct method must be applied, viz., that *direct association* is the all important aim. The result of this application is clear. No translation exercise should be allowed which is not a "translation of experience." Translation should only be attempted of such English passages as the pupil understands in that language, and such tests are really exercises in the style of the vernacular. As such they should be made use of from an early stage, but not too frequently.

10. What has been said above applies to translation from English into the vernacular, but as regards translation from the vernacular into English the same principle holds good and the practical conclusion which follows from the application of the principle is that translation of this kind must not be attempted until the pupil has such a command of English that he would be able to produce the English version as a piece of original composition in that language. The process should be—(*a*) free composition, (*b*) re-translation, and (*c*) translation from the vernacular into English. Even re-translation should not be attempted too early. The habit of *direct association*, *i.e.*, of thinking in English, must be firmly established in Indian children, or the presence of the vernacular words will interfere with the association.

THE ENGLISH SYLLABUS.

STANDARD III.

Conversational lessons.—Four hours a week should be given to conversational lessons, the topics of which should always be within range of the children's most familiar experiences. On the principle that the child is to learn English by the same process as that by which he learnt to speak his own vernacular, it is advisable that the earliest sentence which he should be made to repeat should deal with himself, his own actions or possessions, and should be couched in the first person. When a certain capacity of thinking in English has been acquired, then the child should be led to think about others in English, and so to use verbs in the third person. In this class the topics of conversation must always be concrete objects. When a child reaches the stage of beginning to talk, he has a name for everything which he sees, touches, hears or handles, but he has no words for abstractions. He always connects the word and its concrete object. Similarly in teaching a child a new language the process of mental translation is totally superfluous. In a class which knows no English at all the teacher has only to hold out his hand and say "hand," each child will stretch out his hand at once and say "hand." In doing this the child has connected the object and the name. The introduction of the vernacular interferes with the direct association, and consequently it should as a general rule be avoided. To start with, a teacher must act all he says, for then the children will be aided in their acquisition of English by imitation, this being precisely the process by which a child learns his mother-tongue. The English sentence or phrase arrived at by this process should be constantly repeated, and it should

also be noted on a black-board, and as soon as possible made use of for the purposes of composition.

Composition.—To start with, composition should be oral, but there is no objection to the children doing written composition as soon as they can write English characters with any facility. The writing of English characters will, however, in most cases have to be taught in this class, and consequently it will probably not be advisable to attempt written composition until about half-way through the year. As soon as the children can write English characters, they should be taught to transcribe the words and sentences which have been noted on the black-board.

Reading and repetition.—About half-way through the first year, by which time the children should have mastered the English characters, they should be introduced to a simple reader. These readers should deal with the same kind of topics as those which should form the subjects treated in the conversational lessons. The reader should also contain pieces of poetry for repetition. These pieces to start with at any rate should be connected with the topics of the conversational lessons. They should always be taught to the children with the appropriate gestures which the children should reproduce when repeating the words.

Grammar.—Grammar should be taught inductively from the first on the lines prescribed in the introduction. The verb should be the starting point, and drill in the rules of concord and conjugation should be the earliest grammatical exercise. The functions of the other parts of speech should also be arrived at inductively, but it must be remembered that the object of teaching grammar is to inculcate correct speaking and correct writing, and that just as children should be taught from the first to speak in complete English sentences, so they should not be taught to consider parts of speech as objects isolated from speech. The grammar drill in this class should be confined to simple affirmative and negative sentences.

Pronunciation and expression.—Great importance should be attached to the correct pronunciation of English, and to reading clearly, intelligently and with expression. The reader in this and other classes should contain general directions as regards the pronunciation.

The reader.—The reader should contain about 50 pages of prose and 14 pages of poetry. It should contain general instructions regarding the teaching of grammar, but these directions should not be regarded as being in any way exhaustive.

STANDARD IV.

Conversational lessons, composition, grammar, spelling and orthography.—Four hours a week at least should be given to conversational lessons, the teacher leading the children to translate their experiences through an everwidening medium of English expression. The children should also be led on to compose freely both orally and on paper, these exercises being also made the vehicle for grammatical induction and grammar drill, as also the means of teaching orthography and punctuation.

Repetition.—English poems should be learnt and recited, the range of selection being widened with the child's increasing power of *visualization.*

Reading.—English reading should be regularly practised, great care being taken as regards pronunciation, emphasis and expression.

Translation.—As an occasional exercise, the children should be made to translate into the vernacular passages of English which they have gone through during the reading lessons, or even pieces which are the results of recent composition lessons.

Dictation.—The children should be made occasionally to take down at dictation short passages of English which they have recently gone through.

The reader.—The reader for this standard should contain about 100 pages of prose and 28 pages of poetry.

STANDARD V.

Conversational lessons, composition, grammar, spelling and orthography.—Four hours a week at least should be given to conversational lessons, the aim of the teacher now being to do less of the talking himself and to make the children do more. Oral and written composition should be continued, this work as well as grammar exercises and grammar drill being centred round the conversational lessons.

Reading and poetry.—With their increasing power of *visualization* in English, the children's reading may be extended, and the reader of this class should include easy selections from English classics. English poetry should still be regularly learnt by heart and repeated. The desirability of acquainting the children with some of the easier master-pieces of English prose and poetry should now be definitely kept in view.

Translation.—Translation into the vernacular of English passages which are well known to the children should be continued, and translation from the vernacular into English should now be begun.

English dictation.—This should be regularly practised.

The reader.—The reader of this class should contain 150 pages of prose and 42 pages of poetry, but it is not desirable that the class should be confined to the reader.

STANDARD VI.

Conversational lessons, composition, grammar, spelling and orthography.—Four hours a week should at least be given to these lessons, which should be conducted in the manner prescribed.

English dictation.—This should be regularly practised.

Translation.—Translation from English into the vernacular and from the vernacular into English should also be regularly practised in this class.

English reading and poetry.—English reading should be continued, and good English poetry should be regulary learnt by heart and repeated, but both in the reading and in the poetry work the object should now be to introduce the children to what is really good in English prose and verse, subject always to the proviso that what is to be put before them is not beyond their powers of *visualisation*. The English reader used in this standard should contain 200 pages of prose and 56 pages of poetry, but the reading of this class should not be confined to the class reader. The English work which is done in class should be supplemented by the intelligent use of a good school library. Good English books which are likely to appeal to the children should be read out in class. As regards the recitation of poetry, it must be insisted upon that the children should always be made to recite one by one, and that neither in this nor in any other standard should simultaneous recitation by a number of children be permitted.

INTRODUCTION TO THE VERNACULAR SYLLABUS.

1. There is a general complaint that the text-books in the vernacular at present prescribed for Standards III to VI are a little too difficult, especially for boys reading in High Schools. It cannot be said that the present books are more difficult than those read for the Upper Primary and Middle Scholarship Examinations before the introduction of the new scheme of vernacular education. But in those days children in High Schools, who are generally of a lower age than those in the corresponding stages of Middle and Primary schools, were not compelled to read the same text-books that were appointed for the latter. So far as secondary schools are concerned, Standard VI has long marked the end of vernacular education in this country; but under the new University regulations, a considerable knowledge of the candidate's own vernacular will ere long be required for the Matriculation Examination. Standard VI, therefore, instead of being the finishing stroke of a student's knowledge of the vernacular, will now rank only as a stage in his onward progress, four years behind the matriculation goal. The time has come, therefore, when a somewhat less ambitious but more popular and efficient syllabus may be advantageously laid down for the lower forms, relegating the study of higher literature to the last four years of the High School curriculum.

2. *Literature.—how to be taught*—It is beyond the scope of the present note to deal exhaustively with this important subject, its proper place being in a treatise on the Art of Teaching. But a few hints for the consideration of teachers will not, it is hoped, be altogether out of place. The plan generally followed in this country is to make the class read the daily lesson, one by one, and ask the boys to give the meaning of words, which they do by means of synonyms often much more difficult than the original words themselves. The explanation of passages is equally unsatisfactory, the teachers and boys alike following the practice of simply substituting one word for another, a practice which has been hallowed by centuries of use in the elucidation of Sanskrit text. It has become the more inveterate owing to the extensive use of a host of very pernicious keys, the writers of which do not blush to offer *solila* in explanation of *jala* (water) and *briksha* or *taru* in explanation of *gachh* (a tree).

The first steps towards reform, therefore, must be in the matter of explanation. It is not enough that the boy knows the synonyms for a word; he must know the thing itself, what it actually denotes and connotes. He may use ten words, if necessary, in explaining the meaning of a single word. In respect of sentences, too, no word for word substitution should be allowed, the chances being that both the teacher and pupil will use in such explanation words more unsuitable than those used by the author. Another method which may lead to the same end, and which is recommended for adoption, is to require the pupils to read a passage silently for a time and then to give its purport one by one.

Reading aloud also should be strictly attended to. It is often found in Indian schools that the boys, those of the upper forms not excepted, read very badly in a sort of whining sing-song tone without the least regard for stops and emphasis. The articulation should be clear and distinct and the tone natural, so that from the very manner of reading the meaning of the passage may be at once apparent. Recitation of good poems at least twice a week should be a regular part of school work.

3. *Composition.*—The reproduction of stories read out by the teacher from the text and other books should be continued up to Standard IV. In the oral work each boy should be required to reproduce the entire story, his fellow students being encouraged to challenge him whenever he deviates from the proper sequence of incidents or makes mistakes in grammar, idiom or pronunciation. The written work may be either in the shape of a home task, or, what is decidedly better, a black-board exercise, one boy being required to begin the story, another adding the next sentence and so on, till the whole is done, the work of correction going on simultaneously as in oral composition. Experience has shown that this system possesses an advantage over others, so far as children are concerned, as it calls forth a keen spirit of healthy rivalry, enables the teachers to detect mistakes at once and to point them out to the whole class and leaves little room for prompting or help from outside.

In Standards V and VI, oral composition may be discontinued, and subjects, in dealing with which greater intelligence is needed, may be cautiously introduced. Natural phenomena, objects and animals described in the text-books or about which the boys may easily collect materials from ordinary books of reference, historical events and such simple abstract ideas as truth, honesty, kindness, kindness to animals, &c., may be selected as topics for composition. "The boys must be taught first to think carefully of the subject so as to see what are the questions and considerations to which it most naturally gives rise, and to be able to arrange what they have to say according to some definite plan. They should then write down the main heads, so that, as various ideas about it occur to the mind, they may be arranged, each under its own head. An outline thus drawn up will be a necessary preliminary to ensure a logical and connected treatment of a subject, and to avoid needless repetitions or confused mingling of different views. The main division of the subject and the general facts appropriate to each having thus been written down, illustrations should next be collected. These may be noted down in brief to be enlarged and made complete when they are reached in the course of writing out the essay." For essays to be written at home, the boys should be directed to begin by filling in the outline, so that the subject may be dealt with more exhaustively than is possible at school, where perhaps only half-an-hour or an hour at the most will be allowed for the purpose. At first, of course, the teacher himself will help the boys in drawing up the outline. Care should be taken that a separate paragraph is devoted to each head of the outline. Perspicuity and correct expression are the main points to be gained.

4. *General.*—Finally, it is necessary to point out that no boy can be expected to master the literature of his country, if he does not feel an interest in reading the books written by the best writers. The prescribed text-book, however carefully compiled, is but a small fragment of a great edifice, the whole of which the learner must be encouraged to look at and appreciate. The teacher, therefore, who rests satisfied with explaining the text-book only has but a very poor idea of his duty. He must create in his pupils a strong desire to read good books outside the school curriculum. He must have his library well stocked with such books and see them freely borrowed and perused by the boys, each according to his own capacity. The quantity of good juvenile literature is daily increasing, and with departmental help, may be further improved. A boy in Standard III will find the Kirthibasi Ramayan and Kasidasi Mahabharat at once interesting and instructive. Selected tales from the Arabian Nights, Æsop's Fables, the Hitopodesa and similar works will, it is certain, be appreciated by the pupils, if only they are brought to their notice and made accessible.

VERNACULAR SYLLABUS.

A.—STANDARDS III AND IV.

I.—THE READER.

1. The prose and verse reader will contain about 160 pages (double crown, 16 mo. in pica) and will be divided into two parts, thus:—the first part for Standard III with 65 pages of prose and 15 pages of poetry; the second part for Standard IV with 65 pages of prose and 15 pages of poetry.

2. The prose portion in each case to consist of—(i) character sketches from Indian History illustrative of such virtues as honesty, fidelity and so on; (ii) short lives of famous men—Hindus, Muhammadans and Christians; (iii) moral tales; (iv) word pictures of historical and natural scenes or phenomena, such as some great famine, battle, cyclone, earthquake, a waterfall or a mountain scene; (v) natural history sketches relating to Indian fauna. Subjects (iv) and (v) will be given in part II of the reader.

3. The poems should be such as are likely to appeal to the children's feelings, and impress upon them in the most striking manner the beauty of truth, honesty, self-sacrifice, devotion and other moral virtues. Those of a purely didactic nature would be the best suited to the purpose; but a good translation of Sanskrit and Persian verses which generally inculcate such virtues by metaphors or similes might be made use of to some extent.

4. The matter may be either original composition or extracts from standard writers The latter course is especially recommended in the case of poetry.

5. The style throughout should be simple, chaste and terse, free alike from archaism and provincialism. It is not the difficulty of a word or words that makes a passage hard to understand, but the vague and abstract nature of the ideas. But all manner of bombast should be avoided, and not a word or sentence used which is not necessary. Paragraphing must be on a strictly logical basis.

6. Suggestive questions arising out of the subject-matter and grammar of the text, and on word-building, should be appended to each lesson. These need not be exhaustive, the object being merely to help the teacher in framing other similar questions himself.

II.—GRAMMAR.

7. No text-book in grammar need be prescribed for Standard III, in which the aim should be to teach it inductively. The pupils should be taught the parts of speech—

nouns, pronouns, adjectives and verbs. The teacher should begin with skeleton sentences showing the two essential parts, the subject and the predicate, and lead the pupils on to the noun and the verb. Later on the classification of nouns, adjectives and verbs, their inflection, and the elementary principles of forming compounds and of the combination of words, should be explained, and attention paid to the formation of different words from the same stem.

8. An elementary text-book in grammar of about 32 pages should be prepared for Standard IV, dealing with the subject inductively as before. It should begin with the structure of a sentence, and show how sentences are enlarged. It should then deal with grammar proper under the following heads :—

(*a*) Nouns.—Gender, Number, Case.
(*b*) Pronouns.
(*c*) Adjectives.—Comparison, adverbs, inflections, for gender.
(*d*) Verbs.—Their classification, tense. Causative verbs.
(*e*) The Indeclinables. Combinations of sounds (Sandhi). Only the chief rules with familiar illustrations.
(*f*) The formation of compounds (Samasa); the elementary rules with familiar illustrations. The compounds to be explained on a logical plan.

9. At the Scholarship Examination about one-fourth of the questions should be set from some simple unseen book or books. The passages set should be free from obscure allusions.

B.—STANDARDS V AND VI.

I.—THE READER.

10. The prose and verse reader will contain about 200 pages (double crown, 16 mo. in pica) and will be divided into two parts, thus :—first part for Standard V with 75 pages of prose and 25 pages of poetry; the second part of Standard VI with 75 pages of prose and 25 pages of poetry.

11. The reader should be compiled much on the same lines as those recommended for Standards III and IV, but the range of subjects should be more varied.

II.—GRAMMAR.

12. A text-book of about 60 or 70 pages, dealing with the subject more elaborately and including *krit* and *tadhhit*, will be prepared. The requirements of the vernacular should be steadily kept in view.

13. As in Standards III and IV, candidates for scholarships should be asked to explain unseen passages which may contain allusions such as they are expected to know from the prescribed text-books.

GENERAL REMARK REGARDING WRITING.

Ordinary hand-writing will be taught in all the standards (III to VI).

ADDITIONAL WRITING SYLLABUS FOR MIDDLE VERNACULAR AND UPPER PRIMARY SCHOOLS.

In middle vernacular and upper primary schools the following additional writing syllabus will be taught :—

Standard III.

Writing letters and applications to different persons in appropriate terms of address páttás and kabuliyats.

Standard IV.

Writing of chittás, khasrás and khatiáns, simple bonds; jamákharach, postal forms.

Standard V.

Jamábandi, rokar, chálán, mahájani khasrá, rokar jamákharach, khatián hisáb-báki; rent receipts and other receipts.

Standard VI.

Zamindari shehá, thoká, different kinds of bonds and kabálás or deeds of sale, mortgage deeds, zamindári jamákharach, hundis.

ARITHMETIC SYLLABUS.

Standard III.

Revision of four simple rules (with English figures).
Teaching of four compound rules (with English figures).
Simple problems involving the application of the above rules (including simple reductions based upon the ordinary current measures, weights and coinage).

Standard IV.

Revision of the four compound rules (with English figures) involving more difficult problems.

G. C. M : L. C. M.

Simple fractions (first four rules), and simple problems involving their application.

Standard V.

Easy complex fractions of the type $\frac{5\frac{1}{7} \text{ of } 2 \times \frac{7}{4}}{7\frac{1}{7} - 3\frac{1}{4}}$

Simple reduction of fractions.

Elementary ideas of terminating decimals.

Addition and subtraction of terminating decimals.

Simple practice ; simple bills.

Simple problems involving "Unitary Method," corresponding to *direct* questions in "Rule of Three."

Standard VI.

Fractions (completed).

Terminating decimals (completed).

Problems involving "Unitary Method," corresponding to *inverse* questions in "Rule of Three."

Practice (completed).

Square roots of integers and terminating decimals.

Note 1.—Mental arithmetic should be taught in each of the above classes.

Note 2.—In working out sums, great attention should be paid to neatness and the accuracy of working, and all the various steps in the processes involved should be correctly written. In awarding marks for sums, the above points should be taken into consideration.

ADDITIONAL ARITHMETIC SYLLABUS FOR MIDDLE VERNACULAR AND UPPER PRIMARY SCHOOLS.

In middle vernacular and upper primary schools the following additional arithmetic syllabus will be taught:—

Standard III.

Tables of apothecaries' and jewellers' weights and of time, length and area; reduction; the four compound rules according to the country method, and simple problems arising from them.

Standard IV.

Harder problems involving the first four compound rules; *karikasá, mankasá, serkasá, másmáhiná, batsarmáhiná.*

Standard V.

Revision of the work of Standard IV, *sonákasa, sudkasá, bátákasá.*

Standard VI.

Bighákáli, káthakáli, kátkáli, footkáli, jamábandi nitankali, and problems in the unitary method.

SCIENCE SYLLABUS.

STANDARD III.

Natural phenomena.—Continually greater stress should be laid on the keeping of a calendar in which all observed natural phenomena should be recorded. Now that the children are supposed to have learned to write, they may be asked to bring written records of their individual observations. All such observations should be recorded, and possibly the name of the individual observer, in order to endow the calendar with particular interest. No effort should be spared to give it a permanent character, and it should be shown to, and initialled by, inspecting officers. Special attention should be given to meteorological conditions, and a school observatory might gradually be begun. The points of the compass must be discovered by observation of the sun. Each succeeding class must do this for itself independently, by erecting a vertical stick on a carefully flattened and smoothed portion of the school compound, and marking the shadow of its end at different times of the day. Having thus discovered the south, the other points of the compass should be marked on the ground and named. Then the position of the sun at rising and setting must be marked down every day, or noted particularly once a week, so that its gradual seasonal change may be noted. The varying height of the sun at noon should also be observed and noted. Thus a sun-dial is constructed and its uses explained. When the apparent motions of the sun are thoroughly known, they may be contrasted with those of the moon whose regular study is however rendered difficult by its irregular hours, and it should perhaps only be attempted by school-masters who can arouse such enthusiasm that the children

will volunteer to take turns at evening and early morning observations, and then relate the results to their class-fellows; these results should always be recorded in the calendar. The direction and force of the wind should be noted with the help of a streamer attached to a tall stick, and a locally made rain-gauge kept, and the collected rain measured in the presence of the whole class. All these measurements—especially those connected with observations of the sun—will serve as practical illustrations of elementry geometrical drawing and measurement. The children's preparation for the study of physical science should take the same direction, viz., a careful training in the elements of measurement. Measurements of the length of straight and curved lines—*every child* being provided with a foot ruler marked with scales of inches divided along one edge into 10ths and along the other into 16ths. Measurements of areas and volumes *by every member of the class.*

Plant Life—The idea that plants are living objects should be impressed on the minds of the children.

Plants take food, they drink water, and they breathe air. They die when the supply of any of these is cut off. Sunlight is also essential to the life of plants. Green plants when deprived of light become pale and sickly, and eventually die.

Plants grow in size: some slowly, others very rapidly. Some attain enormous size; some are tall, while some are spreading; some creeping, while others climbing.

Some plants live only for a season; some for two years, and others live for several years.

Animal life.—Difference between a vertebrate and an invertebrate animal, as illustrated by comparing the wings, legs and body of a bird with those of a butterfly. Animals without a backbone, as a snail, a bee, a milliped and a leech, compared with a fish.

Mode of life of ants and bees.

STANDARD IV.

Natural phenomena.—In Standard IV the class calendar should be maintained with increasing richness of detail. The observations of Standard III may be repeated with greater accuracy.

At the beginning of the rains a few cart-loads of earth (or sand where available) mixed with a few stones or bits of broken pots should be heaped up in a corner of the school compound and surrounded by a fence for protection. The gradual weathering of this heap of earth into landforms, mountains and valleys should be observed and noted, the actual work of denudation being specially watched during heavy rain, etc. The binding action of grass and other quick-growing plants in holding together portions of the clay should be noticed. Locally suitable variations and additions to this model landscape will occur to the individual teacher, and should be encouraged as circumstances require by individual inspecting officers. The action of rain and sun on roads, etc., should also be observed.

Plant life—Stems.—Observe the different characters of the stem in *trees, shrubs* and *herbs.*

Note how *buds* arise in the axils of leaves.

Leaves.—Study colour, form and general characters of foliage-leaves.

Make a collection of leaves of familiar plants and examine their varied forms, etc., some are scented, some have a strong taste, some are smooth, other hairy. Some leaves are sensitive to touch, some close at night.

Flowers.—Study the colour, form and different parts of typical flowers. Sepals are usually green and form the protective part, while petals are usually of bright colours and form the most attractive part of flowers. Count the number of these structures in individual flowers.

Fruits.—Out of the flower comes the fruit, containing the seeds. The sepals and petals usually fall off when the fruit is formed. Some fruits are succulent, some hard, others box-like and let out seeds by opening. Seeds give rise to new plants.

Animal life.—External appearance and mode of life of tadpoles and frogs.

General characters of reptiles illustrated by simple descriptions of structure and mode of life of the crocodile, the tortoise and the snake.

General characters of birds.

The pigeon—a type of flying bird compared with a running bird, *e.g.*, the ostrich.

Elementary physical science.—Repeat measurements of length, area and volume. Set before the class some heavy weight which, after individual attempts, it will be found impossible to move by direct lifting. The object is then to find some means by which even the smallest member of the class shall be able to lift the weight. Experiments with levers leading up to the discovery of the "principle of the lever." The simple balance. Weight—All bodies have weight. Definition of matter as that which has weight. Weight per unit volume. Relative densities—specific gravity. Centre of Gravity. Illustrations of balance and equilibrium. Local illustrations of different kinds of levers—the *ढेंकी*, scissors, the oars of a boat, etc.

Note that bodies appear to lose weight when immersed in liquids. Set out to discover the law of this phenomenon. Discover the principle of Archimedes. Show its application to the determination of relative density of liquids. A short biography of Archimedes will be included in the literary reader.

STANDARD V.

Natural phenomena.—A continuance of the calendar with still further increase of detail to be required from each child as home work, *e.g.*, the clouds, their form, height and motion. Observations of the moon, its motions and phases. A simple model to illustrate the motions of the earth and moon round the sun may be constructed.

Plant life.—Life history of a plant :—

Examination of the parts of a seed. Germination of seeds (*e.g.*, *matar* or *shim*) : study the behaviour of the radicle and the plumule. Function of the cotyledons. Growth of the seedling. Examination of the parts of the seedling : root and shoot.

Functions of the root, stem and leaves.

Sources of food of ordinary plants—soil and air.

The mutual help of insects (*e.g.*, ants) and plants.

Animal life.—Simple facts regarding general characters of mammals.

External characters of some familiar examples of the order ungulate (hoofed animals). The stomach of a goat laid open and examined—the four chambers—the construction of the stomach suited to the habits of the animals which chew the cud.

Dentition of a ruminant and a rodent compared.

Elementary physical science.—A recapitulation of the principle of the lever. Reminders about weights and weighing. Pulleys—systems of pulleys. Our object being again to find other means of lifting heavy weights, we set about discovering the "principle of the inclined plane." Experiments with inclined planes. Wedges. Screws. Discovery of the general law connecting "power" and "weight" for all simple machines. Parallel forces. Weights as systems of parallel forces. Equilibrium among parallel forces. Forces in one plane acting on a point. The parallelogram of forces. Composition and resolution of forces.

Fluid pressure.—Pressure inside a liquid—equal in all directions. Comparison of pressures and densities in different liquids. More complicated problems of specific gravity. Further flotation experiments.

Change of position. Rest and motion. Time—sand-glass—water-clock. Rate of change of position—speed or velocity. Other changes—temporary and permanent changes. Change of state. The three states of matter. Ice, water, steam. Sulphur, ghee, etc. Properties of solid, liquid and gas. Show that air has weight. Resistance of air.

Chemical changes. Rusting. Burning of magnesium. Combustion.

STANDARD VI.

Natural phenomena.—The same as for Standard V, only in greater accuracy and detail Some further planets and their satellites may be added to the model of the solar system Climate and season of the year. Explanation of winds in the light of what is learned under the head of Elementary Physical Science as regards hot air rising, etc. The monsoon. Cyclonic storms.

Plant life.—Life history of plants :—

A more detailed study of the forms and functions of the root, stem and leaves.

How plants store up food for future use in—(1) the stem, and (2) the root.

Breathing, transpiration and sleep of plants.

Parasites.

Dispersion of seeds through various agencies.

Insectivorous plants.

Mimicry among plants.

Animal life.—General characters of the order *carnivora* :—

External appearance and habits of familiar examples.

Arrangement of the teeth in the upper and lower jaws respectively of the cat—the prominent canines—a characteristic of the carnivora : the function of the incisor, the canine and the molar teeth explained.

Simple facts about the mode of life of bats. Characteristics of monkeys and anthropoid apes.

Elementary physical science.—Recapitulation about forces and velocities. Reminders about the law of power and weight discovered from simple machines. The idea of work. Energy or power to do work. Work done in lifting a body. Energy stored. If the body is allowed to fall, what becomes if its energy. Set about to discover laws of falling bodies—with help of water-clock. (Why do bodies fall? Reminders about weight). Motion down inclined planes of different slopes. Experiments with a heavy bob suspended by a fine thread. It rises to the height from which it fell. Hence deduce the law of bodies falling freely. The principle of continuity. The first law of motion Momentum—inertia. Acceleration. Gravity always acts, and independently of initial velocity. Projectiles. Path of water-jet.

Recapitulation of physical and chemical changes. Expansion of solids, liquids and gases by heat. Laying of rails. Thermometers. Measurement of temperature. Hot air rises : hence draughts and winds.

Solutions. Pure substances and mixtures. Sulphur and iron. Compounds and elements. Mercuric oxide and mercury. Magnesium and magnesia. Separation of copper from blue vitriol by means of clean sheet iron. A short biography of Galileo will be included in the literary reader to illustrate the experimental method.

N. B.—Three subjects only are compulsory. In Standard III these will be the three subjects prescribed. In Standard IV to VI "Natural Phenomena" and "Plant Life," are compulsory, while for a third subject, a choice is allowed between "Animal-Life" and "Elementary Physical Science."

HYGIENE SYLLABUS FOR BOYS' SCHOOLS.

STANDARD III.

(*a*) A rapid revision of the course arranged for standards I and II.

(*b*) *Air.*—Its composition. Sources of impurity. Respiration. Combustion. Danger of foul air. Ventilation of rooms.

(*c*) *Water.*—Natural waters:—rain water, wells, tanks and rivers. Sources of impurity. Methods of purifying—filtering; boiling. Characters of good drinking water. Danger of drinking impure water.

(*d*) Abuse of drugs and intoxicants.

STANDARD IV.

(*a*) *The dwelling-house.*—The situation of the dwelling house. Position of the kitchen privy, stables and cowsheds. Importance of clearing the ground of jungle, and filling in stagnant pools round about the house. Drainage round house. Avoidance of insanitary acts in the vicinity of the house. Disposal of refuse and night-soil. Disposal of the dead.

(*b*) *Exercise.*—Need for. Hours of exercise. Effects on tissues of the body. Excessive exercise to be avoided.

(*c*) Abuse of drugs and intoxicants.

STANDARD V.

(*a*) *Food.*—Need for. Organs of digestion; enzymes. Different kinds of food-stuffs (proteids; oils and fats and carbohydrates and salts and their respective values). Milk as a typical food. Various articles of food commonly used in India:—cereals and pulses, potatoes and other vegetables; fruits (unripe and over-ripe) and spices. Quantity of food. Average diet scale for a native of Bengal. Regularity. Effects of over-feeding. Cooking; cleanliness of cooking vessels.

(*b*) Abuse of drugs and intoxicants.

STANDARD VI.

(*a*) *First aid to the injured.*—Treatment of a case of drowning. Burns. Bites by rabid animals and poisonous insects. Snake-bites.

(*b*) *Insects and pests.*—Mosquitoes and fleas. Common diseases caused by them. Preventive measures.

(*c*) Brief account of some prevalent infectious and contagious diseases and their causes and treatment. Isolation of patients. Vaccination and inoculation. Transmission of disease. Disinfection.

(*d*) Abuse of drugs and intoxicants.

HYGIENE AND DOMESTIC ECONOMY SYLLABUS FOR GIRLS' SCHOOLS.

STANDARD III.

Kitchen.—The cleaning of utensils, preparation of vegetables and rice for cooking.

Washing of clothes.—Ventilation and sunlight. Sunning and airing of bedding, mats, etc.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

STANDARD IV.

Kitchen.—Full preparation of rice in all stages from the paddy (ধান).

Water.—Danger of drinking impure water.

Importance of boiling and filtering water.

Care of infants.—Bathing: use of mustard oil; cleanliness of clothing; preparation of food; sleep. Proper treatment and handling of infants.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

STANDARD V.

Sick-nursing.—The sick room: necessary furniture, cleanliness, ventilation, bedding, washing of patients. Food of patients.

Details of nursing, such as the giving of medicine, use of the thermometer, changing of sheets, the use of disinfectants, etc.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

STANDARD VI.

Treatment and symptoms of ordinary ailments, such as coughs, colds, fevers, etc.

Where no medical aid is forthcoming, treatment of cholera; plague, etc.

Treatment of accidents: burns, bruises, scalds, cuts, snake-bites, etc.

Sick-diet.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

N.B.—The work throughout these standards should be made as practical as possible. Hardly any value attaches to this subject, unless it is taken in a practical manner. This will only be possible in respect of all branches of the subject in boarding schools, but day schools may nevertheless do much in this way.

INTRODUCTION TO THE HISTORY SYLLABUS.

1. It has been remarked by a recent writer on school teaching in England that "a subject makes its strongest claims to a place in a school course, when it not only increases knowledge and exercises mental faculty, but when it stimulates interest in larger views of life and action and provides the continuance of that interest when the initiative of the teacher is withdrawn." If history deserves a place in our curriculum, it is because it does all this, and history teaching to be of any real value should not merely store the mind with useful information about the past, but stimulate the curiosity and arouse the imaginative faculty of the child and help him in taking an intelligent interest in the larger life around him.

2. In the earlier stages this can be best done by means of story-telling, making the child's mind play round imposing personalities and striking incidents. No text-book, however judiciously written, should or can by itself be enough at this stage. The necessary data, the essential facts and dates must, of course, be gathered from the text-book. But the teacher's voice, his manner, his method of exposition, his ready power of illustration, are all important factors in impressing things on the child's mind. It should never be forgotten that the primary function of the history teacher is to teach, and he should never be satisfied with setting lessons and hearing things recited or reproduced out of a text-book. In this connection the following passage from "Suggestions for the consideration of teachers" issued by the Board of Education in England in 1905, may suitably be quoted:—

"Important as it is to have a well-written and well illustrated book to be used for the purpose of revising the oral lessons, and to some extent, as a text-book for preparation, no book, however good, can with children of this age supply the place of vivid and vigorous personal teaching. It is from a judicious combination of stimulating oral teaching with the study of a book that the most fruitful results are to be obtained, and the book will help to give definiteness to the work which might otherwise become desultory and perfunctory. The reading aloud of a history book by the scholars, with occasional explanations by the teacher, is not a proper method of teaching history to children."

3. As a help to the choice of characters and events round which the teacher's effort should centre, and which should form the subject-matter of the prescribed text-book, the following points, about the importance of which there is a general agreement among practical teachers, may be quoted:—

(*a*) The child's mind is naturally more in sympathy with action than with contemplation or abstruse reflections.

(*b*) The undeveloped faculties of the child respond more readily to the simplicity of the earlier ages and the undeveloped forms of social organisation.

(*c*) The child's mind readily understands that which is familiar, and thus the familiar should be made the basis for teaching that which is remote and unfamiliar.

On these grounds, the text-book prescribed for Standards III and IV should be a History Reader about India, and not merely about the Province of Bengal.

4. In Standards III and IV, towards the end of the course, an attempt may be made to familiarise the child with some of those general abstract conceptions which form the subject matter of higher history teaching; and here concrete illustrations may be made the means of instilling ideas about generalised conceptions. For example, the conception of kingship or of an empire may not be easily intelligible to the child but the idea of a gracious Queen-Empress or of a mighty King-Emperor presiding over vast continents and taking a parental interest in the races committed to her or his charge is sure to appeal to the child's imagination, and will be readily grasped. Similarly, law, order, justice, Government and citizenship are all difficult conceptions. But the village watch-man, the police *daroga*, the village *punchayet* and the postman are all familiar figures, and may be used as aids to enable the child to realise the abstract conceptions.

5. History teaching, at least in the higher stages, should aim at training the judgment, strengthening the reasoning faculty and at giving us a living idea of our duties and responsibilites as citizens of a world-wide empire. Boys should learn to discriminate between good and evil as illustrated in the lives of the leading historical characters. They should also be taught the causal relation between facts; how misgovernment, for example, ends in general misery; how kindness breeds confidence; why a certain course of action fails while another succeeds; how one ruler proves a builder of an empire, and how another sows the seeds of disruption. The result aimed at will best be secured by a detailed study of the British period of Indian History, because that period has a living and abiding interest for us all. The History Reader prescribed for Standards V and VI should, therefore, contain a detailed treatment of this period.

6. The following suggestions are made regarding historical apparatus, viz., text-book illustrations, maps, globes and atlases :—

(*a*) The text-book should always be explained and supplemented by the teacher.

(*b*) The text-books should be intelligently illustrated, the illustrations throwing light on ancient customs, the remains of a nation's architecture, etc. In this connection, it may be noted that magic latern slides illustrating different epochs of English History are easily available and largely used in schools in England. Perhaps, similar slides for the teaching of Indian History may be prepared cheaply and without much difficulty.

(*c*) Maps and atlases should be constantly used, and, if possible, an attempt should be made to prepare and publish a historical atlas for Indian History on the lines of Gardiner's Historical Atlas. It may be mentioned that Gardiner's atlas already contains a few plates illustrative of Indian History.

HISTORY SYLLABUS.

STANDARDS III AND IV.

India – Its position on the map of the world and the general features of the country, especially of Bengal and Eastern Bengal.

The non-Aryans—The coming of the Aryans and their settlement in India.

The two Epics—The story of the Ramayana and the Máhábhárathá.

The story of Budha—Mahavira and the Jainas.

The story of Bijoy Sinha and the colonisation of Ceylon.

Magadha Empire—Chandra Gupta.

The invasion of Alexander.

Asoka, Vikramaditya, Kalidasa, Harsabardhan.

India on the eve of the Muhammadan Conquest; Bengal—Adisura, Bollal, Laksman Sen.

The Muhammadan conquest of India—Buktiar Khiliji.

Stories of the Pathan Kings.

Kutubuddin, Nasiruddin.

Alauddin, Muhammad Tughluk.

Bengal under the Pathans – Chaitanya, Nanak, Kabir, Ramananda.

The stories of Timur and Babar.

The Mogul Emperors—Babar, Humayun (Sher Shah), Akbar (Todar Mull), Jehangir Shah Jehan, Aurunzeb.

Sivaji and the Mahrattas.

Bengal under the Moguls, the Bargis.

Europeans in India—Foundation of Calcutta, Bombay, Madras.

Seraj-ud-daula, the Black Hole, Clive, Plassey.

The Dewany—Warren Hastings.

Haidar Ali and Tippu Sultan.

Consolidation of British Power in India.

The Sikhs—Ranjit Sinha and the Sikh War.

The Sepoy Mutiny.

India under the Crown—Queen Victoria, Empress of India.

N.B—The syllabus should be covered by a text-book with about 40 stories.

STANDARDS V AND VI.

Condition of India during the Hindu period.

Condition of India during the Muhammadan period and under the Pathans and the Moguls.

Early intercourse between Europe and India—Discovery of the Cape route—Earliest Europeans in India and their Settlements—The Portuguese, the Dutch, the French and the English—First Charter of the East India Company.

The struggle between the English and the French—Clive, Dupleix, Plassey.

The grant of the Dewany—The dual Government.

Warren Hastings—His revenue and judicial reforms—The Regulating Act.

Extent of British dominion in his time—Rise and progress of the Mahrattas: their contact with British power.

Pitt's India Bill—The Calcutta Madrasah—The Asiatic Society.

Lord Cornwallis—His administrative reforms—The Permanent Settlement—Sir John Shore.

Lord Wellesley—His wars with Mysore and the Mahrattas—The system of Subsidiary Treaties.

Lord Minto—Relation of British power with foreign powers outside India—Renewal of the Company's charter.

Lord Hastings—His wars with Nepal and with the Mahrattas.

Lord Amherst—The First Burmese War.

Lord William Bentinck—His reforms—Renewal of the Company's charter—Sir C. Metcalfe.

Lord Auckland—The First Afghan War.

Lord Ellenborough—The Sind War.

Lord Hardinge—The First Sikh War.

Lord Dalhousie—The Second Sikh War—The Annexation Policy—The Second Burmese War.

The Material Progress of the country under Lord Dalhousie—Railways and Telegraphs.

Lord Canning—The Sepoy Mutiny.

Assumption of direct Government by the Crown—The Queen's Proclamation.

India under the Viceroys—Benefits of British Rule.

INTRODUCTION TO THE GEOGRAPHY SYLLABUS.

1. Before dealing with the geography syllabus for Standards III to VI, in which, on an average, the pupils range in age from ten to thirteen years, it is necessary that we should realize what the geographical equipment of the pupils entering Standard III is, or is likely to be:—

(*a*) They will have been trained to observe, and, in a very elementary way, to associate causally some obvious features of their physical environment.

(*b*) They will have some practical acquaintance with standards, *e.g.*, standards of time distance, direction, area.

(*c*) They will have made a beginning of the work which leads to, as its goal, the intelligent reading of maps.

(*d*) They will know something of plants and animals: the differences between them, their differing habitats, and their uses.

(*e*) Some effect will have been given to geography as a correlating subject.

2. We have now to consider what will be the most vital parts of the work in the standard that follow, namely, III to VI. The subject-matter in these standards will be, in accordance with the most generally-accepted views as to the treatment of the subject, "Home" geography and the beginnings of "World" geography.

3. In these standards the pupils will at first be occupied with a stage of the subject ("Home" geography) in which it is possible for them to get their knowledge, or at any rate to have it illustrated, largely at first hand. The transition will then have to be made to the stage ("World" geography) in which they will have to make use of their imagination. They will have to apply standards, with which they will have become gradually familiar, and principles derived from a study of their immediate surroundings, to larger and larger areas as to which their sources of information should mainly be the map. It follows that steady progress in the understanding and use of plans and maps is vital to the success of the work, and it is worth while to sacrifice a good deal to secure this. The work should be as practical as possible, and this will make it all the more suitable for pupils of this age, and the necessity of spending a good deal of time in acquiring some proficiency in the freehand drawing of outlines and in learning to make the conventional signs used on maps need not be regretted. Ample practice in noting directions and in measuring and estimating distances will also be necessary. A true north and south line should be conspicuously marked somewhere in every school, and from the determination of the relative situation of such objects as are indicated in a plan of the school and playground advance may be made to the determination of the bearing of points in the immediate neighbourhood both practically and from a large scale map. And so to places further and further afield using maps of continually smaller scale, until the pupils are familiar with the bearings and distances away, as determined from maps, of the more important towns, and the prominent physical features of the Province and of India.

4. Standards of area present a difficulty. Nothing is so futile as to make children learn numbers that convey no real meaning to them, and every effort must be made to provide a suitable unit of area, and enable the children to realize it. Assuming that the pupils have learnt square measure practically, and have become familiar with the smaller units

of area, the meaning of a square mile may be made clear by marking off a square mile on the map of the village and its surroundings where all the ground is familiar. Then the area visible from a convenient height may be worked out and compared with the area of the thana and the subdivision, as shown on the map. (The area visible at sea from a height of eight feet above water is above 28½ square miles; the area of Calcutta is about 20 square miles.) Advance should next be made to a larger unit, say the average area in square miles of a Bengal district, and, for comparison of countries, the area of Bengal. For work on the globe, or on an equal-area projection map of the world, tracing-paper, ruled in squares, each equal to the area of Bengal, is useful. Population density expressed as a number per square mile may be similarly dealt with. The population of the square mile upon which the village stands being known, little difficulty will be felt in realizing population densities expressed as multiples or sub-multiples of this.

5. The treatment of the subject should, as far as possible, be causal, but this method must not be pressed too hard, otherwise the pupils at this age will soon get out of their depth. It would, for example, be unwise to attempt any elaborate explanation of the cause of the seasons, or to enter in any detail into the proofs of the roundness of the earth. What is of far more importance is to continue such observational work as will prepare the way for the intelligent apprehension of the more difficult parts of the subject when the time comes to deal with them. With this end in view observations should be made of such things as the place of sunrise and sunset at different times of the year, of the face of buildings that receive sunlight in the early morning at different times of the year, of how far sunlight reaches into a room at different times of day at different times of the year, and of the varying length of shadows at noon; and the association of these circumstances with higher or lower temperatures should be effected. Then, again, the thermometers should be regularly read, in order that the figures expressing temperatures may come to have a real meaning; also rainfall measurements. To the ordinary boy or girl at present the statement that the temperature of a room is 75° is absolutely meaningless. Similar observations of wind direction should also be made and recorded. In such ways the required association between wind, weather and season will be brought about. When the time comes for it, it will be easy to connect travel northwards in our hemisphere with, as a rule, increasing cold, and travel southwards with, as a rule, increasing heat.

6. In many parts of Bengal, a somewhat vigorous exercise of the imagination will be required to enable the pupils to realize the variety of relief on the earth's surface, and the effect of this variety upon scenery and the conditions of life. Here pictures may be used with advantage, and, with some caution, the relief model, the relief map, and the relief globe. It will not be necessary at this stage to dwell on the evolution of scenery through the wear and tear of the land surface. It will be sufficient to draw attention to the existence of land waste, as evidenced by the muddiness of moving water after rain, and the way in which rivers in Bengal carve and change their channels. This part of the subject lends itself to easy illustration. A mound composed of a judicious mixture of clay, sand and ordinary soil will exhibit, during the rainy season, many of the most striking results of denudation.

7. A warning is perhaps still required against burdening the memories of these young pupils with lists of place-names and commodities. The number of names that it is really necessary to learn formally is quite few. A Committee recently appointed for the purpose in America prepared the following list of cities in Europe that pupils at this stage should know:—London, Liverpool, Manchester, Edinburgh, Glasgow, Madrid, Berlin, Hamburg, Vienna, Rome, Naples, Athens, Constantinople, St. Petersburgh, Paris, Marseilles, Venice. A like economy should be exercised in memorising the names of other geographical features. With honest teaching, and with maps used as they should be, much knowledge of this kind will be acquired informally and in a more useful way.

8. The work throughout should be made as practical as possible.

GEOGRAPHY SYLLABUS.

STANDARD III.

1. Further work in making and reading plans drawn to scale, special attention being paid to orientation.

Pupils should be taught to orientate their maps and plans when in use.

Measurement of area by means of squared paper.

Preparation of a large-scale map of the immediate neighbourhood, containing only the outstanding topographical features.

The pupils to be taught how to indicate topographical features, such as roads, railways, streams, houses and villages, jungle, etc., on sketch-maps drawn freehand by themselves on the blackboard or on paper.

2. The main features of the local climate in relation to the seasons and vegetation.

The chief food-crops and fruits: where they flourish, and why.

Practice in reading temperatures, and in noting wind direction.

3. As nearly as practicable the number of people living on the square mile of which the school is the centre should be ascertained. The population of the town or village, of the

thana without the town or village, and of the thana, including the town or village, expressed in number per square mile. The occupations of the people: agricultural, industrial, and commercial.

The wants of the people: food, clothing, building materials, etc., and how supplied.

Commodities which are not produced locally and why: how and whence supplied.

4. Stories and descriptive lessons may be made of great value at this stage. Every effort should be made by these means to familiarise the pupils with the idea of other villages, towns, districts and regions of the world than their own, and the way in which modes of living are controlled by circumstances.

Something should be said of the causes which bring about a heavy or a light population. Modes of communication should also be described and illustrated, stress being laid on the use of railways and other means of travel.

Such stories and descriptive lessons should at first deal with other parts of India; afterwards with regions exhibiting climatic and other contrasts in different parts of the world: *e.g.*, arctic, equatorial, and temperate regions, mountain and desert regions.

Stories of travel by land and by sea should be told and illustrated by pictures, and, if possible, by lantern slides.

N.B.—The text-book for this standard should be confined to stories illustrating the subject-matter of paragraph 4 of the syllabus.

STANDARD IV.

5. Practice in reading maps, giving only the outstanding features of larger areas on a relatively small scale.

The representation of relief on maps.

If the immediate locality includes some variety of relief it should be represented upon a larger scale map, the areas of different elevations being differently coloured. If possible, the map should be carried to the highest point indicated upon it, and the view compared with the map.

If the locality does not exhibit a sufficient variety of relief, a model should be made representing by preference a real area which has decided differences of elevation. A map of the area represented by the model should be made and coloured to indicate relief. The model should also be coloured in accordance with the colour scheme used on the map.

The pupils should now be fitted to study the main physical features of the Thana, District, Division, and Province successively, as depicted on maps of suitable scale. All maps used should be coloured to indicate height above sea-level.

Definitions of geographical terms should only be given as they are required, and should be further illustrated, if necessary, by models made in clay, or sand or paper-pulp, *e.g.*, mountain, coast, estuary, island, etc.

The question of what becomes of the rain that falls upon the land may now be dealt with in an elementary and practical way and the pupils be led by observation to realize the connection between the flow of water and the slope of the land. A simple treatment of denudation and the part that rivers play in the transportation of land waste will be naturally arrived at in this stage of the work.

The pupils should be led to see that Bengal, as we know it, is the result of denudation, that is to say, the removal of land waste from one place to another, from higher levels to lower levels.

6. The climate of the locality may be compared with that of other parts of Bengal. Records of temperature may be compared, especially those that illustrate contrasts of climate, *e.g.*, records of temperature at such places as Puri, Cuttack, Patna, Ranchi, and Darjeeling.

7. The lessons given under paragraph 3 in Standard III may now be made to embrace the whole Province, and lead to a comparison of population density in different parts of the Province and the reasons for the greater variations of density, and to a study of the principal means of communication and the reasons for the routes taken by the railways. The chief centres of industry and population, and the functions of Calcutta as capital, port, trading and industrial centre, should be known.

8. Towards the end of the course the Province should be considered as part of the larger whole of India. Its position on the map of India should be studied in relation especially to the river basins and water-partings, the neighbouring Provinces, and the great cities. The position of India on the globe should be shown, and at this point an easy explanation may be given of our belief that the earth is round.

STANDARD V.

9. India as a whole should now be studied on broad lines, the basis of the teaching being a good physical map. The pupils should be exercised in colouring a map of India to indicate in a general way the relief of the land, and in drawing sketch-maps to illustrate special features, *e.g.*, the main railways, the principal river systems, the distribution of the chief minerals, the distribution of forest, agricultural, and pasture land, etc. It will be important to draw attention to the distribution of rainfall, both in quantity and season, and to the consequences of defect or excess. Some account of the monsoons may now be given.

10. The outlines of world geography should be taught in this standard, with the globe as the basis of the teaching. On a globe with a writing surface it is easy to make the lines of latitude and longitude intelligible, and their utility is as easily made clear. It is a distinct advance to have grasped the fact that the meridians are north and south lines, and drill with the globe will soon enable the pupils to adjust their ideas of orientation, and apply them to maps of continents in which north and south is not always straight up and down the paper. If possible, the pupils should be provided with small hand globes. Pupils should be encouraged to make for themselves globes of clay or other material.

11. The object of the teaching should be to give the pupils—

(*a*) practice in realising direction, measuring distance, estimating area and determining position on the globe;
(*b*) a knowledge of the distribution and relative areas of land and water, and the shapes and situations of the main land masses;
(*c*) the idea of the oceans as occupying the greater hollows in the earth's crust, and the land masses as protuberances with an under-water ledge of varying width (the continental shelf) covered with waste from the land;
(*d*) the main world water-partings and drainage slopes;
(*e*) some acquaintance with the great climatic regions, the winds prevailing in them, and the nature of the rainfall:—(*i*) polar, (*ii*) cool temperate, (*iii*) warm temperate, (*iv*) the western tropical deserts, (*v*) the inter-tropical regions, (*vi*) the equatorial belt;
(*f*) the characteristic features of vegetation in the different climatic regions;
(*g*) the leading types of animal life (including man) and their habitat.

STANDARD VI.

12. The elementary principles of geography should now be tolerably familiar, and the pupils should be able to read with some intelligence the maps of a good school atlas. They should have attained some proficiency in drawing sketch-maps, and their imagination should have been sufficiently trained to enable them to realise from the map and from descriptions and pictures the conditions obtaining in other parts of the world than their own. The work of this year should consist of a survey, necessarily slight, of the continents, and of the countries of the world regarded not as units in themselves so much as subdivisions of the continents to which they belong. The relief, drainage areas, climatic and biogeographical regions of each continent should be treated in an elementary way, and attention should be paid to the continental waterways, caravan routes and trunk railways. The natural resources, characteristic industries, commercial relations with other countries, position in relation to the great world routes of trade and travel, and the state of civilization of the countries in each continent should be touched upon in proportion to their importance, and the names, situation, and reason for the importance of a few towns should be known.

THE DRAWING SYLLABUS.

STANDARD III.

(*i*) *Chalk.*—(*a*) Free arm drawing of natural objects which have been taken in the science lessons. The choice need not be limited to these. More detail and accuracy of form will be expected than in Standard II. (*b*) Drawing of large common objects, such as a *lota*, a bucket, a lamp, etc.
(*ii*) *Pencil.*—(*a*) Drawing on the same lines, care being taken that they are on a fairly large scale. (*b*) Memory drawings should form a part of the work.

N.B.—Chalk drawings at this stage may be discontinued, if desired.

STANDARD IV.

(*i*) The drawings from natural objects to be still continued, but studies of single leaves and flowers are too elemetary at this stage. Such studies as the following are suitable: branch bearing leaves and flowers or leaves and fruit: a cluster of flowers, etc.
(*ii*) As a preliminary to the study of perspective, such objects as a box and an almirah should be drawn.

STANDARD V.

(*i*) Elementary study of perspective.
(*ii*) Drawing from ornamental designs.
(*iii*) Nature drawings.

STANDARD VI.

(*i*) Further study of perspective.
(*ii*) Nature drawing—study of light and shade.

GEOMETRICAL DRAWING AND EXPERIMENTAL GEOMETRY SYLLABUS.

STANDARD III.

Drawing and measurement of straight lines. Circles: drawing circles of different radii; drawing circles to touch one another; drawing simple patterns involving circles. Construction of triangles with given sides; isosceles and equilateral triangles; simple patterns involving these figures. Use of set scales; construction of right angles and right-angled triangles; construction of parallel lines. Bisection of straight lines. Measurement of straight lines connected with the various figures. Experimental verification of simple geometrical theorems arising out of the constructions, *e.g.*, "two sides of a triangle are greater than the third."

Apparatus required: a pair of pencil compasses, 6" foot-rule, India-rubber, set scale, pencil. The whole may be obtained in its cheapest form for about 4 annas. A divider point, to be used with the compasses, is desirable, but not necessary. The teacher should possess a good pen-knife, so that the pencils used by the boys can be sharpened to a fine point.

STANDARD IV.

Drawing and measurement of angles with the protractor. Construction of an elementary paper protractor. Construction of triangles with given sides and angles. Measurement of the elements of triangles constructed with given data. Bisection of angles. Drawing perpendiculars to lines from internal and external points. Measurement of lines and angles occurring in the various constructions. Experimental verification of simple geometrical theorems.

Additional apparatus required: a semi-circular protractor.

STANDARDS V AND VI.

Theoretical and Practical Geometry (modern methods) corresponding to the first 45 propositions of the first book of Euclid.

The constructions are to be made with the help of a ruler and compasses only.

N.B.—No text-book is required by the pupils in any of the standards, but the teacher should use one for his own guidance.

THE MENSURATION SYLLABUS FOR MIDDLE VERNACULAR AND UPPER PRIMARY SCHOOLS ONLY.

STANDARD IV.

Definitions and units of measurement, rectangular measure.

STANDARD V.

Rectangular measure continued, working out areas with the help of fractions, oblique parallelograms, triangles.

STANDARD VI

Trapezia, polygons, circles, elementary cubic measure.

N.B.—The subject should only be commenced at Standard IV because before this stage boys will not possess a sufficient knowledge of arithmetic.

THE NEEDLE-WORK SYLLABUS FOR GIRLS' SCHOOLS.

STANDARD III.

(*i*) Cross stitch.
(*ii*) Making a chemise (gathers can be, but need not be, used for the band).
(*iii*) Plain knitting with two needles.

STANDARD IV.

(*i*) Cutting out and making a jacket.
(*ii*) Making button holes.
(*iii*) Marking on cloth in vernacular characters.
(*iv*) Knitting plain and purl with two needles.

STANDARD V.

(*i*) Cutting out and making a petticoat with tucks, and gathering it and putting it into a band.
(*ii*) Darning and herring-boning.
(*iii*) Knitting of plain socks for babies.

STANDARD VI.

(*i*) The cutting out and making of a *kurta* and *gunti* (gores and gussets).
(*ii*) The cutting out and making of a *piran*.
(*iii*) Feather stitching.
(*iv*) Patching (flannel, calico and print).

N.B.—Patterns of chemise, jacket, *kurta* and *piran* are kept in the office of the Inspectress of Schools, Bengal, and can be borrowed.

NOTE ON SCHOOL GARDENS.

IN connection with the study of plant life, the importance of which has been insisted upon in the syllabus, the provision of school gardens should be considered as most desirable. Where a garden is impossible, plants should be grown in boxes or pots. The attention of school managers, teachers and others is invited to the following extract from some remarks on school gardens made by Mr. F. G. Sly, Officiating Inspector-General of Agriculture in India :—

"The master must use real objects, in order to cultivate in the child the habits of observing and thinking. In this matter, school gardens are of primary importance. I recognise the difficulties that in some parts stand in the way of providing each rural school with a garden, but these might be overcome more often than they are. Where this is impossible, a very great deal can be accomplished by growing plants in boxes and pots. The right use of a school garden or school pots is not always enforced. I have seen school gardens in which the whole of the work was done by the school watchman, and which served the sole purpose of growing a few English vegetables for presentation to an inspecting officer. The best school gardens visited by me served the useful purposes of beautifying the school surroundings and of giving some manual training to the children, but even these objects are of secondary importance. The real object of a school garden should be to supply materials for object-lessons in which the pupils can study the growth of plants. It should be a garden where 'nature is studied in its relations to the child, from the child's standpoint, by the teacher with the children.' If there is not room for each child to grow his own patch, each class should jointly cultivate its own plot, not in order to produce the best results, but to observe and study plant growth. Under the guidance of the teacher, the child should observe the parts of a seed, the plant food in it, the process of germination and the conditions necessary for it. In each stage of the growth of the plant he should pull up a specimen and observe the roots, their uses and their growth; the stems, their uses and structure; the leaves, their uses and structure; the flowers, their parts and uses, and methods of fertilization; the fruits and seeds; their formation and uses, methods of disposal and the like. He should observe the soil and its composition, the effect of plant food and manures. The gardens should be deliberately used to give object-lessons in failures as well as in success in connection with soils, drainage, manures, weeds and the like. School gardens need by no means be expensive; a portion of the school compound can often be utilized, and the commonest seeds obtained free in the village are as useful as those purchased from a merchant. In any case, the cost of growing some plants in pots and boxes is infinitesimal. Plants collected from the roadside and cultivator's field can never take the place of a school garden. The child must *do* the things himself; he must sow his own seed and observe the growth of his own plants."

CHARITABLE ENDOWMENTS ACT, 1890.

No. 752Medl.—The 3rd August 1907.—In the matter of the creation of an endowment (such endowment to be called "The Chella Dispensary Trust Fund") for maintaining a charitable dispensary at Chella, thana Bolpur, district Birbhum.

It is hereby notified that the Lieutenant-Governor of Bengal, in exercise of the powers conferred by sections 4 and 5 of the Charitable Endowments Act (Act VI of 1890), and upon the application and with the concurrence of Babu Dhon Krishna Goswami of Chella

aforesaid, doth hereby order and direct that the Government securities of which the particulars are contained in the 1st schedule hereunder written shall, from the date of the first publication of this notification in the *Calcutta Gazette*, vest, and be thenceforth vested, in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal to be held by him and his successors (subject to the provisions of the said Charitable Endowments Act, 1890, and the rules from time to time framed thereunder by the Governor-General in Council) upon trust to receive the income thereof when and as the same shall become due and payable, and from time to time to apply the same in the manner and for the purposes set forth in the scheme of which the particulars are contained in the 2nd schedule hereunder written; and it is hereby further notified that the said scheme of which the particulars are contained in the said 2nd schedule shall come into operation on the vesting of the said Government securities in the said Treasurer of Charitable Endowments for the territories subject to the Government of Bengal.

The 1st schedule above referred to.

Government Promissory Note No. 145555 of the 3½ per cent. loan of 1865 for Rs. 10,000.
Ditto ditto Note No. 139660 of the 3½ per cent. loan of 1865 for Rs. 10,000.

The 2nd schedule above referred to.

1. The endowment hereby created shall be called "The Chella Dispensary Trust Fund" for the maintenance of the Charitable Dispensary which has been established at Chella, in the district of Birbhum, upon the premises described in the 3rd schedule hereunder written, and which said dispensary is called or is intended to be called "The Dhon Krishna Goswami Charitable Dispensary."

2. The person to be appointed under section 5 (*1*) of the Charitable Endowments Act, 1890, to administer the property of which the particulars are contained in the 1st schedule above written shall be the Magistrate for the time being of Birbhum (hereinafter referred to as the said Magistrate).

3. The Treasurer of Charitable Endowments for the territories subject to the Government of Bengal shall stand possessed of the said property of which the particulars are contained in the 1st schedule above written upon trust to pay the net income thereof to the said Magistrate, in order that the same may be applied in or towards the maintenance of the said Charitable Dispensary, in accordance with the next succeeding clause hereof.

4. The said Magistrate shall apply all moneys to be received by him from the said Treasurer of Charitable Endowments under the last preceding clause hereof in or towards the cost of maintaining the said Charitable Dispensary.

5. The said Magistrate shall, in books to be kept by him, regularly enter or cause to be entered full and true accounts of all moneys received and paid by him under this scheme, and shall submit to such public servant, in such form and at such times as the Local Government may from time to time appoint and prescribe, an abstract of such accounts and such returns in regard to any other matter connected with the administration of the trust as the Local Government may require.

The 3rd schedule above referred to.

All that piece or parcel of rent-free land belonging to Babu Prankristo Goswami, adopted son of the late Babu Dhon Kristo Goswami, situate at Chella aforesaid and containing an area of 4½ cottahs or thereabouts, and bounded on the north by Gobinda Prosad Thakur and Thako Kristo Goswami and others' waste land, on the south by Sukumar Das' house, on the east by the public road, and on the west by Thako Kristo Goswami's waste land.

DECLARATION.

No. 1915J.—The 8th August 1907.—Whereas certain land was acquired by the Bengal Government, under the provisions of Act I of 1894 and Act XVIII of 1885, for a public purpose, viz., for the Bansdebpur siding, which takes off the Dhanbaid Katras Branch of the East Indian Railway at mile 171·883 feet, and whereas coal-mines are situate under the said land, and whereas the Busserya Coal Company, Limited, have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company intend to work the said mines, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the works constructed thereon, and whereas the said Busserya Coal Company, Limited, have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Now, therefore, the Lieutenant-Governor of Bengal is pleased to declare, under section 5, sub-section (2), clause (*b*) of the abovementioned Act, XVIII of 1885, that the working shall be carried on by the said Busserya Coal Company, Limited, in the manner and subject to the restrictions below specified, viz —

(1) Walls of sound masonry to be built from floor to roof and across the galleries at the points marked A, B, C and D on the plan. The walls to be vertical on the inner side, to have at least two feet batter on the outer side, and to be at least four feet thick at the bottom and at least two feet thick at the top. The space enclosed by the walls to be tightly packed from floor to roof with incombustible material.

(2) A wall similar to the above to be built at the point marked E on the plan, and the galleries to be similarly packed.

(3) The walls and stowing to be completed within two months of the date of this declaration.

(4) No driving shall be made nor coal extracted on the rise or north side of the line marked G. H on the plan.

(5) Under other parts of the acquired land galleries may be driven not more than 12 feet wide, with centres not less than 50 feet apart, forming pillars not less than 38 feet square, to be left unworked for support.

(6) The above restrictions apply to No. 12 seam only, and the Busserya Coal Company, Limited, shall give further notice under section 4 of the Land Acquisition (Mines) Act, 1885, of their desire to work any other seam under the land acquired;

and that in all the above cases no further excavation shall be made in any of the galleries which already have been driven, the actual heights and widths of which have been carefully recorded on the plan marked L A M A No. 65, signed by the Chief Inspector of Mines.

The plan referred to may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

No. 3334P.—The 12th August 1907.—The following rules for the recruitment of Sub Inspectors of Police, which have been sanctioned by Government, are published for general information:—

RULES FOR THE RECRUITMENT OF SUB-INSPECTORS OF POLICE.

A.—By direct appointment.

1. The appointment of probationary Sub-Inspectors of Police will be made by the Inspector-General annually in December.

2. In the preceding August the Inspector-General will intimate to each Range Deputy Inspector-General the number of vacancies allotted to each Commissioner's Division to be filled by candidates appointed direct, and will call for three nominations for every two vacancies. He will also indicate what limitations, if any, are to be observed as to the appointment of any particular section of the community.

3. The Range Deputy Inspector-General will thereupon instruct each District Superintendent of Police to publish freely in his district a notice in the annexed form. The notice states that applications will be received up to the end of September, that printed forms of application can be obtained from the District Superintendent of Police's office, that a candidate must possess the qualifications specified in rule 15, and that, after filling in the application form, he must appear with it and his certificates, if any, before the District Superintendent of Police, by whom he will be measured. The District Superintendent of Police will then send the candidate to the District Magistrate, who, if he approves, will order him to be entered in the register at an eligible candidate.

4. The Range Deputy Inspector-General will communicate a similar notice to any reputable local newspaper and freely seek the help and interest of Heads of Schools and Colleges in securing candidates of a good class.

5. A register* of candidates will be kept by the District Superintendent of Police, and the names of all candidates will be entered in it. Against those who are not passed as eligible, the word "Rejected" will be clearly written and they will be debarred from presenting themselves again for selection and should be informed accordingly.

* P. C. Form No. 127A.

6. Those candidates who are treated as eligible will be warned that they will have to appear before the Nomination Committee on a date in October or November to be subsequently fixed and communicated and must then produce medical certificates.

7. Immediately on the expiry of the period allowed for filing applications, each District Superintendent of Police will inform the Range Deputy Inspector-General of the number of candidates registered as eligible in his district and will classify them under the heads Hindu, Muhammadan, and special castes.

8. On receipt of this information the Range Deputy Inspector-General will arrange, in consultation with the District Magistrate and District Superintendent of Police, to visit each district in succession, commencing as far as possible with the districts where the eligible candidates are few.

9. On the date fixed, the Nomination Committee, consisting of the District Magistrate, District Superintendent of Police, and Deputy Inspector-General, will meet, examine the eligible candidates and select the requisite number. In order to determine the number required, the Deputy Inspector-General will, in the first instance, apportion the vacancies allotted to a division proportionately to the strength of the force of Sub-Inspectors in each district. Preference will be given to natives of a division in filling up the appointments allotted to it. Any deficiencies of suitable candidates in districts and divisions where applicants are few will be subsequently made good from those where they are plentiful.

10. The selection of candidates must be completed by the 15th November in all districts, and the Deputy Inspector-General will submit to the Inspector-General by the 25th idem a list† of the nominees in two parts, the first containing the names, district by district, of those most strongly recommended to fill the number of vacancies allotted to the division, the second containing the names of those who constitute the 50 per cent. reserve. With this list will also be submitted the application forms and certificates of all the nominees entered in it.

† P. C. Form No. 127B.

11. The Inspector-General, after such further examination of any nominees as may appear necessary, will appoint the required number of probationers, and send to each an appointment order directing him to report himself to the Principal of the Training School on the date mentioned. Full particulars of the candidates appointed will at the same time be sent to the Principal of the Training School.

12. The candidates appointed will undergo a course of one year's instruction at the Cadets Training School. The first term usually commences on 2nd January.

13. At the end of the course those declared by the Examination Committee to have passed will be posted to districts as probationary Sub-Inspectors for a period of two years. At the end of that period those pronounced competent and fit will be confirmed by the Deputy Inspector-General as Sub-Inspectors. Those found otherwise will be discharged by him.

14. During the period of instruction they will be subject to the rules and regulations of the school and will receive Rs. 25 a month as salary. On being passed out of the Training School, they will receive the full salary of the grade to which they are appointed.

15. The qualifications which a candidate for direct appointment must possess are the following:—

(*a*) He must be of good social standing and respectable parentage, and must ordinarily be a native of the Division.

(*b*) He must be of good moral character.

(*c*) He must be over 21 and under 25 years of age on 1st September.

(*d*) He must have passed the Entrance or Matriculation Examination of an Indian University or the final B or C class examination of a Zillah or High School. He must have a fluent knowledge of English.

[NOTE.—Preference will be given to graduates and under-graduates. A limited number of applicants who have obtained the B. L. degree will be appointed to a higher grade, and if they subsequently give proof of special aptitude for conducting prosecutions, may look for special promotion to the rank of Court Inspector.]

(*e*) He must be free from disease, constitutional affection or bodily infirmity unfitting him, or likely to unfit him, for Police duties.

[NOTE.—Stuttering or stammering is a defect which renders an applicant ineligible.]

(*f*) He must be not less than 5 feet 3 inches in height and 30 inches round the chest.

B.—Promotion of Head-Constables to the rank of Sub-Inspector.

16. The number of Sub-Inspectors appointed by promotion of Head-Constables will not exceed 15 per cent. of the total number to be appointed.

17. In August the Inspector-General will intimate to each Deputy Inspector-General (including the Deputy Inspector-General of Railways) the number of appointments to be allotted to each Division and to the Railways. The Deputy Inspector-General will make three nominations for every two appointments allotted after personal consultation with the District or Railway Superintendents of Police, as the case may be. Range Deputy Inspectors-General should do this when they visit districts to select candidates for direct appointment. In selecting Head-Constables for promotion, preference should be given to those who have passed through the Training School and who have received special commendation for integrity of character and good detective work.

18. Deputy Inspectors-General will submit their nominations to the Inspector-General during December, and the promotions made will ordinarily take effect from the following April.

19. Applications from Head-Constables for admission to the Training School should also be considered by Deputy Inspectors-General at the time when they visit districts to select candidates for Sub-Inspectorships. They should limit the total number of applications accepted to 20 per cent. of the total number of vacancies for Sub-Inspectorships usually allotted to their Ranges.

20. They should furnish a list of the Head-Constables whose applications for admission to the school have been accepted to the Inspector-General and to the Principal of the School direct at the beginning of December. If the available accommodation at the School is sufficient, the Principal will instruct the Head-Constables concerned through the Deputy Inspector-General when to join: if insufficient, he will refer the matter to the Inspector-General for orders.

Notice.

The Inspector-General of Police, Lower Provinces, is prepared to receive applications for appointments as Sub-Inspectors of Police from young men of respectable parentage who have passed the Entrance or Matriculation Examination of an Indian University, or the final "B" or "C" class examination of a Zillah or High School He must have a fluent knowledge of English. Preference will be given to graduates and under-graduates and to natives of a Commissioner's Division in filling up the appointments allotted to it. A limited number of applicants who have obtained the B.L. degree will be appointed to a higher grade, and, if they subsequently give proof of special aptitute for conducting prosecutions, may look for special promotion to the post of Court Inspector.

No person will be deemed qualified who does not satisfy the following conditions:—

I.—That he has no disease, constitutional affection or bodily infirmity unfitting him or likely to unfit him, for police duties, and that he is not less than 5 feet, 3 inches in height and 30 inches round the chest.

(NOTE.—"Stuttering or stammering" is a constitutional defect, and represents a physical disqualification.)

II.—That he is of good moral character.

III.—That he belongs to a respectable family and is of good social standing.

IV.—That he will be over 21 and under 25 years of age on 1st January 190 .

Printed forms of applications are obtainable in the office of all Superintendents of Police. Applications should be submitted to the Superintendent of Police of the district within which

the candidate resides, Calcutta for the purpose of this rule being regarded as a part of the 24-Parganas district. Applications must reach the office of Superintendents of Police not later than the 30th September 190 .

Selected candidates will undergo a 42-weeks' course of instruction, commencing from 2nd January 190 , at the Police Training School. This course will include drill, riding, gymnastics, instruction in taking finger prints and Police portraits, elementary surveying and training in conducting prosecutions in Magistrates' Courts and in other practical duties of an investigating officer.

At the end of the 42 weeks, candidates obtaining a certificate of proficiency will be posted to districts as probationers for two years. If at the end of that period they are pronounced competent and fit, they will be confirmed as Sub-Inspectors. During the period of instruction they will be subject to the rules and regulations of the Training School, and will receive Rs. 25 a month as salary. On being passed out of the Training School, they will receive the full salary of the grade to which they are appointed.

The position of selected candidates in the Range lists from which promotions are made will be determined by the places obtained at the final examination held at the conclusion of the Training School term.

Director of Public Instruction, Bengal.

CALCUTTA,
The 12th August 1907.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

I.—Under section 5, Chapter XXVIII of the new Regulations of the University, the following revised Rules for the management of the University Library have been adopted by the Syndicate:—

1. The Library is for the use of Resident Fellows of the University and of Resident Registered Graduates, and they alone have the privilege to use it, subject to the present rules and to such further rules and orders as may be agreed to by the General Committee under Regulation 5(1).

2. (*a*) Persons who are neither Resident Fellows of the University nor Registered Graduates may receive special permission from the Syndicate to use the Library for the purpose of Literary or Scientific Research. Such permission will be granted only on the recommendation of the Executive Committee.

(*b*) In recommending any person to the Syndicate under this rule the Executive Committee shall specify in writing, for the information of the Syndicate, the grounds on which they base their recommendation.

3. Subject to the exceptions specified in Rule 5, Resident Fellows, Resident Registered Graduates, and such other persons as are allowed to make use of the Library under Rule 2 and who reside at Calcutta may borrow and temporarily remove from the Library such books as they may require on the following conditions:—

(*a*) In this rule the term "volumes" shall include pamphlets and parts of works separately sewn.

(*b*) Resident Fellows will be entitled to take out up to ten volumes at a time.

(*c*) Under special circumstances Resident Fellows may, with the sanction of the Executive Committee, take out more than ten volumes.

(*d*) Resident Registered Graduates will be entitled to take out not more than four volumes at a time, and in order to be allowed this privilege will have to make a deposit of Rs. 25. The Registrar may, in the case of specially valuable books, and with the sanction of the Executive Committee, ask for a special deposit.

(*e*) Persons who are allowed to make use of the Library under Rule 2, and who reside at Calcutta, may take out books on the same conditions as Resident Registered Graduates.

(*f*) University Professors, Readers and Lecturers will, during the time they hold office, be entitled to the same privileges as Resident Registered Graduates.

(*g*) No book shall be issued and delivered except to the authorised borrower in person, or to some one having written authority from him to receive it on behalf of the authorised borrower.

(*h*) Every volume borrowed shall be returned to the Library within two calendar months of the date on which it was removed from the Library. In case any borrower fails to return any book within this period, a notice shall be sent to him by the Librarian calling for the return of the book.

(*i*) If a book called for under the previous section be not returned within one week after the receipt of the Librarian's notice, the person who has borrowed the book from the Library shall be subject to a fine of one rupee for each volume so retained, and to a further fine of an equal amount for each additional week that he may retain it after the expiration of the second week.

(*j*) Subject to the provisions of Rules 4, 5, 6 and 7, a book returned to the Library may be again borrowed by the same person, provided that no other Fellow or person entitled to use the Library has lodged with the Librarian an application for the same work. If such application has been made, the book may no be taken out by the original borrower until returned by the second applicantt

4. The privilege of any Fellow or other person to use the Library shall be suspended so long as he retains any book which, under these rules, he is not entitled to retain, or so long as he leaves unpaid any fine which may have been imposed on him under Rules 3, 6 and 7.

5. (*a*) Books which are valuable on account of their rarity or which belong to a series and which, being out of print, it may be difficult or impossible to replace if lost, or books required for constant reference, shall not be removed from the Library.

(*b*) A list of the works excluded from removal under this rule shall be drawn up by the Executive Committee, and will be subject to revision and extension from time to time.

6. (*a*) The Librarian shall report to the Executive Committee all cases in which books have been mutilated, disfigured by writing on the margin or otherwise injured while in the possession of readers.

(*b*) Any person guilty of such an offence shall be required to replace the injured by an uninjured copy of the book, and shall be liable to the cost of its proper binding and other charges. Further, he shall be fined and suspended from the privileges of the Library at the discretion of the General Committee.

7. (*a*) A general inspection of the Library and of the record of books, issued and returned, shall be made annually in the first week of April by the Executive Committee, or by one or more members of the Committee deputed by them for that purpose.

(*b*) During this period of inspection the Library shall be closed, and all books whatever and by whomsoever borrowed shall be returned to the Library by the 31st March, of each year.

(*c*) Any person who fails to return, in accordance with this rule, all books borrowed by him shall be subject to a fine of not less than two rupees for each volume retained; and if such volume is not returned before the expiration of one week after the last day of inspection, a further fine of an equal amount shall be imposed for each volume for each additional week until that volume is returned or until a copy of the same edition and of equal value is placed in the Library in its stead, and all expenses connected therewith paid by the borrower.

8. The Library shall be closed on Sundays and all public holidays and on all days for holding public examinations. Subject to the exception under Rule 7, it shall be open on other days between the hours of 11 A.M. and 5 P.M.

II. The following revised scheme for the Tagore Law Professorship has been adopted by the Senate:—

1. In the month of June in each year, the Faculty of Law shall select not more than three subjects, upon one of which the Professor for the following year shall be required to deliver a course of at least twelve lectures.

2. Immediately after the subject or subjects shall have been thus selected, advertisements shall be published in such newspapers as the Syndicate may think proper, stating the subject or subjects so selected and inviting applications from candidates for the professorship.

3. Candidates shall send in their applications to the Registrar on or before the 1st May following, and each candidate shall forward with his application one hundred copies of a brief synopsis of his proposed lectures, and, if he so pleases, the same number of copies of his introductory lecture

4. The copies of the introductory lecture and the brief synopsis so sent shall be referred to a Committee of the Faculty of Law, consisting of five members to be chosen by the Faculty, who shall consider the same and report thereon to the Faculty, who shall recommend a candidate to the Senate for election.

5. The election of the Professor shall take place in the month of August.

6. The Professor shall, not later than the month of August following his election, forward to the Registrar, a complete copy (manuscript or typewritten) of the lectures which he proposes to deliver. The copy shall be referred to a Committee of the Faculty of Law consisting of not more than three members to be chosen by the Faculty, who shall examine the same and before the 1st November report to the Faculty whether the work is complete and ready for the press. If upon such report the Faculty are satisfied that the work is complete, the Professor shall commence to deliver his lectures in the month of December, and complete the delivery thereof in the following February The copy of the lectures delivered shall remain in the custody of the Registrar, and shall be sent to press as soon as practicable after delivery thereof.

7. If the Professor fails to submit the copy of the lectures as required by Rule 6 or, if the copy submitted be found, on examination, to be incomplete and not ready for the press, the matter shall be referred to the Faculty of Law, upon whose recommendation the Senate may either extend the time or cancel the appointment. In the event of the appointment being cancelled, the Senate shall take fresh steps for the appointment of a Professor.

8. The salary of the Professor shall be paid in twelve equal monthly instalments; the first instalment to be paid on the first day of the month following that in which the first lecture is delivered.

III. The following scheme for the institution of scholarships for post-graduate study or research in Literary or Scientific subjects, framed under section 18, Chapter IV of the new Regulations, has been adopted by the Senate and is published for general information:—

(1) For the encouragement of post-graduate study in accordance with the new Regulations, in the Faculties of Arts and Science, twelve University Scholarships shall be established.

(2) Each scholarship shall be of the value of Rs. 32 per month, and shall be tenable for a term of two years.

(3) The scholarships shall be awarded annually upon the results of the B.A. and B. Sc. Examinations.

(4) One scholarship shall ordinarily be awarded to each candidate whose name stands first in the Honours list in each of the subjects for the B. A. and B. Sc. Examinations, provided that—

(*i*) he has obtained first-class Honours in that subject,

(*ii*) he does not accept any other University scholarship, or any Government or College Scholarship, and

(*iii*) he undertakes to prosecute a regular course of study for the degree of Master of Arts or Science either under one or more University Lecturers or in a College duly affiliated for the examination in the subject which he takes up.

No candidate, however, shall be entitled to more than one scholarship on the ground that he stands first in the first class in more than one subject.

(5) If a candidate in any subject is disqualified under provises (*ii*) and (*iii*) of Rule (4), the scholarship in that subject shall be awarded to the next candidate in the first

class who may be duly qualified, provided that all the other candidates who stand first in the first class in any subject and are qualified for a scholarship have received the same.

(6) If in any year the number of candidates qualified for a scholarship under the preceding rules exceeds the number of scholarships available, the Syndicate may, with the sanction of the Senate, award additional scholarships.

(7) A candidate who obtains Honours at the B. Sc. Examination under the old Regulations will be deemed to have obtained first-class Honours in a subject within the meaning of Rule (4), provided he has obtained a first-class in subject (II) or in any two subjects taken together from among subjects III to IX (Secs. 6 and 7 of the B. Sc. Regulations, Calendar for 1906, p. 58).

(8) As a condition of the continuance of his scholarships, each scholar must produce at the end of every three months from the University Lecturer whose classes he is attending or from the Principal of his College certificates of good conduct, diligence and satisfactory progress in his studies.

(9) The first award of the scholarships shall be made upon the results of the last B.A. and B. Sc. Examinations.

MATRICULATION EXAMINATION.

ELEMENTARY MECHANICS.

THE following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination:—

Plumb-line and Level.
Simple Lever (including brass slotted weights).
Roman Steelyard.
Lecture apparatus for experiments on moments.
George's New Atwood's Machine.
Stop-watch.
Glazebrooke's apparatus (to demonstrate movement of a body).
Hick's Ballistic Balance.
Compound Wheel and Axle.
4 Single Brass Pulleys.

Syllabus in Experimental Physiology—

(Pass Course).

The induction coil; single shocks; short circuiting key; effect of single shocks on the tongue; break-shock is stronger than the make-shock. Helmholtz's Modification; Neef's Hammer.

Pithing a frog; nerve-muscle preparation. Mechanical, chemical, thermal and electrical stimulation of muscle and nerve.

The Graphic method: Simple lever; crank lever (myograph); moist chamber. Minimal and maximal excitation with single induction shocks (make and break). Stimulation by constant current: contraction of muscle only at make and break.

The muscle curve:—Single contraction of a frog's muscle: the latent period, the period of contraction and the period of relaxation. Time tracing by tuning-fork. Method of after-loading. The influence of temperature and of load on muscular contraction. The work performed by a muscle during a twitch.

Elasticity and extensibility of muscle.

Summation of muscular contraction: tetanus.

Fatigue of muscle.

Thickening of a muscle on contraction.

Bernard's curare experiment.

Stimulation of a motor nerve; unequal excitability (greater nearer the centre of a motor nerve); excitability of flexor and extensor nerves.

Velocity of nerve-impulse (myographic method).

Electro-physiology:—Galvani's experiment of contraction with metals; Galvani's experiment of contraction without metals.

The Frog's heart—Beating of the heart; effect of heat and cold (heart *in situ*); section of the heart: effect of heat and cold on excised heart.

Stannius' experiment.

Graphic record of the beat of the heart (suspension method and also direct registration with heart-lever).

Pulse—Sphygmographic tracing.

Blood-pressure in man: Sphygmometer (Hill and Bernard's).

Reflex action (simple experiments on a pithed frog).

Vision:—Accommodation; Scheiner's experiment; near and far points;

Purkinje-sanson images: Phakoscope; Blind spot; yellow spot; Colour vision: Complementary colours.

(HONOUR COURSE)

Additional Experiments—

The Induction Coil—Break extracurrent of Faraday.

The Rheonome: Effect of sudden variation of current.

Isotonic and Isometric contraction.

Influence of veratrine on muscular contraction.

Indefatigability of nerve.

Excitation of muscle by constant current; Polar excitation of a muscle.

Electrotonus. Electrotonic changes in excitability and conductivity of a nerve.
Kuhne's experiment of contraction without metals.
Examination of currents in muscle, nerve and heart by means of the reflecting galvanometer.
Frog's heart—Minimal stimulus causes maximal contraction. "Staircase effect." Single contraction of the ventricle. Tetanisation. Refractory period. Stimulation of the vagus. Action of drugs (Muscarin and Atropin) on the heart.
Voice and Speech: Laryngoscope.
Vision: Opthalmoscope; Perimeter.

NOTIFICATION.

English Teachership Examination, 1907.

THE examination will be partly written and partly oral and practical.

2. The written examination will be held at the Training School at Calcutta on the 2nd December 1907 and the two following days. Three papers will be set, as shown below :—

								Marks.
I.—Art of teaching,	2nd December,	10	A.M. to	2	P.M.	...	...	100
II.—Discipline,	3rd „	10	„	2	„	...	...	100
III.—Organisation,	4th „	10	„	2	„	...	...	100

3. The oral and practical examination will be in actual class teaching and in notes of lessons. The necessary arrangements for holding this examination will be made by Inspectors of Schools. One hundred marks will be assigned to this examination.

4. In the case of a candidate who is a teacher, the Inspector may, at his discretion, conduct the practical examination at the candidate's own school. This examination may be conducted any time in the month of December 1907.

5. Candidates obtaining 50 per cent. of the marks or upwards in each of the subjects, both written and practical, will be declared to have passed, and will be granted English Teachership Certificates, under the signature of the Director of Public Instruction.

6. Candidates for first-grade certificates must have passed the B. A. examination. Candidates for second-grade certificates must have passed the F. A. examination, and served as teachers for at least three years. Candidates for third-grade certificates must have passed the Entrance examination, and served as teachers for at least three years.

A teacher who has held a certificate of a certain grade with credit for five years, will also be permitted to compete for the next higher grade of certificate, if his capacity as a teacher and his knowledge of the subjects of examination are certified as satisfactory by the Inspector of Schools.

7. Candidates for the examination should apply, on or before the 2nd November 1907, to the Head Master of the Training School at Calcutta, and should send a fee of Rs. 5 at the same time.

8. Candidates who have failed at a previous examination will be admitted to the examination, if they have worked as teachers for at least six months since their failure.

9. Further particulars regarding the examination will be supplied on application by Head Masters of Training Schools.

NOTIFICATION.

THE ELLIOTT PRIZE FOR SCIENTIFIC RESEARCH FOR 1907.

WITH reference to Notification No. 5058F. in the *Calcutta Gazette* of the 28th December 1892, Part I, page 1172, the Elliott Prize for Scientific Research will be given this year to the author of the best original essay composed during the year 1907, giving the results of original research or investigation by the essayist in Chemistry,

2. Any native of Bengal, including any Eurasian or domiciled European residing in Bengal, may compete for the prize.

3. The essays of competitors *must be* sent to the President of the Asiatic Society of Bengal, 57, Park Street, Calcutta, by the end of December 1907. The prize will be adjudged to the best competitor, and awarded publicly at the Annual General Meeting of the Asiatic Society in February 1908.

4. Preference will be given to researches leading to discoveries likely to develop the industrial resources of Bengal. In the case of no essay being deemed by the Trustees to be of sufficient merit, no prize is to be awarded, but the amount is to be retained, so that in any future year two or more prizes may be given, or the prize may be enhanced in the case of an exceptionally good essay.

ASUTOSH MUKHOPADHYAY,
President of the Asiatic Society of Bengal.

NOTICE.

ENTRANCE EXAMINATION

A TEST-EXAMINATION of private students and school-masters for admission to the ensuing Entrance examination will be held at the Office of the Inspector of Schools, Presidency Division, 12 Dalhousie Square, Calcutta, on Monday, the 9th, and Tuesday, the 10th December 1907. Such candidates only as reside in any of the districts of the Presidency Division, including Calcutta, will be admitted to the examination.

2. Candidates who do not appear from any recognised school, *i.e.*, who have not attended any recognised school since the 1st of September next preceding the examination, will be treated as private students. They will be required to furnish satisfactory proof that they have not read in any recognised school from that date. They should produce certificates of conduct and progress in studies from the authorities of the last school where they read, and also a certificate from other reliable authorities regarding conduct and progress after leaving school. The transfer certificates granted to them by the authorities of the schools in which they studied last, or the Registrar's receipt for the fee paid in the case of those candidates who previously appeared at the Entrance examination, must be submitted in original along with the application for permission to appear at the test-examination.

3. *Bond-fide* teachers employed in any of the schools in the Presidency Division may be admitted to the examination if they can produce certificates of service and character from their employers or from the Deputy Inspector of the district concerned.

4. Each candidate should submit to this office, not later than the 18th November 1907, his application for admission to the test-examination, stating the following particulars:—

(1) Age, ( ) residence, (3) father's name (4) second language besides English, and (5) whether he appeared at any previous Entrance examination.

5. The admission-fee for the examination is Rs. 4 for each candidate, and is to be remitted with the application within the prescribed date, after which a fine of Rs 2 is to be imposed for each week's delay.

6. No private student will be admitted to the test-examination unless accompanied, for the purpose of identification, by some person known to this office.

7. Candidates who are sent up by this office must appear at the Calcutta Examination Centre.

8. Those who reside at a distance from Calcutta may, with special permission, present themselves at the test-examination held by the head-master of the nearest zilla or Government high school under the control of the Inspector of Schools, Presidency Division, on condition that they appear at the centre selected by the candidates from that institution. The head-master of such school is hereby authorized to sign the applications, which must afterwards be countersigned by the undersigned. The fees and fines paid by these candidates as per paragraph 5 above should be utilized in meeting the cost of the examination.

9. The Entrance examination in 1908 will be held on the 2nd March 1908 and following days.

10. Applications and fees for admission to the examination must reach the Office of the Registrar on or before the 2[illegible]th January 1908.

F.A. AND B.A. EXAMINATIONS.

Deputy Inspectors, Sub-Inspectors, and *bond-fide* teachers of English schools in the Presidency Division who have served as such for full two academical years, or for six months in the case of those who were admitted to a former examination of the same class, will be admitted to the above examinations on production of certificates of character and length of service (with dates) from their employers. *Their applications must reach this office on or before the 10th January 1908.*

1. In accordance with section 9, Chapter XV, of the Revised Regulations dealing with the registration of University students, all candidates, who intend to appear at any of the ensuing examinations of the University of Calcutta otherwise than as students of some affiliated institutions and who have applied for or have obtained the special permission of the Senate for the purpose, are required to apply to the Registrar of the Calcutta University for the registration of their names as University students. No person will be deemed a "University student" unless and until his name has been duly registered, and none but "University students" will be eligible for admission to any University examination other than the Entrance or Matriculation. A registration fee of Rs. 2 must accompany every application.

2. Candidates for the B.A. examination must send their F.A. Certificates, and candidates for the F.A. examination their Entrance Certificates, together with a letter, in original, from the Senate of the Calcutta University, permitting them to appear at the examination.

3. Candidates should carefully read the printed form of application and supply all the informations required by the University, including the Registrar's receipt in the case of those school-masters who were admitted to a previous examination of the same class.

4. The F.A. and B.A. examinations in 1908 will be held on the 23rd March 1908 and following days.

5. Applications with the countersignature of the undersigned and fees for admission to the above examinations must be sent to the *Office of the Registrar on or before the 8th February 1908* by the candidates direct.

I.—ENGINEER DEPARTMENT.

[Affiliated to the Calcutta University.]

A four-year course leading to the Bachelor of Engineering Degree in *Civil Engineering*. It is proposed to offer in addition parallel courses leading to the Bachelor Degree in *Electrical and Mechanical Engineering* and in *Mining Engineering*.

Admission qualification—The First Arts Examination of the Calcutta University, or its equivalent.

Admissions—1st Monday in June.

II.—APPRENTICE DEPARTMENT.

Section I.—The Sub-Overseer Classes.

A course of two Academic years leading to the Sub-Overseer Examination.

Admission qualification—

To the 1st-year class—Matriculation Examination of the Calcutta University, Middle School Examination or equivalent.

To the 2nd-year class—The Final Examination of B Course of Zilla Schools.

Admissions— To 1st year on 1st Monday in June.
To 2nd year on 1st Monday in May.

Section II.—The Overseer Classes.

A course of two Academic years leading to the Final or Overseer Examination.

Offered in two branches—

(*a*) General Engineering, leading to Overseer Certificate.
(*b*) Mining, leading to the College Diploma in the Principles of Mining.

Admissions—On 1st Monday in May.

Qualification—The passing of the Sub-Overseer Examination.

Section III.—Practical Workshop Training.

[Lasting about 16 months.]

For General Branch only leading to the certificate of Foreman Mechanic or Upper Subordinate.

III.—WORKSHOPS.

Artisan Classes in the following shops :—

Carpenters';	Fitters';	Machine, and
Blacksmiths';	Turners';	Foundry.

Also a class for the training of *Motor Driver Mechanics.*

The following notification, issued by the *Gazette of India*, Legislative Department, is republished.

E. A. GAIT,
Offg. Chief Secy. to the Govt. of Bengal.

The 26th July 1907.

No. 13.—Whereas by resolution passed by the Secretary of State for India in Council on the 29th day of February 1872, the provisions of section 1 of the Government of India Act, 1870 (33 Vict., c 3), were declared applicable to the Sonthal Parganas;

And whereas the Lieutenant-Governor of Bengal has proposed to the Governor-General in Council a draft of the following Regulation, together with the reasons for proposing the same;

And whereas the Governor-General in Council has taken the draft and reasons into consideration, and has approved of the draft and the same has received the assent of the Governor-General on the 24th day of July 1907;

In pursuance of the direction contained in the said section, the said Regulation is now published in the *Gazette of India* :—

REGULATION No. III OF 1907.

A Regulation to amend the Sonthal Parganas Rent Regulation, 1886.

WHEREAS it is expedient to amend the Sonthal Parganas Rent Regulation, 1886, in manner hereinafter appearing; It is hereby enacted as follows :— II of 1886.

1. This Regulation may be called the Sonthal Parganas Rent (Amendment) Regulation, 1907.

Short title.

2. After section 19 of the Sonthal Parganas Rent Regulation, 1886, the following shall be inserted, namely :— II of 1886.

Additions of new sections after section 19, Regulation II, 1886.

"19A. Notwithstanding anything contained in section 6 or section 18, the zamindar or other proprietor of a village may at any time apply to the Deputy Commissioner for the enhancement of the rent of the village or of any holding situate therein, on the ground that since such rent was adjustd and recorded by the Settlement-officer under the Sonthal Parganas Settlement Regulation, or since a table of rates and rent roll were published under section 17 the productive powers of the land in such village or holding have been increased by an improvement effected by, or at the expense of, the zamindar or other proprietor :

Application for enhancement of rent of village on ground of proprietor's improvement.

III of 1872.

Provided that in case of villages which are in the lease or management of a manjhi or headman, the zamindar or other proprietor has obtained the consent of the Deputy Commissioner prior to effecting the improvement, and that the improvement is of so substantial a nature as beneficially to effect a considerable proportion of the lands in the village.

Explanation.—The provision of security against failure of crops from drought or inundation shall be deemed to be equivalent to an increase in the productive powers of the land for the purposes of this section.

Procedure on such application and order of enhancement.

"19B. (*1*) If after enquiry the Deputy Commissioner finds that the productive powers of the land have actually been so increased in a permanent manner, the Deputy Commissioner may, by order in writing, enhance the rent which has been declared by the Settlement-officer to be payable, or which is entered in the rent-roll, as the case may be:

Provided that, where the Deputy Commissioner considers that the immediate enforcement of the full enhancement adjudged is likely to be attended with hardship, he may direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the full enhancement adjudged has been reached.

(*2*) Where the Deputy Commissioner enhances rent under the provisions of sub-section (*1*), he shall, in his order, declare the date from which such enhancement shall take effect.

Rules determining amount of enhancement.

"19C. In determining the amount of enhancement the Deputy Commissioner shall have regard to—

(*a*) the increase in the productive powers of the land caused by the improvement;

(*b*) the cost of the improvement;

(*c*) the existing rent and the ability of the land to bear a higher rent; and

(*d*) the expense which the raiyat has to incur in order to be able to utilize the improvement.

III of 1872

Disposal of applications under section 19A during settlement-proceedings.

"19D. Any application under section 19A, for the enhancement of the rent of a village or of any holding situate therein, which is made to or pending before the Deputy Commissioner while a settlement is being made of such village under the Sonthal Parganas Settlement Regulation, shall be transferred by him to the Settlement-officer for disposal.

III of 1872.

Duration of enhancement.

"19E. Where rent has been enhanced under section 19B, on the ground of an improvement, no further enhancement shall be granted in respect of the same improvement until there is a re-settlement of the village under the Sonthal Parganas Settlement Regulation, or until a fresh table of rates and rent-roll are published under section 17:

Provided that any person by whom such rent is payable may at any time apply to the Deputy Commissioner to have the enhancement reduced or annulled on the ground that the improvement has not produced, or has ceased to produce, the estimated effect.

Saving where raiyat contributes towards cost of improvement.

"19F. Where a raiyat, having entered into an agreement with the zamindar or other proprietor of a village to contribute towards the cost of an improvement, the share thereof which is fairly debitable to his holding, has paid the amount of such share to the zamindar or other proprietor, the rent of his holding shall not be enhanced under the provisions of section 19B in respect of the said improvement."

II of 1886.

Addition of new heading and section after section 25, Regulation II, 1886.

3. After section 25 of the Sonthal Parganas Rent Regulation, 1886, the following shall be inserted, namely:—

Acquisition of land for buildings and other purposes.

Acquisition of land by proprietor of village for buildings and other purposes.

"25A. (*1*) The zamindar or other proprietor of a village, who is desirous of acquiring the holding or part of the holding of any raiyat in such village, or any land over which the inhabitant of such village have any common right, for any reasonable purpose having relation to the good of the holding, village or estate, or for the erection of buildings, or for any religious, educational or charitable purpose, may apply to the Deputy Commissioner for authority to acquire the same.

(*2*) On being satisfied that the purpose stated in the application made under sub-section (*1*) is reasonable and sufficient, and that the objections, if any, taken to the application are such that they may fairly be disregarded, the Deputy Commissioner may authorise the applicant to take possession of the land on such terms and on payment to the raiyat or other persons interested (if any) of such compensation as he thinks fair and reasonable."

SANITARY.

Simla, the 9th August 1907.

No. 1214.—In exercise of the powers conferred by section 2, sub-section (1), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor-General in Council is pleased to direct that, until further orders, the Haj will be open to any resident in India, subject to the conditions—

(1) that no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the port of Bombay in the Presidency of Bombay;

(2) that before the pilgrims embark the ships chartered for Jedda shall be thoroughly cleansed and freed from rats by means of the Clayton process under the personal direction of the Port Health Officer;

(3) that ample hospital accommodation shall be provided on board;

(4) that before embarkation pilgrims shall be medically inspected and their clothes and baggage disinfected as in the case of third-class passengers on ordinary steamers;

(5) that the ships shall undergo further medical inspection both at Aden and at Perim; and

(6) that if plague is found to be present on a pilgrim vessel arriving at Aden, telegraphic information shall be sent to Perim, where the vessel shall be treated as an infected ship under article 21 (3) of the Paris Convention of 1903, and the measures prescribed in that article shall be strictly carried out, a similar treatment being accorded to vessels on which plague is first discovered at Perim.

2. The orders contained in the Home Department Notification No. 1749, dated the 28th September 1906, are hereby cancelled.

3. A fully-equipped plague observation station for pilgrims will be established at Perim by the Government of Bombay at the commencement of each pilgrim season capable of receiving an entire shipload of pilgrims from a plague-infected vessel for treatment under article 21 of the Paris Convention of 1903.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the East Indian Railway, in the district of Patna, will be put up to sale at 12 o'clock on 27th August 1907, corresponding with the 4th Bhadon 1314 Fusli, at the Patna Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

NOTICE of Application under the Indian Electricity Act, 1903, for a license for the supply of energy for electric traction, for the general supply of energy to the public and for the supply of energy to particular customers under special agreement within the Dakhineswar Magazine, the Government Dockyard, Kidderpore, the Station Hospital, the Military Burial-ground, Bhowanipore, the Ballygunge Body-Guard Lines, the Native Infantry Hospital, Alipore, the Native Infantry Lines Alipore, the Army Clothing Agency, Alipore, and the Remount Depot, Garden Reach and portions of the Calcutta Maidan and of Hastings, and also to convey and transmit energy from generating stations outside the area of supply to the boundary of the area of supply.

NOTICE is hereby given that, in pursuance of section 40 of the Indian Electricity Act, 1903, an application has been made to the Governor-General in Council by the Calcutta Electric-Supply Corporation, Limited, a Company incorporated under the English Companies Acts, 1862 to 1890, and having the Registered Office at Salisbury House, London Wall, London, E. C., and having accredited agents in Calcutta, namely, Messrs. Kilburn & Co., of No. 4, Fairlie Place, Calcutta, through their agents, Messrs. Kilburn & Co., for a license under section 4 of the said Act for the supply of energy for electric traction, for the general supply of energy to the public, and for the supply of energy to particular customers under special agreement within the area of supply hereinafter mentioned, and also to convey and transmit energy from generating stations outside the area of supply to the boundary of the area of supply.

Proposed Area of Supply.—The proposed area of supply consists of—

(1) The Dakhineswar Magazine.
(2) The Government Dockyard, Kidderpore.
(3) The Station Hospital.
(4) The Military Burial-ground, Bhowanipore.
(5) The Ballygunge Body-Guard Lines.
(6) The Native Infantry Hospital.
(7) The Native Infantry Lines, Alipore.
(8) The Army Clothing Agency, Alipore.
(9) The Remount Depôt at Garden Reach.

(10) Those portions of that part of Hastings lying south of the southern edge of Clyde Row and the new road leading to the river at Tukta Ghat which are more particularly delineated and coloured red on the large scale inset in the map forwarded by the applicants with their application, and known respectively as the Marine Officers' Quarters, the New Medical Stores, the Commissariat Stores, the Marine Dockyard Quarters, the Commissariat Barracks, the Commissariat Lines, the Commissariat Gowkhana and the Commissariat Slaughter House.

(11) The following portion of the Calcutta Maidan (including all such portion of Hastings as may be within the boundaries hereinafter specified, namely :—

(*a*) The whole of that portion of the said Maidan which is bounded by a line running northward from Tukta Ghat along the high-water mark of the left bank of the river Hooghly to Prinsep's Ghat; thence by the southern edge of the road bounding old Prinsep's Ghat on the north to the Magdala Statue; thence southward along the eastern edge of St. George's Gate Road to Clyde Row; thence westward along the southern edge of Clyde Row to the point where it meets Napier Road; thence northward by the western edge of Napier Road to its junction with the new road to the river; thence westward by the south edge of the new road to the river to Tukta Ghat.

(*b*) The whole of St. George's Gate Road from the points where it meets Kidderpore Road to its junction with Clyde Row.

(*c*) The whole of that portion of the said Maidan which is bounded by a line drawn from the western edge of the northern end of Kidderpore Bridge northward along the western edge of the Kidderpore Road to the Dufferin Statue; thence by the western edge of the Red Road to the Lawrence Road; thence by the southern edge of the Lawrence Road to the Lawrence Statue; thence eastward by a line drawn from the Lawrence Statue past the northern edge of the Hardinge Statue to the junction of the Ochterlony Road with Government Place, East; thence northward along the eastern edge of Government Place, East, to the point where it meets Esplanade Row; thence eastward along the northern boundary of the Maidan between Government Place, East, and Chowringhee Road to Chowringhee Road; thence southward along the western edge of Chowringhee Road to its junction with Lower Circular Road; thence westward along the southern edge of Lower Circular Road to its junction with Zeerut Bridge Road; thence southward along the eastern edge of Zeerut Bridge Approach Road to the Zeerut Bridge; thence westward from the eastern edge of the northern end of the Zeerut Bridge along the low-water mark of the northern bank of Tolly's Nullah to the western edge of the northern end of the Kidderpore Bridge.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

WEDNESDAY, AUGUST 14, 1907.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secy. to the Govt. of Bengal.

CALCUTTA, *the 9th August 1907.*

INDIA—WEST COAST.

Jaigarh Light—Alteration in character—.

No. 374 (first publication).—With reference to Notice to Mariners No. 349, dated the 26th July 1907, issued by this office, the Government of Bombay has given further notice (No. 87 of 1997) that the occulting screen of the Jaigarh outer light was removed on the 7th July 1907.

The character of this light has now been altered from white occulting to a white fixed light; in other respects it remains as before.

Approximate position :—

Latitude	...	...	...	... 17° 18′ N.
Longitude	...	...	...	... 73° 11′ E.

This Notice affects the following Admiralty Charts:—Arabian Sea, No. 1012; Karachi to Vengurla, No. 826; Gulf of Cutch to Viziadrug, No. 2736; Boria Pagoda to Achra river, No. 739; and Jaigarh or Jyghur and entrance to Shastri or Sangameswar river, No. 247; also, West Coast of Hindustan Pilot, 1898, page 181, and Admiralty List of Lights, Part VI, 1907, No. 250.

EASTERN ARCHIPELAGO—CELEBES ISLAND—EAST COAST.

Tukang Besi Islands—Shoals westward of—.

No. 375 (first publication).—The British Admiralty has given notice No. (928 of 1907) of the existence of the undermentioned shoals to the westward of Tukang Besi Islands:—

(*a*) A reef extending in a west-north-westerly and east-south-easterly direction, with very little water over it, the western end of which is situated in approximately lat. 5° 29½′ S, long. 123° 26′ E.

(*b*) A reef about 5 miles long in a north-westerly and south-easterly direction, and 3 miles broad, the centre of which is situated in approximately lat. 5° 53½′ S., long. 123° 42½′ E.

(*c*) A reef about 5½ miles long in a north-easterly and south-westerly direction, and 2 miles broad, the north-eastern point of which is situated at a distance of 8 miles, S. 84 W., from the north point of Binongka island, and the centre in approximately lat 5° 55′ S., long. 123° 49′ E.

(*d*) A reef about 2½ cables in diameter exists in approximately lat. 5° 54½′ S., long. 123° 53′ E.

The above dangers are partially dry, and their limits are indicated by discoloured water

(*e*) Between the positions of lat. 5° 31′ S., long. 123° 31′ E., and lat. 5° 57′ S., long. 123° 41½′ E., are several reefs, the positions and limits of which are not yet determined. A danger line between these positions has, therefore, been substituted for that at present shown on the chart.

(*Variation 2° Easterly in 1907.*)

This Notice affects the following Admiralty Charts:—Australia northern portion, No. 2759A; China sea, No. 1263; Eastern Archipelago, No. 942A; Tomori gulf to Salayar strait, No. 3616: Also Eastern Archipelago, Part II, 1904, page 361.

GULF OF ADEN—Sokotra, south coast.

The Brothers—Non-existence of Coral Patch reported eastward of.

No. 376 (first publication).—With reference to Notice to Mariners No. 252, dated 31st December 1897, issued by this office, the British Admiralty has given further notice (No. 930 of 1907) that information has been received from Commander F. H. Walter, H. M. Surveying Vessel *Merlin* that he has made a close and careful search over an area of 200 square miles without success for the coral patch reported by the Master of the German steam-vessel *Hertha*, in 1897, in approximately lat. 12° 8′ N., long. 53° 50½′ E.

Although the weather was fine and clear, and the bottom visible at depths of 16 and even at 20 fathoms, no indication of any danger was observed. It is therefore probable that the Master of the *Hertha* was deceived by the appearance of a discolouration of the water, as he got no soundings and only stated that he saw a bank. This shoal has in consequence been erased from the charts.

This Notice affects the following Admiralty Charts:—Indian ocean, northern portion, No. 748b; Delagoa bay to cape Guardafui, No. 597; gulf of Aden, No. 1012; gulf of Aden, sheet I, No. 6a; Sokotra, No. 5: also Red Sea and Gulf of Aden Pilot, 1900, page 408.

CHINA, EAST COAST—Shantung Promontory.

Sangkau Bay—Shoal reported in.

No. 377 (first publication).—The British Admiralty has given notice (No. 932 of 1907) that the S.S. *Hino Maru*, drawing 18 feet, is reported to have struck on a shoal, in Sangkau bay, in a position situated at a distance of about $3\frac{4}{10}$ miles N. 85° E. from Lao shan peak (545 feet).

Approximate position, lat. 37° 6½′ N, long. 122° 29½′ E.

This shoal has been placed on the chart as a rock with less than 6 feet over it, and marked P.D.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Shantung promontory, No 1255; Shitau bay to North-east promontory, No. 3491: also China Sea Directory, vol. III, 1904, page 551; and Supplement, 1907, page 105.

PACIFIC OCEAN—Hawaiian islands.

Laupahuhu, Pepeekeo and Paukaa lights—Colours altered.

No. 378 (first publication).—The British Admiralty has given notice (No. 938 of 1907) that it is intended, about 1st July 1907, to alter Laupahuhu light, Hawaii, from red fixed to *white fixed.*

Approximate position, lat. 20° 0′ N., long. 155° 16′ W.

Also, on the same date, to alter the colour of Pepeekeo light, Hawaii, from white to *red fixed.*

Approximate position lat. 19° 51′ N., long. 155° 7′ W.

Also, on the same date, to alter the colour of Paukaa light, Hilo bay, Hawaii, from green fixed to *white fixed*.

Approximate position, lat. 19° 46′ N., long. 155° 6′ W.

This Notice affects the following Admiralty Charts :—Sandwich islands, No. 1510; plan of Hilo bay on No. 1377: also List of Lights, Part VII, 1907, Nos. 532, 531, 529; Pacific Islands, vol. III, 1900, pages 202, 203, 201; and Supplement, 1903, page 14.

AFRICA, EAST COAST—Fernando Veloso Bay.

Belmore Harbour—Anchorage Beacons.

No. 379 (first publication).—The British Admiralty has given notice (No. 940 of 1907) that two white triangular marks have been affixed to two bare trees, on the sands near Utuku, on the eastern side of Belmore harbour. These marks in line lead to the anchorage in 15 fathoms at low water. The exact positions of these marks are not stated. A note has therefore been placed on the chart.

Approximate position, lat. 14° 23′ S., long. 40° 42′ E.

This Notice affects the following Admiralty Chart :—Mozambique harbour to Ras Pekaw with plan of Belmore harbour, No. 1809: also Africa Pilot, Part III, 1905, page 303.

CHINA, SOUTH-EAST COAST—Port Swatau approach.

Good Hope Cape—Shoals off.

No. 380 (first publication).—The British Admiralty has given notice (No. 942 of 1907) of the existence of a shoal, named Williams rocks, off Good Hope cape, in the approach to port Swatau. This shoal, which consists of boulders lying on a muddy bottom, has three heads, with depths of 4, 4½, and 5 fathoms over them at low water; the 4-fathom head is situated in a position from which Good Hope cape light-house bears West, distant 4½ cables, and Green island submit N. 43° W.

Approximate position on chart No. 854, lat. 23° 14½′ N., long. 116° 48¾′ E.

The 4½-fathom and 5-fathom heads are situated at distances of about half a cable N. 9° E. and 1½ cables N. 22° E respectively from the above position.

Sugarloaf light-house in line with the east side of Bill island, bearing N. 33° W., leads about 1½ cables eastward of the shoals.

(*Variation Nil in 1907.*)

This Notice affects the following Admiralty Charts :—Namoa island, No. 1957; port of Swatau, No. 854: also China Sea Directory, vol. III, 1904, page 148.

CHINA, EAST COAST—Yang tse Kiang.

Wusung River Bar—Regulations for crossing.

No. 381 (first publication).—The British Admiralty has given Notice (No. 945 of 1907) that, in order to prevent accidents to vessels crossing the inner and outer bars of the Wusung river, the following regulations were put into force July 1906, and must be strictly adhered to by Mariners :—

(1) A careful look-out is to be kept on approaching the Wusung bars by inward-bound vessels when about a mile below the outer bar, and by outward-bound vessels when abreast of the southern end of Gough island :—

(*a*) Vessels having the tide against them must wait for vessels having a fair tide.

(*b*) Overtaking vessels must regulate their speed to allow overtaken vessels to clear the bars first.

(2) Captains and pilots are not to attempt to cross either bar when the signals at Wusung indicate less water than their vessels are drawing. Sometimes, however, a greater depth can be obtained by not following the bar-leading marks. Captains and pilots desiring to avail themselves of this information should apply to the Harbour Master's Officer at Shanghai, or to the Berthing Officer at Wusung shortly before they wish to cross the bar.

(3) Vessels anchoring outside Wusung must take up a berth well clear of leading marks over the outer bar in order to avoid all risk of collision with vessels crossing the bar.

Approximate position Wusung, lat. 31° 23′ N., long. 121° 29′ E.

This Notice affects the following Admiralty Chart:—Wusung river, No. 1601: also China Sea Directory, vol. III, 1904, pages 413, 415.

BAY OF BENGAL—Burma coast—Rangoon river.

Lighted Fairway buoy—Position.

No. 382 (first publication).—The Principal Port Officer, Burma, has given notice (Channel Circular No. 99 of 1907) that the Lighted Fairway buoy recently placed on the station has been laid about 400 feet to the northward of the old buoy, which has been removed.

AUSTRALIA, SOUTH—Spencer Gulf.

Lowly Point Light—Alteration intended.

No. 383 (first publication).—The President, Marine Board, Port Adelaide, has given notice (No. 5 of 1907) that it is intended to alter the Lowly Point light so that its range of visibility may be increased by one and-a-half miles.

Operations will be commenced on or about the 1st October next, and for a period of about one month therefrom it is probable that the revolution of the light will be somewhat irregular.

A further notice will be issued when the improvements are effected.

This Notice affects Admiralty Chart No. 2389b.

BAY OF BENGAL—Chittagong coast

Karnafuli river—Depth of water in the channels.

No. 361 (second publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 27th July 1907:—

	Ft.	In.
Track No. I—Outer Bar—		
Disc on Diamond	13	0
Track No. II—Inner Bar—		
Disc on Diamond	10	9
Batten Beacon on Pillar	11	6

Triangle on Cross and Ball	16	6
Track No. IV—Guptakhali Crossing—		
Tripod on Cross and Ball and Diamond	20	0

JAPAN, SOUTH COAST—Gulf of Tokyo.

Shina Gawa Bay—Wreck in—.

No. 362 (second publication).—The British Admiralty has given notice (No. 892 of 1907) that the wreck of a sailing vessel with one mast above water lies sunk in Shina gawa bay, in a position situated 14½ cables S. 15° E. from Shina gawa lighthouse.

Approximate position, lat. 35° 36½′ N., long. 139° 45¾′ E.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Chart:—Gulf of Tokyo, No. 2657: Also, Sailing Directions for Japan, &c., 1904, page 373.

CHINA SEA—TAIWAN (FORMOSA) WEST COAST.

Nan wan and Haikau wan—Particulars of shoals in—.

No. 363 (second publication).—The British Admiralty has given notice (No. 893 of 1907) containing particulars regarding certain shoals in Nan wan and Haikau wan, as follows:—

NAN WAN—

(*a*) A shoal, with a depth of 3¼ fathoms over it, exists in Taihanroku anchorage, in a position situated at a distance of 1⅛ cables S. 25° E. from East rock. This shoal is connected to the northward with East rock, but to the southward it is steep-to, the depth increasing suddenly to 12 fathoms.

(*b*) A shoal, with a depth of 3 fathoms over it, exists in Taihanroku anchorage, in a position from which West rock bears S. 55° W., distant 3¾ cables, and Baan rock N. 1° E. This rock is half a cable long in a north-easterly and south-westerly direction, and a quarter of a cable broad, and is steep-to.

Approximate position, lat. 21° 57½′ N., long. 120° 45½′ E.

With reference to Notice to Mariners No. 442 of 1906 (No. 199, dated 1st June 1906, issued by this office):—

(*c*) An examination of the danger given in the above-mentioned Notice shows that it is a pinnacle rock, now named Daifuseki, with a depth of about 5 feet over it, in a position situated at a distance of $3\frac{5}{10}$ miles N. 65° W. from Nan sha light. The depths around it are irregular.

Approximate position, lat. 21° 56′ 30″ N., long. 120° 47′ 5″ E.

HAIKAU WAN—

1. A shoal, named Tsuikinosa, with a depth of 3 feet over it, exists in Haikau wan, in approximately lat. 22° 6′ 35″ N., long 120° 42′ 10″ E. This shoal, which is about 4 cables long in a northerly and southerly direction, and one cable broad, has depths of 5 fathoms around it.

2. The undermentioned dangers have been searched for without success, and as they are unknown to the local fisherman, it is considered that they do not exist; they have in consequence been expunged from the charts:—

   (*a*) The shoal, of 2½ fathoms, in approximately lat. 22° 7′ N., long. 120° 41′ E.

   A depth of 19 fathoms has been obtained over this position.

   (*b*) The bank of 9 fathoms, marked P.D., in approximately lat. 22° 8′ N. long. 120° 39′ E.

   A depth of 67 fathoms was obtained over this position.

(*Variation 1° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Formosa island and strait, No. 1968; plan of Taihanroku anchorage on chart No. 1641: Also, China Sea Directory, vol. III, 1904, pages 238, 239; and Supplement, 1907, page 58.

CEYLON—SOUTH COAST.

Point de Galle harbour—Shoal in approach,—Intended buoyage.

No. 364 (second publication).—With reference to Notices to Mariners No. 302, dated 22nd June 1907, and No. 324, dated 6th July 1907, issued by this office, the British Admiralty has given further notice (No. 897 of 1907) that information, dated 4th June 1907, has been received from Commander H. B. T. Somerville, H. M. Surveying vessel *Sealark*, of the existence of a shoal, with a least depth of 22 feet over it, in the approach to Point de Galle harbour, situated in a position from which Point de Galle lighthouse bears No. 34° W., distant $5\frac{4}{10}$ cables, and the eastern extremity of Gibbet island N. 35° E.

Approximate position, lat. 6° 1′ N., long. 80° 13′ E.

Also, the Government of Ceylon has given Notice that about the middle of November next the undermentioned buoys will be established as follows:—

(*a*) A red spherical buoy will be placed near Bloomfield rock, situated at a distance of $6\frac{1}{10}$ cables S. 50° E., from Point de Galle lighthouse.

(*b*) A black spherical buoy will be placed near Sealark rocks, situated at a distance of $5\frac{1}{10}$ cables S. 33° E., from Point de Galle lighthouse.

(*c*) A green buoy will be placed to the southward of the midships section of the wreck of the *Secundra*, in place of the two red buoys now marking the position.

Further Notice will be given when the above buoys have been established.

(*Variation 1° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Approaches to Point de Galle, No. 819; Point de Galle harbour, No. 820: also Bay of Bengal Pilot, 1901, page 85; and West Coast of Hindustan Pilot, 1898, page 83.

AUSTRALIA, EAST COAST—Coral sea.

Bellona Reef—Sand cay reported.

No. 365 (second publication).—The British Admiralty has given Notice (No. 900 of 1907) that a sand cay, about 6 feet high, and 2½ cables long, and surrounded by breakers which extend for a long line in a north-westerly direction, is reported to exist to the eastward of Middle Bellona reef, in approximately lat. 21° 21′ S., long. 159° 37′ E.

This Notice affects the following Admiralty Charts:—Pacific ocean, No. 780; Coral sea, No 2763: also Australia Directory, vol. II, 1898, page 531; and Supplement, 1900, page 35.

AFRICA—EAST COAST.

Pungue River Entrance—Shoal reported in—

No. 366 (second publication).—The British Admiralty has given notice (No. 911 of 1907) that the Commanders of the S.Ss. *Princesse* and *Clan Macdougal* report having touched on a shoal, with a depth of 3 fathoms over it, to the eastward of the Pungue river entrance, at a distance of about 2 miles south-eastward from the black conical buoy A. From it Macuti point light bears between N. 22° W. and N. 34° W., distant about 8 miles. This shoal will be examined.

Approximate position, lat. 19° 56½′ S., long. 34° 59½′ E.

(*Variation 15° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Delagoa bay to river Zambesi No. 648; Beira harbour, No. 1063: Also, Africa Pilot, Part III, 1905, page 224.

KOREA, WEST COAST—Chemulpho approach.

Hoku Choshisho (North Watcher) Light—Intended alteration.

No. 367 (second publication).—With reference to Notice to Mariners No. 325, dated 9th October 1903, issued by this office, the British Admiralty has given further Notice (No. 912 of 1907) that the character of Hoku Choshisho (North Watcher) light, in the approach to Chemulpho, will shortly be altered from flashing to *white fixed.*

Approximate position, lat. 37° 19¾′ N., long. 126° 28¾′ E.

This Notice affects the following Admiralty Chart:—Chemulpho anchorage, No. 1270: Also, List of Lights, Part VI, 1907, No. 912; and Sailing Directions for Korea, &c., 1904, page 57.

JAPAN—South-west coast.

Me sima—Non-existence of shoal southward of—.

No. 368 (second publication).—With reference to Notice to Mariners No. 316, dated 12th August 1905, issued by this office, the British Admiralty has given further notice (No. 914 of 1907) that a careful examination has been made over an area of some miles in extent for the shoal reported by the Master of the British S.S. *Thomas Turnbull* to exist to the south-eastward of Me sima, in approximately lat. 31° 49′ N., long. 128° 28′ E., a sounding of 107 fathoms, sand bottom, being obtained in this position.

No indication of any danger was observed, which, had it existed, would have manifested itself, in consequence of the prevalence of rough weather at the time when this search was being made; the local fishermen also appear to be unacquainted with any danger in this locality. Under these circumstances it is considered that this shoal does not exist. It has therefore been expunged from the charts.

This Notice affects the following Admiralty Charts :—Pacific, No. 2459; China sea, No. 1263; Nipon, &c, No. 2347; Amoy to Nagasaki, No. 2412; Western Coast of Nipon and Kiusiu, No. 358: Also, Sailing Directions for Japan, &c, 1904, page 588; and Supplement, 1906, page 41.

CHINA SEA—Singapore Strait.

Caution—Singapore Harbour Works.

No. 369 (second publication).—The British Admiralty has given notice (No. 919 of 1907) in which Mariners are cautioned to give the reclamation works, now in progress off Telok Ayer quay, a wide berth, as also all vessels displaying a red flag, which will be a mark to distinguish craft employed in connection with these works.

Approximate position, lat. 1° 17′ N., long. 103° 51′ E.

This Notice affects the following Admiralty Chart :—Singapore road, No. 1995: Also, China Directory, vol. I, 1906, page 243.

AUSTRALIA—Victoria—Port Phillip.

Altona shoal—Buoy replaced by light-buoy.

No. 370 (second publication) —With reference to Notice to Mariners No. 316, dated 5th July 1907, issued by this office, the British Admiralty has given further notice (No. 923 of 1907) that the project of establishing a light beacon on the extremity of the shoal extending from Altona, port Phillip, having been abandoned, the black can-buoy marking the anchorage off Altona for vessels discharging explosives will be replaced on 22nd August next by a light-buoy exhibiting a *white fixed* light.

Approximate position of buoy, lat. 37° 53½′ S., long. 144° 51½′ E.

This Notice affects the following Admiralty Chart :—Port Phillip, No. 1171b: Also, Australia Directory, vol. I, 1897, page 464; and Supplement, 1900, page 17.

PACIFIC OCEAN—The Philippine islands—Negros, east coast.

Tañon Strait—Shoal in—.

No. 371 (second publication).—The British Admiralty has given notice (No. 927 of 1907) of the existence of a shoal, awash at low water, in Tañon strait, off the east coast of Negros island, situated in a position from which Tinaogan wharf bears S. 45° W., distance 2 miles, and Bagumbayan town N. 54° W.

This reef, which is about 1½ miles long in a northerly and southerly direction, consists of numerous heads, some of which are awash at low water, whilst others have depths of from 2 to 7 feet over them, with deep water between the heads. The channel between this reef and the coast of Negros island does not appear to be a safe one.

Approximate position, lat. 9° 49′ N., long. 123° 10′ E.

(Variation 1° Easterly in 1907.)

This Notice affects the following Admiralty Charts:—The Philippine islands, No. 943: Sulu or Mindoro sea, No. 2578: Also, Eastern Archipelago, Part I, 1902, page 275.

BAY OF BENGAL—Burma coast.

Caution—Bassein Upper Ridge Buoy adrift.

No. 372 (second publication).—A telegraphic communication has been received from the Principal Port Officer, Burma, that Upper Ridge buoy, Bassin, has gone adrift travelling, seawards.

Mariners are hereby warned.

CHINA—EAST COAST—Hong Kong.

Cape Collinson light—Alteration of—.

No. 373 (second publication).—The Harbour Master, Hong Kong, has given notice (No. 467 of 1907) that on and after 1st October 1907, Cape Collinson Light will be 4th order, occulting, visible 16 miles.

The new light will be exhibited from the existing tower, will show white and red between the same bearings as at present, and will be occulted for 3 seconds every 10 seconds.

During the work of alteration, the existing fixed light will be exhibited from a platform erected alongside the tower at the same elevation as at present.

INDIA WEST—Bombay (Goa) coast.

Marmugoa harbour approach—Black buoy marking the Marmugoa rock, replaced.

No. 347 (third publication).—The Bombay Government has given notice (No. 79 of 1907) that information, dated 23rd June 1907, has been received from the Captain of the Ports of Portuguese India, that the Black Can Buoy marking the Marmugoa Rock has been replaced.

Approximate position:—

Latitude	...	...	...	15° 25′ 15″ N.
Longitude	...	...	...	73° 46′ 36″ E.

This Notice affects the following Admiralty Charts:—Achra River to Cape Ramas, No. 740; and Aguada to St. George Islands, No. 492: Also West Coast of Hindustan Pilot, 1898, page 161.

INDIA, WEST—Bombay (Goa) coast—Aguada bay.

Mandavi river entrance—Lights extinguished.

No. 348 (third publication).—The Bombay Government has given notice (No. 80 of 1907) that information, dated 22nd June 1907, has been received from the Captain of the Ports of Portuguese India, that the 4 Lights exhibited at the entrance of the Mandavi river will be extinguished from the 1st July to 15th August 1907.

These Lights are named:—'Reis Magos,' 'Gaspar Dias,' 'Alto da Conceicao,' and 'Tejo.'

This Notice temporarily affects the following Admiralty Charts:—Achra River to Cape Ramas, No. 740; and Aguada to St. George Islands, No. 492: Also List of Lights, Part VI, 1907, No. 257, and West Coast of Hindustan Pilot, 1898, 4th edition, pages 164 and 166.

AUSTRALIA—Torres strait.

Decapolis reef—Head of beacon restored.

No. 351 (third publication).—With reference to Notice to Mariners No. 268, dated the 3rd June 1907, issued by this office, the Port Master, Brisbane, has given further notice (No. 7 of 1907) that the head of the Decapolis Reef Beacon, which was reported to be off, has now been restored.

EASTERN ARCHIPELAGO—Celebes island, east coast.

Tomori gulf and approaches—Existence and non-existence of certain shoals.

No. 352 (third publication).—The British Admiralty has given notice (No. 844 of 1907) of the existence and non-existence of the undermentioned shoals in the gulf of Tomori and its approaches:—

(*a*) Telegraph reef. This reef, originally reported in 1863, was unsuccessfully searched for in 1905, and has now again been looked for without any indication of its existence being discovered. As this danger is unknown to the natives in the vicinity it has been erased from the chart.

Approximate position, lat. 2° 10′ S., long. 121° 47′ E.

Whilst searching for this danger a shoal was found to exist in a position situated at a distance of 7 miles N. 68° E. from tanjong Bohunbelo, in approximately lat. 2° 0′ S., long. 121° 45′ E., on chart No. 3616.

(*b*) Tomori gulf. A reef about 1½ cables long in a north-west and south-east direction, and half a cable broad, with a least depth of 3 feet on it, exists in a position situated at a distance of 2 miles S. 2° E. from Batu island in the entrance to Tomori gulf.

Approximate position, lat. 1° 59½′ S., long. 121° 30½′ E.

At a distance of about 1 cable S. 68° W. from this reef, another reef exists with less than 3 fathoms over it.

(*c*) Tanjong Rata. Four reefs, with a depth of about one fathom over them, extend for a distance of about one mile from tanjong Rata; the westernmost reef being situated in approximately lat. 1° 35′ S., long. 122° 6½′ E., and the easternmost in lat. 1° 35′ S., long. 122° 8′ E. Between tanjong Rata and Teon depths of 10 to 12 fathoms were obtained, where the chart shows $\frac{1}{12}$ fathoms in lat. 1° 36′ S., long. 122° 6′ E.

(*d*) Peling strait. In the approximate position, lat. 1° 36′ S., long. 122° 20′ E., shown on the chart as dangerous, no bottom could be obtained with 100 fathoms of line.

The significations of dangers have consequently been erased from the Admiralty publications.

CHINA SEA—Cochin China.

Kam Ranh bay—Lights established.

No. 355 (third publication).—The British Admiralty has given Notice (No. 886 of 1907) that the undermentioned lights have been established in Kam Ranh bay as follows:—

(*a*) A *white fixed* light, elevated 192 feet above high water, and visible in clear weather from a distance of 12 miles from the bearing of N. 36° E., through north and west, to S. 54° E., has been established in a white masonry tower, 19 feet high, erected on the north-eastern extremity of Hon Chut, the light power being 430 candles. The light has a power of 590 candles between the bearings of S. 36° W., through west, to N. 54° W.

Approximate position, N.E. point of Hon Chut on chart No. 3028, lat. 11° 47½′ N., long. 109° 12½′ E.

(*b*) A *white fixed* light, elevated 251 feet above high water, and visible in clear weather from a distance of 8 miles from the bearing of N. 39° W., through north and east, to S. 54° E., has been established in a white masonry structure, 4 feet high, erected on the north-eastern point of entrance into the harbour situated at a distance of $2\frac{6}{10}$ miles N. 28° W. from the Observation spot. Its power is 80 candles.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE POLICE DEPARTMENT FOR THE YEAR 1906.

POLITICAL DEPARTMENT—POLICE.

Dated Calcutta, the 13th August 1907.

RESOLUTION—No. 3348P.

READ—

The Report on the Administration of the Police Department for the year 1906.

Read also—

The Report for the year 1905 and the Resolution of the Government thereon.

Mr. C. J. Stevenson-Moore, I.C.S., the permanent Inspector-General of Police, was on leave from the 28th March to the 11th December. During this period Mr. A. V. Knyvett, C.I.E., officiated for him. The report has been written by Mr. Knyvett.

2. *Strength of the Force.*—The reorganization of the superior staff of the Police force was sanctioned by the Secretary of State with effect from the 1st April. The new scheme provides for 4 (instead of 2) Deputy Inspectors-General, 45 (as against 35) Superintendents, and 46 Assistant Superintendents of Police, and also for the creation of a graded service of 21 Deputy Superintendents. The full number of officers thus sanctioned cannot be employed for some time to come. To recruit at once so large a number would lead to a serious block in promotion later on. Two Deputy Inspectors-General and five Superintendents were added during the year to the cadre; and eight Deputy Superintendents were appointed. One of the new Deputy Inspectors-General was placed in charge of the Railway Police and of the Criminal Investigation Department. The other was appointed to the newly-

created Burdwan Range. The reorganization of the subordinate establishment, involving an increase of 871 officers and men, was sanctioned towards the close of the year. Most of the vacancies have been filled up, but in the Burdwan and Presidency Divisions there is a difficulty in recruiting the requisite number of Bengali constables. The remedy lies in the recruitment of more up-country men. Revised rules for the recruitment of constables and of Sub-Inspectors are under consideration.

3. *Training Schools.*—Excellent work was done at the Police Training School at Bhagalpur, but the year's record was marred by an organized examination fraud on the part of the cadet Sub-Inspectors, who got from some corrupt press employés copies of the papers set for the Final Examination. The fraud was detected in time to prevent its benefiting those who had seen the papers; and suitable punishment was meted out to the ringleaders. During the year under review a third school for the training of constables was established at Ranchi. This school is intended primarily for recruits from the aboriginal tribes of Chota Nagpur. The reports on it and the older schools at Purulia and Bhagalpur are very satisfactory. More than two thousand constables were trained in them during the year.

4. *Discipline of the Force.*—The percentage of officers and men departmentally punished has risen from 12·9 and 10·1 in 1905 to 17·5 and 13·6 respectively. This is attributed to the stricter discipline which is now insisted on, in consequence of the recommendations of the Police Commission. The number of convictions under the Penal Code fell from 132 to 110, or about 0·5 per cent. As in the previous year, three cases of torture were brought against the Police. One of these was dismissed summarily; in another the accused were convicted; and in the third case, where the evidence was not sufficient to support a conviction in Court, departmental action is being taken. There were 32 charges of extortion against 37 in 1905. Of these, 20 either broke down or were compromised; and eight ended in punishment, judicial or departmental, against 13 of the previous year. The Inspector-General reports that the improved pay and prospects of the police are attracting a better class of candidates; and he anticipates that this and the closer and more systematic supervision that is now insisted on cannot fail to have excellent results. He states that active oppression on the part of the police is steadily diminishing.

5. *Health of the Force.*—The average daily percentage of sick in hospital was 1·8, but the number varied greatly from district to district. In Gaya it was only 0·3 per cent. against 22·1 in Birbhum. The Lieutenant-Governor cannot accept the explanation that the high figure for the latter district is due to its unhealthiness. The death-rate amongst the general population last year in Birbhum was only 39·94 per mille against 36·08 in the Province as a whole. The matter demands careful investigation.

6. *Town Police.*—The Town Police is still in a state of transition; and it has not been possible as yet to provide the full number of officers sanctioned. A proper system of patrolling has still to be introduced. This is an important matter which should receive special attention. Five hundred town chaukidars were replaced by constables during the year, and an equal number, it is reported, will be replaced this year.

7. *Rural Police.*—The enquiries which were set on foot with a view to improving the status of the Chaukidari Panchayats and strengthening their control over the chaukidars were completed during the year, and a Manual embodying the Lieutenant-Governor's orders on the subject is under issue. Difficulties appear to have arisen in some districts in connection with the new system; but these were due either to the orders not having yet been fully understood or else to sufficient trouble not having been taken to ensure that they were properly carried out. In many districts the new system is already working well; and there is no doubt that with care and tact the same satisfactory result can be attained elsewhere. The Lieutenant-Governor looks to the Inspector-General of Police to see that the orders which have been issued receive due attention; that the best men available are appointed as Presidents of panchayats; that after appointment they are treated with proper consideration; and that the local police are not allowed to worry them or to usurp their powers. His Honour is glad to notice that Mr. Knyvett himself fully appreciates the advantages which may be anticipated from the new system and the importance of making the post of President one which the leading and influential men amongst the villagers will seek after and value. The rearrangement of beats has caused a reduction in the number of chaukidars under Act VI (B.C.) of 1870 and under Regulation XX of 1817, from 85,393 and 5,084 in 1905 to 83,524 and 4,652 in 1906. The enquiries referred

to above did not extend to Chota Nagpur, where a different Act and system are in force. A scheme for the improvement of the chaukidari administration in that Division is under consideration. The Lieutenant-Governor is glad to learn that the Inspector-General of Police is enquiring into the extraordinary variations which now exist in the system of rewarding and punishing chaukidars. In some districts punishments seem to be needlessly frequent and severe, while in others too little attention is paid to the granting of rewards.

8. *Supply of Police to private individuals.*—The Lieutenant-Governor has more than once had occasion to notice that there was a tendency on the part of local officers to supply police to private individuals too freely. Definite orders have recently been issued, laying down the principles to be followed in dealing with applications for the deputation of a police force for private purposes. The number of cases in which such applications were complied with during the year was only 14 against 58 in 1905.

9. *Cognizable Crime.*—The total number of reported cognizable cases rose from 115,463 in 1905 to 122,651. This was due mainly to an increase in thefts and burglaries on account of the high price of food-grains. Excluding public nuisances and offences under special or local laws, the percentage of police cases ending in conviction to cases decided rose from 77 per cent. to 80; but including the above offences it fell from 89 to 87. The percentage of convictions to cases enquired into by the Police was 42 as compared with 44 in 1905. The percentage of convictions in Sessions cases fell from 75·1 to 73·9.

10. *False cases.*—The number of cases declared to be false shows an increase of 201; but the proportion of such cases to the total number of cases reported has remained stationary The percentage of such cases in which prosecutions were instituted under sections 182 and 211, Indian Penal Code, has fallen from 15·7 to 12·8; and convictions were obtained only in two out of every five cases prosecuted. The Lieutenant-Governor regrets to notice how very little attention is paid in some districts to this important matter. The results are particularly bad in the Presidency Division, and worst of all in Nadia, where there were only six prosecutions, all abortive, out of 106 cases declared false. The attention of the Magistrates will again be drawn to the remarks on this subject in paragraph 10 of the Resolution on the Report for the year 1904. There has been a slight increase in the number of cases in which compensation was given under section 250 of the Criminal Procedure Code; but there is still room for improvement.

11. *Remands.*—There has been a slight improvement in the percentage (53·8) of cases disposed of at the first or second hearing; but the number of cases remanded five or six times is still far too high, especially in certain districts of Bihar and Chota Nagpur. The Lieutenant-Governor desires that the Commissioners will pay special attention to this important matter at their annual inspections of Magistrates' offices.

12. *Serious crime: Rioting.*—There has been a decrease in the number of rioting cases (949) in all Divisions, except the Presidency, where the number has risen from 242 in 1905 to 298 in 1906. The increase in the Presidency Division is accompanied by a large diminution in the number of persons bound down to keep the peace under section 107 of the Criminal Procedure Code. The Commissioner will be asked to enquire whether the neglect to take timely preventive action is in any way responsible for the greater number of rioting cases. About three cases out of every four ended in conviction.

13. *Serious crime: Murder, etc.*—The number of serious crimes against the person was 3,555, or 55 more than in 1905. The number of murders reported rose from 248 to 284. Of these, no less than 128 were undetected. Of the 156 cases which came before the Courts, convictions were obtained in only 40 per cent. The results were worst in the Presidency and Burdwan Divisions. It is very difficult to get people to come forward and give evidence in these cases, and juries are naturally reluctant to convict except on the clearest and most convincing proof. At the same time the Lieutenant-Governor cannot but hold that the above figures are in the highest degree unsatisfactory. The Inspector-General of Police will be asked to consider what steps can be taken to secure better results in future. One of the most important cases was the murder of the European Manager of Phubsering, a tea-garden near Darjeeling.

14. *Serious Crime, Dacoity, etc.*—The number of dacoities reported was 228, as compared with 247 in 1905. The figures for 1906, however, include a number of cases which occurred in previous years, but were brought to

light during the year by approvers. Special attention has been paid of late to this form of crime; and the year was notable for the successful prosecution of several notorious gangs of decoits under section 401 of the Indian Penal Code. The total number of cases decided in the Courts was 73 against 91 in the previous year; of these, 47 ended in conviction against 53. There was a large increase in the number of burglaries from 27,983 in 1905 to 32,374 in 1906. The increase is most marked in Darbhanga, Bhagalpur, Monghyr, the Sonthal Parganas, Khulna, Muzaffarpur and Jessore, and is everywhere attributed to the high price of grain. It is significant that in most of these districts measures had to be taken for the relief of distress or famine. There was a similar increase in the number of theft cases. Cattle thefts increased from 1,736 in 1905 to 2,022.

15. *Railway Police.*—The control of the Railway Police was transferred during the year from the Deputy Inspectors-General of the different Ranges to the newly appointed Deputy Inspector-General of Crime and Railways, under whom there are now three Superintendents of Police, viz., one for the East Indian Railway system, another for the Bengal-Nagpur Railway system, and a third, aided by an Assistant Superintendent, for the Eastern Bengal State Railway and the Bengal and North-Western Railway Systems. There was an increase in the total number of cases reported by the Railway Police from 7,875 to 8,658. The number of cognizable cases decided was much the same as in the previous year, and the judicial results were good. Theft cases increased in number from 3,216 to 3,825. Gang cases are being instituted against four gangs of thieves who operate on the Eastern Bengal State Railway. The number of cases of obstruction on the line rose from 29 to 60. Petty obstructions were placed on the lines for the purpose of annoying the East Indian Railway authorities during the strikes which occurred at Asansol, Jamalpur and elsewhere. These strikes, which were engineered by outsiders from Calcutta, were brought to a prompt conclusion by the Railway authorities. It is satisfactory to note that nothing very serious occurred in the course of these strikes, thanks to the precautionary measures adopted by the police to preserve order and to render assistance to the Railway authorities.

16. *Criminal Investigation Department.*—The report contains some interesting details of the operations of the Criminal Investigation Department. Much valuable work was done in the detection of organized crime and in the successful prosecution of professional criminals. A number of gang cases were worked up against habitual thieves and dacoits, many of whom were sentenced to long terms of imprisonment. One of the most interesting cases brought to light was the New York Life Insurance case. In this case the note-forger, Benarasi Das, tried to secure the insurance money payable on the death of a certain Sital Pershad Agarwala, who was represented by him to be a rich merchant, by removing him and substituting the dead body of a patient who had just died in hospital. The clue in this case was obtained from a convicted forger. Benarasi Das was convicted and sentenced to five years' rigorous imprisonment. Considerable progress is being made in the classification of finger prints, the preparation of history sheets and the photographing of notorious criminals. Mr. A. V. Knyvett, C.I.E., was in charge of the Department till the 27th March, when he was relieved by Mr. C. W. C. Plowden, who remained in charge of it for the rest of the year. The Lieutenant-Governor observes with satisfaction that the services of this Department were much appreciated by the local officers, and that the cordial relations between it and the Calcutta Police are still maintained.

17. The Lieutenant-Governor desires to acknowledge the efficient administration of the Department during the year by Messrs. Stevenson-Moore and Knyvett. His Honour also has much pleasure in acknowledging the services rendered by Mr. Dundas, the Principal of the Bhagalpur Training School. The names of the officers specially mentioned for good work have been noted.

ORDER.—Ordered that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

FIRST REPORT ON THE COTTON CROPS OF BENGAL, AUGUST 1907.

[On an average of the five years ending 1905-06, the area under cotton crops in the territory to which this forecast relates has represented some 0·4 per cent. of the total area under cotton crops in India.]

Explanatory.—This is the first of the four reports on cotton crops to be issued during the year. Besides dealing with the area sown with the early crop and the general condition thereof, reference is made in this report to the progress made in the sowings of the late crop.

Character of the season.—The early crop is chiefly grown in Sambalpur, in the Sonthal Parganas and in the districts of the Chota Nagpur Division. It is generally sown before the rains.

Sowings were generally normal this year, but they were late in the Sonthal Parganas, owing to want of rain in May and the beginning of June and excessive rain towards the end of the latter month. The weather conditions have been favourable on the whole, and the prospects good so far. In Sambalpur some damage has been done by insects. In Ranchi a larger area was sown this year owing to a more favourable season, while in Palamau the area has decreased in consequence, it is said, of the extension of lac cultivation which gives a larger profit.

The late crop is principally grown in the Patna Division. In Darbhanga the sowings were delayed by want of rain; elsewhere they were generally normal. The prospects of this crop are reported to be fair so far. Locusts have done some damage in the Buxar Subdivision of the Shahabad district.

Area sown.—The area sown with early cotton, as given in the present forecast, amounts to 38,469 acres, against 39,947 acres shown in the Final Forecast of 1907. The averages for five years and for ten years are 49,376 acres and 65,185 acres, respectively.

The area already sown with late cotton is reported to be 29,174 acres, as compared with 23,774 acres shown in the August forecast of last year and 35,530 acres shown in the Final Forecast of February last.

General Summary.—Rainfall was general over the Province. It was heavy in Darjeeling, C uttack and Puri, moderate in Hazaribagh, Ranchi and Palamau, but elsewhere light. Transplantation of paddy is still going on, but more rain is needed in many districts for this operation. In some places the cu tting of jute and of early paddy has commenced. The condition of standing crops on the whole is satisfactory so far, but some damage by floods is reported from parts of the 24-Parganas and of Darbhanga. Sugarcane is doing well. In Darbhanga the number of persons gratuitously relieved in the undeclared area is 224 and in the famine area 8,054. The number of persons on relief-works is 3,556. Cattle-disease prevails in nine districts. The fodder and water-supply is generally sufficient. Prices of common rice have risen in seven and fallen in six districts and remained stationary in the rest of the Province.

SUMMARY OF RAINFALL OBSERVATIONS TAKEN IN BENGAL DURING THE MONTH OF JULY 1907.

The rainfall in July, though of a monsoon character, was considerably below the average in almost all the districts of Bengal The deficiency varied from 1·13 inches in Bhagalpur to 8 65 inches in Singhbhum. Only in the districts of Nadia, Jessore and Khulna in South-West Bengal, and in the districts of Champaran and Purnea in Bihar the fall was above the average. Expressed in percentage figures, the above named districts in South-West Bengal received 109, 142 and 109 per cent. of their normal fall, and Champaran and Purnea in Bihar received 112 and 123 per cent., respectively, of their normal rain. On an average South-West Bengal received 9 07 inches, Bihar 7·40 inches, Orissa 7·16 inches, and Chota Nagpur 6·68 inches.

Taking the Province as a whole, the rainfall received was about two-thirds of the normal amount.

The following table gives the rainfall of the various divisions of Bengal in July and in each of the previous months of the present year as compared with the normal values for the same periods. The figures given represent the actual falls expressed as percentage of the normal falls:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1907 expressed as a percentage of the normal fall for the period.

The mean pressure, temperature, etc., are deduced from the traces of the Kundson's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, dark gloomy weather; d, drizzling rain; p, passing temporary showers.

NOTICE.

ENTRANCE EXAMINATION.

A TEST-EXAMINATION of private students and school-masters for admission to the ensuing Entrance examination will be held at the Office of the Inspector of Schools, Presidency Division, 12 Dalhousie Square, Calcutta, on Monday, the 9th, and Tuesday, the 10th December 1907. Such candidates only as reside in any of the districts of the Presidency Division, including Calcutta, will be admitted to the examination.

2. Candidates who do not appear from any recognised school, *i.e.*, who have not attended any recognised school since the 1st of September next preceding the examination, will be treated as private students. They will be required to furnish satisfactory proof that they have not read in any recognised school from that date. They should produce certificates of conduct and progress in studies from the authorities of the last school where they read, and also a certificate from other reliable authorities regarding conduct and progress after leaving school. The transfer certificates granted to them by the authorities of the schools in which they studied last, or the Registrar's receipt for the fee paid in the case of those candidates who previously appeared at the Entrance examination, must be submitted in original along with the application for permission to appear at the test-examination.

3. *Bonâ-fide* teachers employed in any of the schools in the Presidency Division may be admitted to the examination if they can produce certificates of service and character from their employers or from the Deputy Inspector of the district concerned.

4. Each candidate should submit to this office, not later than the 18th November 1907, his application for admission to the test-examination, stating the following particulars:—

(1) Age, (2) residence, (3) father's name (4) second language besides English, and (5) whether he appeared at any previous Entrance examination.

5 The admission-fee for the examination is Rs. 4 for each candidate, and is to be remitted with the application within the prescribed date, after which a fine of Rs 2 is to be imposed for each week's delay.

6. No private student will be admitted to the test-examination unless accompanied, for the purpose of identification, by some person known to this office.

7. Candidates who are sent up by this office must appear at the Calcutta Examination Centre.

8. Those who reside at a distance from Calcutta may, with special permission, present themselves at the test-examination held by the head-master of the nearest zilla or Government high school under the control of the Inspector of Schools, Presidency Division, on condition that they appear at the centre selected by the candidates from that institution. The head-master of such school is hereby authorized to sign the applications, which must afterwards be countersigned by the undersigned. The fees and fines paid by these candidates as per paragraph 5 above should be utilised in meeting the cost of the examination.

9. The Entrance examination in 1908 will be held on the 2nd March 1908 and following days.

10. Applications and fees for admission to the examination must reach the Office of the Registrar on or before the 20th January 1908.

F.A. AND B.A. EXAMINATIONS.

Deputy Inspectors, Sub-Inspectors, and *bonâ-fide* teachers of English schools in the Presidency Division who have served as such for full two academical years, or for six months in the case of those who were admitted to a former examination of the same class, will be admitted to the above examinations on production of certificates of character and length of service (with dates) from their employers. *Their applications must reach this office on or before the 10th January 1908.*

1. In accordance with section 9, Chapter XV, of the Revised Regulations dealing with the registration of University students, all candidates, who intend to appear at any of the ensuing examinations of the University of Calcutta otherwise than as students of some affiliated institutions and who have applied for or have obtained the special permission of the Senate for the purpose, are required to apply to the Registrar of the Calcutta University for the registration of their names as University students. No person will be deemed a "University student" unless and until his name has been duly registered, and none but "University students" will be eligible for admission to any University examination other than the Entrance or Matriculation. A registration fee of Rs. 2 must accompany every application.

2. Candidates for the B.A. examination must send their F.A. Certificates, and candidates for the F.A. examination their Entrance Certificates, together with a letter, in original, from the Senate of the Calcutta University, permitting them to appear at the examination.

3. Candidates should carefully read the printed form of application and supply all the informations required by the University, including the Registrar's receipt in the case of those school-masters who were admitted to a previous examination of the same class.

4. The F.A. and B.A. examinations in 1908 will be held on the 23rd March 1908 and following days.

5. Applications with the countersignature of the undersigned and fees for admission to the above examinations must be sent to the *Office of the Registrar on or before the 8th February 1908* by the candidates direct.

MUNICIPAL OFFICE, *the 14th August 1907.*

CORPORATION OF CALCUTTA.

IN compliance with section 565 of the Calcutta Municipal Act, the following draft bye-laws under clause 41 of section 559 of the same Act which the General Committee intend to submit for the consideration of the Corporation are published for information.

Any person having any objection to the Bye-laws, should submit it in writing to the Chairman of the Corporation before the 28th September 1907.

Bye-laws under section 559 (41) for securing efficient inspection and Sanitary regulation of shops.

1. Every shop-keeper in whose shop articles intended for human food are kept or sold, shall at all reasonable times afford the Chairman or other officer to be appointed in this behalf free access to such shop for the purpose of inspection.

2. Every such shop keeper shall carry out all requisitions or directions (as the Chairman or other officer as aforesaid may think fit) for providing adequate means of ventilation and access of light, making the floors of such shop pucca and paved with cement or other impervious material providing suitable drains and for keeping the shops in a cleanly and wholesome condition.

3. Every shop-keeper who deals in prepared or manufactured articles of human food shall also provide in his shop such suitable receptacle or vessel as may be required for keeping such articles in such a manner as to prevent as far as practicable the risk of contamination from dust, ashes, rubbish, spiders, flies or other insects, or anything likely to affect the health injuriously, and keep and maintain such vessel or receptacle in a cleanly and wholesome condition.

4. In case of non-compliance with or breach of any of these bye-laws the Chairman may give notice in writing to the shop-keeper to comply therewith or discontinue such breach within a reasonable time to be specified therein and in default of compliance with the requirements of such notice the Chairman may by order direct that the shop shall no longer be used as such until the Health Officer in writing certifies that the said requirements have been carried out.

5. A breach of any of these bye-laws shall be punishable with fine which may extend to Rs. 20 and in the case of a continving breach, with fine which may extend to Rs. 10 for every day during which the breach continues after conviction for the first breach.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the East Indian Railway, in the district of Patna, will be put up to sale at 12 o'clock on 27th August 1907, corresponding with the 4th Bhadon 1314 Fusli, at the Patna Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta,

or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

The Calcutta Gazette.

WEDNESDAY, AUGUST 21, 1907.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secy. to the Govt. of Bengal.

CALCUTTA, *the 19th August 1907.*

JAPAN, NAIKAI (INLAND SEA)—SIMONOSEKI STRAIT.

Moji ko—Wreck dispersed; buoy and boat withdrawn.

No. 384 (first publication).—With reference to Notice to Mariners No. 356, dated 26th July 1907, issued by this office, the British Admiralty has given further notice (No. 963 of 1907) that the wreck of the SS. *Naka Maru*, which sank in Moji ko, at a distance of $3\frac{1}{10}$ cables N. 56° W. from Moji machi harbour office flagstaff, has been dispersed, and that the red buoy and boat, displaying a red flag by day, and exhibiting *two* vertical *red* lights by night formerly marking this wreck, have been withdrawn in consequence.

Approximate position, lat. 33° 57′ N., long. 130° 57½′ E.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Simonoseki strait, No. 1578; Moji ko, No. 3114: also Sailing Directions for Japan, 1904, page 502.

KOREA—WEST COAST.

Chemulpho approach—Non-existence of shoals.

No. 385 (first publication).—The British Admiralty has given Notice (No. 964 of 1907) that a careful but unsuccessful search has been made for the undermentioned shoals in the approach to Chemulpho:—

(*a*) The shoal marked "dries 2 feet" on the chart, and shown as situated at a distance of 3 cables S. 44° E. from Warren island. A depth of 7 fathoms, rocky bottom, was found in this position, and from 10 to 14 fathoms around it.

(*b*) The shoal marked on this chart "dries," and shown as situated at a distance of 3 cables N. 81° E. from Warren island. A depth of 10 fathoms, rocky bottom, was obtained in this position, and from 10 to 12 fathoms around it.

No indication of any danger was observed in these positions, and the local inhabitants have no knowledge of them. It is therefore considered that they have no existence, and they have in consequence been erased from the charts.

Approximate position, Warren island, lat. 37° 9′ N., long. 126° 21′ E.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Charts:—Approaches to Seoul, No. 1258; appoaches to Chemulpho, No. 1270: also Sailing Directions for Japan, &c., 1904, page 56; and Supplement, 1906, page 6.

EASTERN ARCHIPELAGO—Java, North coast.

Batavia Roads—Existence of shoal—Depth over another.

No. 386 (first publication).—The British Admiralty has given notice (No. 971 of 1907) of the existence of a coral shoal, with a least depth over it of 3 fathoms, in Batavia roads, situated about 175 yards westward from the white buoy marking Sau shoal, in approximately lat. 5° 55′ 35″ S., long. 106° 40′ 55″ E.

This shoal is about 100 yards in diameter.

Also, that a least depth of 2 fathoms has been obtained on Karang Besar, situated in approximately lat. 5° 53½′ S., long. 106° 28¼′ E.

This Notice affects the following Admiralty Charts:—Sunda strait, No. 2056; Batavia road, No. 933: also Eastern Archipelago, Part II, 1904, pages 74, 75; and Supplement 1906, page 7.

PACIFIC OCIAN—THE PHILIPPINE ISLANDS—Panay.

Port Ilo Ilo—Wreck marked by buoy.

No. 387 (first publication).—The British Admiralty has given notice (No. 972 of 1907) of the existence of a wreck in port Ilo Ilo. A can buoy, painted in black and red horizontal bands, has been moored in a depth of 6½ fathoms to mark the position. The buoy is situated at a distance of 3½ cables S. 87° E. from the south-eastern angle of the fort.

Approximate position, lat. 10° 41½′ N., long. 122° 35½′ E.

(*Variation 1° Easterly in 1907.*)

This Notice effects the following Admiralty Chart:—Port of Ilo Ilo, No. 2391: also Eastern Archipelago, Part I, 1902, page 244.

NEW ZEALAND—South island, North coast—Golden Bay.

Separation point—Landmark disappeared.

No. 388 (first publication).—The British Admiralty has given notice (No. 984 of 1907) that the remarkable white stripe on Separation point, Golden bay, the bearing of which had been used to clear the extremity of Farewell spit, has disappeared, it being obliterated by bushes; this mark and the line of bearing have therefore been erased from the charts.

Approximate position, lat. 40° 48½′ S., long. 173° 2′ E.

This Notice affects the following Admiralty Chart:—Cape Foulwind to D'Urville island, No. 2616: also New Zealand Pilot, 1901, pages 226, 238; and Supplement, 1906, page 55.

CHINA—South east coast.

Port Swatau—Shoal in approach.

No. 389 (first publication).—The British Admiralty has given notice (No. 988 of 1907) of the existence of a shoal named Frewin rock, with a depth of 8 feet over it at low water in Sugarloaf channel in the approach to port Swatau, situated in a position from which the

southern extremity of Fisherman island bears S. 86° W., distant 4 cables, and north-western extremity of Double island (ruins) N. 2° W. There are depths from 6 to 7 fathoms around this shoal.

Approximate position, on chart No. 854, lat. 23° 20′ N., long. 116° 44¾′ E.

(*Variation nil in 1907.*)

This Notice affects the following Admiralty Chart:—Port of Swatau, No. 854: also China Sea Directory, vol. III, 1904, pages 150, 153; and Supplement, 1907, page 44.

BAY OF BENGAL—Orissa coast.

Balasore—Chandipur light—Temporarily replaced.

No. 390 (first publication).—The Port Officer, Cuttack and Balasore Ports, has given notice that the Chandipur lamp has been replaced by two dioptric masthead lamps as a temporary measure, as the old lamp requires repairs.

The arc of illumination is as follows from seaward:—S.S.W. through west to N.N E, visible 10 miles. These bearings are magnetic.

BAY OF BENGAL—Burma coast.

Zallatoung Island—Establishment of a new light.

No. 391 (first publication).—The Principal Port Officer, Burma, has given Notice, dated the 13th August 1907, that a small fixed Wigham's patent unattended *red* light visible about 6 miles in clear weather will be exhibited from the west end of Zallatoung Island off the mouth of the Sandoway River in lat. 18° 32½′ N., long. 94° 13¾′ E., on or about the 20th October 1907. The light which is intended to be an "Anchorage Light" for the Sandoway anchorage will be placed 40 feet above high water level and will have an arc of illumination of 130°. Bearing seaward from N. 61° W., though west to S. 11° E., (true bearings.) It will be exhibited till the end of May 1908, and thereafter annually till further notice, from beginning of October to the end of May.

This Notice affects the following Admiralty Charts:—Nos. 70, 822 and 832.

INDIA—WEST COAST.

Jaigarh Light—Alteration in character—.

No. 374 (second publication)—With reference to Notice to Mariners No. 349, dated the 26th July 1907, issued by this office, the Government of Bombay has given further notice (No. 87 of 1907) that the occulting screen of the Jaigarh outer light was removed on the 7th July 1907.

The character of this light has now been altered from white occulting to a white fixed light; in other respects it remains as before.

Approximate position:—

Latitude	...	...	...	17° 18′ N′.
Longitude	...	...	...	73° 11′ E.

This Notice affects the following Admiralty Charts:—Arabian Sea, No. 1012; Karachi to Vengurla, No. 826; Gulf of Cutch to Viziadrug, No. 2736; Boria Pagoda to Achra river, No. 739; and Jaigarh or Jyghur and entrance to Shastri or Sangameswar river, No. 247; also, West Coast of Hindustan Pilot, 1898, page 181, and Admiralty List of Lights, Part VI, 1907, No. 250.

EASTERN ARCHIPELAGO—Celebes Island—east coast.

Tukang Besi Islands—Shoals westward of—.

No. 375 (second publication).—The British Admiralty has given notice No. (928 of 1907) of the existence of the undermentioned shoals to the westward of Tukang Besi Islands:—

(*a*) A reef extending in a west-north-westerly and east-south-easterly direction, with very little water over it, the western end of which is situated in approximately lat. 5° 29½′ S, long. 123° 26′ E.

(*b*) A reef about 5 miles long in a north-westerly and south-easterly direction, and 3 miles broad, the centre of which is situated in approximately lat. 5° 53½′ S., long. 123° 42½′ E.

(*c*) A reef about 5½ miles long in a north-easterly and south-westerly direction, and 2 miles broad, the north-eastern point of which is situated at a distance of 8 miles, S. 84 W., from the north point of Binongka island, and the centre in approximately lat. 5° 55′ S ; long. 123° 49′ E.

(*d*) A reef about 2½ cables in diameter exists in approximately lat. 5° 54½′ S., long. 123° 53′ E.

The above dangers are partially dry, and their limits are indicated by discoloured water

(*e*) Between the positions of lat. 5° 31′ S., long. 123° 31′ E., and lat. 5° 57′ S., long. 123° 41½′ E., are several reefs, the positions and limits of which are not yet determined. A danger line between these positions has, therefore, been substituted for that at present shown on the chart.

(*Variation 2° Easterly in 1907.*)

This Notice affects the following Admiralty Charts :—Australia northern portion, No. 2759A ; China sea, No. 1263 ; Eastern Archipelago, No. 942A ; Tomori gulf to Sulayar strait, No. 3616 : Also Eastern Archipelago, Part II, 1904 page 361.

GULF OF ADEN—Sokotra, south coast.

The Brothers—Non-existence of Coral Patch reported eastward of.

No. 376 (second publication).—With reference to Notice to Mariners No. 252, dated 31st December 1897, issued by this office, the British Admiralty has given further notice (No. 930 of 1907) that information has been received from Commander F. H. Walter, H. M. Surveying Vessel *Merlin* that he has made a close and careful search over an area of 200 square miles without success for the coral patch reported by the Master of the German steam-vessel *Hertha*, in 1897, in approximately lat. 12° 8′ N., long. 53° 50½′ E.

Although the weather was fine and clear, and the bottom visible at depths of 16 and even at 20 fathoms, no indication of any danger was observed. It is therefore probable that the Master of the *Hertha* was deceived by the appearance of a discolouration of the water, as he got no soundings and only stated that he saw a bank. This shoal has in consequence been erased from the charts.

This Notice affects the following Admiralty Charts :—Indian ocean, northern portion No. 748b ; Delagoa bay to cape Guardafui, No. 597 ; gulf of Aden, No. 1012 ; gulf of Aden sheet I, No. 6a ; Sokotra, No. 5 : also Red Sea and Gulf of Aden Pilot, 1906, page 408.

CHINA, EAST COAST—Shantung Promontory.

Sangkau Bay—Shoal reported in.

No. 377 (second publication).—The British Admiralty has given notice (No. 932 of 1907) that the S.S. *Hino Maru*, drawing 18 feet, is reported to have struck on a shoal, in Sangkau bay, in a position situated at a distance of about 3⅘ miles N. 85° E. from Lao shan peak (645 feet).

Approximate position, lat. 37° 6½′ N , long. 122° 29½′ E.

This shoal has been placed on the chart as a rock with less than 6 feet over it, and marked P.D.

(*Variation 4° Westerly in 1907.*)

This Notice affects the following Admiralty Charts :—Shantung promontory, No. 1855 ; Shitau bay to North-east promontory, No. 3491 : also China Sea Directory, vol. III, 1904, page 561 ; and Supplement, 1907, page 105.

PACIFIC OCEAN—Hawaiian islands.

Laupahuhu, Pepeekeo and Paukaa lights—Colours altered.

No. 378 (second publication).—The British Admiralty has given notice (No. 938 of 1907) that it is intended, about 1st July 1907, to alter Laupahuhu light, Hawaii, from red fixed to *white fixed.*

Approximate position, lat. 20° 0′ N., long. 155° 16′ W.

Also, on the same date, to alter the colour of Pepeekeo light, Hawaii, from white to *red fixed.*

Approximate position lat. 19° 51′ N., long. 155° 7′ W.

Also, on the same date, to alter the colour of Paukaa light, Hilo bay, Hawaii, from green fixed to *white fixed.*

Approximate position, lat. 19° 46′ N., long. 155° 6′ W.

This Notice affects the following Admiralty Charts :—Sandwich islands, No. 1510; plan of Hilo bay on No. 1377: also List of Lights, Part VII, 1907, Nos. 632, 631, 629; Pacific Islands, vol. III, 1900, pages 203, 203, 201; and Supplement, 1903, page 14.

AFRICA, EAST COAST—Fernando Veloso Bay.

Belmore Harbour—Anchorage Beacons.

No. 379 second publication).—The British Admiralty has given notice (No. 940 of 1907) that two white triangular marks have been affixed to two bare trees, on the sands near Utuku, on the eastern side of Belmore harbour. These marks in line lead to the anchorage in 15 fathoms at low water. The exact positions of these marks are not stated. A note has therefore been placed on the chart.

Approximate position, lat. 14° 23′ S., long. 40° 42′ E.

This Notice affects the following Admiralty Chart :—Mozambique harbour to Ras Pekaw with plan of Belmore harbour, No 1809: also Africa Pilot, Part III, 1905, page 303.

CHINA, SOUTH-EAST COAST—Port Swatau approach.

Good Hope Cape—Shoals off.

No. 380 (second publication).—The British Admiralty has given notice (No. 942 of 1907) of the existence of a shoal, named Williams rocks, off Good Hope cape, in the approach to port Swatau. This shoal, which consists of boulders lying on a muddy bottom, has three heads, with depths of 4, 4½, and 5 fathoms over them at low water; the 4-fathom head is situated in a position from which Good Hope cape light-house bears West, distant 4½ cables, and Green island submit N. 43° W.

Approximate position on chart No. 854, lat. 23° 14½′ N., long. 116° 48¼′ E.

The 4½-fathom and 5-fathom heads are situated at distances of about half a cable N. 9° E. and 1¼ cables N. 22° E respectively from the above position.

Sugarloaf light-house in line with the east side of Bill island, bearing N. 33°W., leads about 1½ cables eastward of the shoals.

(Variation Nil in 1907.)

This Notice affects the following Admiralty Charts :—Namoa island, No. 1957; port of Swatau, No. 854: also China Sea Directory, vol. III, 1904, page 148.

CHINA, EAST COAST—Yang tse Kiang.

Wusung River Bar—Regulations for crossing.

No. 381 (second publication).—The British Admiralty has given Notice (No. 945 of 1907) that, in order to prevent accidents to vessels crossing the inner and outer bars of the Wusung river, the following regulations were put into force July 1906, and must be strictly adhered to by Mariners :—

(1) A careful look-out is to be kept on approaching the Wusung bars by inward-bound vessels when about a mile below the outer bar, and by outward-bound vessels when abreast of the southern end of Gough island :—

(*a*) Vessels having the tide against them must wait for vessels having a fair tide.

(*b*) Overtaking vessels must regulate their speed to allow overtaken vessels to clear the bars first.

(2) Captains and pilots are not to attempt to cross either bar when the signals at Wusung indicate less water than their vessels are drawing. Sometimes, however, a greater depth can be obtained by not following the bar-leading marks. Captains and pilots desiring to avail themselves of this information should apply to the Harbour Master's Officer at Shanghai, or to the Berthing Officer at Wusung shortly before they wish to cross the bar.

(3) Vessels anchoring outside Wusung must take up a berth well clear of leading marks over the outer bar in order to avoid all risk of collision with vessels crossing the bar.

Approximate position Wusung, lat. 31° 23′ N., long. 121° 29′ E.

This Notice affects the following Admiralty Chart:—Wusung river, No. 1601: also China Sea Directory, vol. III, 1904, pages 413, 415.

BAY OF BENGAL—Burma coast—Rangoon river.

Lighted Fairway buoy—Position.

No. 382 (second publication).—The Principal Port Officer, Burma, has given notice (Channel Circular No. 99 of 1907) that the Lighted Fairway buoy recently placed on the station has been laid about 400 feet to the northward of the old buoy, which has been removed.

AUSTRALIA, SOUTH—Spencer Gulf.

Lowly Point Light—Alteration intended.

No. 383 (second publication).—The President, Marine Board, Port Adelaide, has given notice (No. 5 of 1907) that it is intended to alter the Lowly Point light so that its range of visibility may be increased by one and-a-half miles.

Operations will be commenced on or about the 1st October next, and for a period of about one month therefrom it is probable that the revolution of the light will be somewhat irregular.

A further notice will be issued when the improvements are effected.

This Notice affects Admiralty Chart No. 2389b.

BAY OF BENGAL—Chittagong coast.

Karnafuli river—Depth of water in the channels.

No. 361 (third publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 27th July 1907:—

This Notice affects the following Admiralty Chart :—Gulf of Tokyo, No. 2657 : Also, Sailing Directions for Japan, &c., 1904, page 373.

CHINA SEA—Taiwan (Formosa) west coast.

Nan wan and Haikau wan—Particulars of shoals in—.

No. 363 (third publication).—The British Admiralty has given notice (No. 893 of 1907) containing particulars regarding certain shoals in Nan wan and Haikau wan, as follows :—

Nan wan—

(*a*) A shoal, with a depth of 3½ fathoms over it, exists in Taihanroku anchorage, in a position situated at a distance of 1½ cables S. 25° E. from East rock. This shoal is connected to the northward with East rock, but to the southward it is steep-to, the depth increasing suddenly to 12 fathoms.

(*b*) A shoal, with a depth of 3 fathoms over it, exists in Taihanroku anchorage, in a position from which West rock bears S. 55° W., distant 3¾ cables, and Baan rock N. 1° E. This rock is half a cable long in a north-easterly and south-westerly direction, and a quarter of a cable broad, and is steep-to.

Approximate position, lat. 21° 57½′ N., long. 120° 45½′ E.

With reference to Notice to Mariners No. 442 of 1906 (No. 199, dated 1st June 1906, issued by this office) :—

(*c*) An examination of the danger given in the above-mentioned Notice shows that it is a pinnacle rock, now named Daifuseki, with a depth of about 5 feet over it, in a position situated at a distance of 3$\frac{5}{16}$ miles N. 65° W. from Nan sha light. The depths around it are irregular.

Approximate position, lat. 21° 56′ 30″ N., long. 120° 47′ 5″ E.

Haikau wan—

1. A shoal, named Tsuikinosa, with a depth of 3 feet over it, exists in Haikau wan, in approximately lat. 22° 6′ 35″ N., long. 120° 42′ 10″ E. This shoal, which is about 4 cables long in a northerly and southerly direction, and one cable broad, has depths of 5 fathoms around it.

2. The undermentioned dangers have been searched for without success, and as they are unknown to the local fisherman, it is considered that they do not exist; they have in consequence been expunged from the charts :—

   (*a*) The shoal, of 2½ fathoms, in approximately lat. 22° 7′ N., long. 120° 41′ E.

   A depth of 19 fathoms has been obtained over this position.

   (*b*) The bank of 9 fathoms, marked P.D., in approximately lat. 22° 8′ N. long. 120° 39′ E.

   A depth of 67 fathoms was obtained over this position.

AUSTRALIA, EAST COAST—Coral sea.

Bellona Reef—Sand cay reported.

No. 365 (third publication).—The British Admiralty has given Notice (No. 900 of 1907) that a sand cay, about 6 feet high, and 2½ cables long, and surrounded by breakers which extend for a long line in a north-westerly direction, is reported to exist to the eastward of Middle Bellona reef, in approximately lat. 21° 21′ S., long. 159° 37′ E.

This Notice affects the following Admiralty Charts:—Pacific ocean, No. 780; Coral sea, No. 2763: also Australia Directory, vol. II, 1898, page 531; and Supplement, 1900, page 35.

AFRICA—EAST COAST.

Pungue River Entrance—Shoal reported in—

No. 366 (third publication).—The British Admiralty has given notice (No. 911 of 1907) that the Commanders of the S.Ss. *Prinzessin* and *Clan Macdougal* report having touched on a shoal, with a depth of 3 fathoms over it, to the eastward of the Pungue river entrance, at a distance of about 2 miles south-eastward from the black conical buoy A. From it Macuti point light bears between N. 22° W. and N. 34° W., distant about 8 miles. This shoal will be examined.

Approximate position, lat. 19° 56½′ S., long. 34° 59½′ E.

KOREA, WEST COAST—Chemulpho approach.

Hoku Choshisho (North Watcher) Light—Intended alteration.

No. 367 (third publication).—With reference to Notice to Mariners No. 325, dated 9th October 1903, issued by this office, the British Admiralty has given further Notice (No. 912

of 1907) that the character of Hoku Choshisho (North Watcher) light, in the approach to Chemulpho, will shortly be altered from flashing to *white fixed*.

Approximate position, lat. 37° 19¼′ N., long. 126° 28¾′ E.

This Notice affects the following Admiralty Chart :—Chemulpho anchorage, No. 1270 : Also, List of Lights, Part VI, 1907, No. 912 ; and Sailing Directions for Korea, &c., 1904, page 57.

JAPAN—South-west coast.

Me sima—Non-existence of shoal southward of—.

No. 368 (third publication).—With reference to Notice to Mariners No. 316, dated 12th August 1905, issued by this office, the British Admiralty has given further notice (No. 914 of 1907) that a careful examination has been made over an area of some miles in extent for the shoal reported by the Master of the British S.S. *Thomas Turnbull* to exist to the south-eastward of Me sima, in approximately lat. 31° 49′ N., long. 128° 28′ E., a sounding of 107 fathoms, sand bottom, being obtained in this position.

No indication of any danger was observed, which, had it existed, would have manifested itself, in consequence of the prevalence of rough weather at the time when this search was being made; the local fishermen also appear to be unacquainted with any danger in this locality. Under these circumstances it is considered that this shoal does not exist. It has therefore been expunged from the charts.

This Notice affects the following Admiralty Charts :—Pacific, No. 2459; China sea, No. 1963; Nipon, &c., No. 2347 ; Amoy to Nagasaki, No. 2412 ; Western Coast of Nipon and Kiusiu, No. 358 : Also, Sailing Directions for Japan, &c , 1904, page 588 ; and Supplement, 1906, page 41.

No. 369 (third publication).—The British Admiralty has given notice (No. 919 of 1907) in which Mariners are cautioned to give the reclamation works, now in progress off Telok Ayer quay, a wide berth, as also all vessels displaying a red flag, which will be a mark to distinguish craft employed in connection with these works.

Approximate position, lat. 1° 17′ N., long. 103° 51′ E.

This Notice affects the following Admiralty Chart :—Singapore road, No. 1995 : Also China Directory, vol. I, 1906, page 243.

AUSTRALIA—Victoria—Port Phillip.

Altona shoal—Buoy replaced by light-buoy.

No. 370 (third publication) —With reference to Notice to Mariners No. 316, dated 5th July 1907, issued by this office, the British Admiralty has given further notice (No. 923 of 1907) that the project of establishing a light beacon on the extremity of the shoal extending from Altona, port Phillip, having been abandoned, the black can-buoy marking the anchorage off Altona for vessels discharging explosives will be replaced on 22nd August next by a light-buoy exhibiting a *white fixed* light.

Approximate position of buoy, lat. 37° 53½′ S., long. 144° 51¼′ E.

This Notice affects the following Admiralty Chart :—Port Phillip, No. 1171b : Also, Australia Directory, vol. I, 1897, page 464 ; and Supplement, 1900, page 17.

PACIFIC OCEAN—The Philippine islands—Negros, east coast.

Tañon Strait—Shoal in—.

No. 371 (third publication).—The British Admiralty has given notice (No. 927 of 1907) of the existence of a shoal, awash at low water, in Tañon strait, off the east coast of Negros island, situated in a position from which Tinaogan wharf bears S. 45° W., distance 2 miles, and Bagumbayan town N. 54° W.

This reef, which is about 1½ miles long in a northerly and southerly direction, consists of numerous heads, some of which are awash at low water, whilst others have depths of from 2 to 7 feet over them, with deep water between the heads. The channel between this reef and the coast of Negros island does not appear to be a safe one.

Approximate position, lat. 9° 49′ N., long. 123° 10′ E.

The mean pressure, temperature, etc., are deduced from the traces of Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; g, dark, gloomy.

SURVEY OF INDIA.

NOTIFICATION.

SURVEYOR-GENERAL'S OFFICE,
Calcutta, the 21st August 1907.

THE following Rules and Regulations relating to the Mathematical Instrument Office are published for the information and guidance of public officers. They have retrospective effect from the 1st July 1907.

J. M. FLEMING, *Lieut.-Colonel*, R.A.,
for *Surveyor-General of India.*

[Approved by the Government of India, Department of Revenue and Agriculture (Land Surveys), in No. 1061—51—5, dated the 8th July 1907.]

SURVEY OF INDIA.

RULES AND REGULATIONS OF THE MATHEMATICAL INSTRUMENT OFFICE, 15, WOOD STREET, CALCUTTA.

1. The Mathematical Instrument Office is a Depôt for the supply, repair, and adjustment of mathematical and other instruments, etc., employed in various Government Departments and Offices. The instruments issued may be new or second-hand at the discretion of the Officer in charge. As a rule, new instruments are not supplied if serviceable second-hand ones of the class required are available. Instruments, when no longer required, are also taken into store, from Government Departments and authorised offices, at a valuation which is given for each instrument returned.

2. All transactions between the Mathematical Instrument Office and other Government Departments and Offices are adjusted by "book transfer."

3. Instruments, etc., when they can be conveniently spared, may be issued on "cash payment," to District Boards and Municipalities, Native States, and individual officers of Government for their official use. With the approval of the Officer in charge, instruments may also be sent to the Mathematical Instrument Office "for repairs" on similar terms. Instruments, etc., cannot be issued to, nor repaired for, private firms or individuals.

4. Instruments, etc., will be issued at their book value to, and repairs will be executed at cost price for, Public Service Departments of Government, but 25 per cent. will be added to the book value of issues to, and 10 per cent. will be added to the cost price of repairs executed for, *quasi*-Commercial Departments of Government or on "cash payment."

5. The Mathematical Instrument Office cannot undertake the supply or repair of any description of electrical or telegraphic instrument, nor does it issue type, stationery or drawing materials.

6. All correspondence and all instruments sent to the Mathematical Instrument Office should be addressed to the Officer in charge, Mathematical Instrument Office, 15, Wood Street, Calcutta. Telegrams should be addressed to "Surveys, Inst.," Calcutta.

7. All indents for instruments, etc., should be submitted on the annexed Form A and every indent for instruments, etc., required on "book transfer" must be duly approved, and countersigned, in accordance with the instructions printed on the back of the form, before the indent can be complied with. An indent sent by telegram should be subsequently confirmed by the submission by post of the usual countersigned indent, with a note on the form intimating that the instruments have already been indented for by telegram.

8. The nomenclature and price of the different instruments, etc., generally kept in stock are given in a price-list. The prices are the approximate prices of new instruments, etc. An indenting officer should enter the approximate price of each description of instrument required in the column of the indent allotted for that purpose, so as to enable the officer who countersigns and finally passes the indent to know the probable expense it involves, and also to guide the Mathematical Instrument Office in selecting instruments to meet the demand. If the prices entered in an indent are not to be exceeded, this fact should be clearly stated.

9. In order to prevent misunderstandings, indenting officers should invariably state *in their indents*, the size and class of the instrument required, and when ordering a scale, particular care should be taken to note its length, how divided, and the purpose for which it is required.

10. All instruments sent to the Mathematical Instrument Office for repair or adjustment should be despatched *freight prepaid*, and at the same time, under separate cover, a requisition "for repairs" should be sent on the annexed Form B. No instrument will be repaired unless the Officer in charge considers it worth the cost of the work.

11. Indents should be submitted *as early as possible* to enable arrangements to be made to meet the demand in case the articles are not in stock, and all instruments requiring repairs should be forwarded to the Mathematical Instrument Office *as soon as* they are available. It is particularly requested that when a large supply of instruments is likely to be wanted for railway surveys or other large projects, the Mathematical Instrument Office should receive as long prior notice as possible of the probable number and description of articles required.

12. The mode of transit and address to which instruments, etc., are to be consigned by the Mathematical Instrument Office, as well as the address to which correspondence regarding the case is to be sent, must invariably be specified in full on the indent or requisition form; when instruments, etc., are to be despatched by post the name of the Post Office, as well as of the district in which it is situated, should be given, and when by railway the nearest Railway Station should be distinctly stated.

13. When issuing instruments, etc., which are required on "book transfer" or despatching them after repair, the Mathematical Instrument Office sends an "invoice" in *triplicate* showing the amount due; one copy should be signed and returned without delay as it is required, for submission with the monthly accounts of the Mathematical Instrument Office, for adjustment by the Comptroller, India Treasuries; the other copies should be dealt with as laid down in Article 96, Volume I, Civil Account Code (7th Edition). In the case of instruments, etc., issued or repaired on "cash payment" *pre-payment* is necessary, and, whenever it is possible, they, or the railway receipt for them, will be sent by V.-P. P.

14. All Government instruments, when no longer required, should be at once despatched to the Mathematical Instrument Office, *freight prepaid*, and at the same time, under separate cover, a list of the instruments deposited as no longer required" should be sent on the annexed Form C. It is particularly requested that surplus instruments may not be retained in any Government Office, as they only deteriorate and become obsolete, while, if despatched as soon as they are no longer required to the Mathematical Instrument Office, they can be overhauled, put into serviceable condition, and made available for issue to other officers requiring them. The Mathematical Instrument Office is, as a rule, unable to receive instruments for deposit as "no longer required" from Departments or officers who are not entitled to deal by means of "book transfer," and it is essential before sending such instruments to enquire if it will be convenient to receive them.

15. When Government instruments are received by the Mathematical Instrument Office for deposit as "no longer required" they are valued according to their condition, and a "valuation statement" is then sent to the officer depositing them; the amount of this valuation is credited to his department or office in the monthly accounts of the Mathematical Instrument Office, for adjustment by "book transfer" through the Comptroller, India Treasuries.

16. When an officer considers that Government instruments are unserviceable and that their transit charges may nearly equal or exceed their actual value as material, a survey should be held on them by a committee of Government Officers, whose report in duplicate should be forwarded to the Officer in charge, Mathematical Instrument Office, who will return one copy with instructions entered on it as to which of the instruments should be forwarded to the Mathematical Instrument Office. Unserviceable chains, staves, tapes, etc., are seldom worth their transit charges.

17. As indents, requisitions "for repairs," and lists of instruments "no longer required" are dealt with in separate sections in the Mathematical Instrument Office, they should be kept *quite distinct* and should not be mixed up on the same form. In all cases reference should be made to any previous correspondence on the subject dealt with, and, when instruments are forwarded to the Mathematical Instrument Office, it should be clearly stated whether they are "for repairs" or "no longer required." The forms are *not* required in *duplicate*, and should not be accompanied by forwarding letters unless more explanation is necessary than can be given on the face of the forms.

18. The carriage of instruments, etc., is *not* paid by the Mathematical Instrument Office; consequently all consignments sent to it must be *prepaid* by the officers sending them, and the freight, etc., on those despatched by the Mathematical Instrument Office must be paid by the officers receiving them. Incidental charges for packing cases, etc., are included in the "invoices" or "bills."

19. Owing to the very rough treatment which boxes, etc., often receive in transit, particular attention is drawn to the importance of packing all instruments with great care; delicate instruments should, if possible, be despatched *insured*. Each package of a consignment of instruments despatched to the Mathematical Instrument Office should bear the address of the consignor with a distinctive mark and also a serial number, which should be given to each package of such consignment; this information should be recorded on railway receipts or bills of lading. Every package should contain a packing note giving a full list of contents and the address of the consignor.

20. The accounts kept by the Mathematical Instrument Office do not permit of "loans" or "exchanges," and instruments cannot be sent "on approval." When instruments are required on "Government Service" for a limited time, however short, two distinct "book transfer" transactions are necessary; the instruments must be properly indented for and, when finished with, they must be returned as "no longer required."

21. In all dealings with the Mathematical Instrument Office the official forms in use in that Office should be used, but military officers should submit indents and requisitions "for repairs" on I. A Forms Z 2117 and Z 2118, respectively. The Mathematical Instrument Office is conducted under Civil rules, and all references to Army Regulations, Equipment Tables, etc., should therefore invariably be supplemented by a clear statement of what is required.

22. These rules and regulations, the price-list and Forms A, B, and C can be obtained *gratis* on application from the Officer in charge, Mathematical Instrument Office.

3. The Mathematical Instrument Office cannot supply any description of electrical or telegraphic instrument, nor does it issue type, stationery, or drawing materials.

4. It is particularly requested that the sizes and sorts of instruments, lengths of scales, how divided, and purpose for which required, and generally any information which will guide the Mathematical Instrument Office in knowing, without further reference, the exact wants of the indenting officer, be entered, as far as possible, in columns 1 and 4 instead of in a covering letter. The nomenclature and reference number given in the price-list should, if possible, be used.

5. Especial attention is requested to the filling up correctly of columns 5 and 7.

6. An indenting officer should enter in column 6 the approximate price of each description of instrument required, so as to enable the officer who countersigns and finally passes the indent to know the probable expense it involves, and also to guide the Mathematical Instrument Office in selecting instruments to meet the demand. If the prices entered in an indent are not to be exceeded, the fact should be clearly stated.

7. The mode of transit and address to which instruments are to be consigned by the Mathematical Instrument Office, as well as the address to which correspondence is to be sent, must invariably be specified in full in column 8. (Abbreviations sometimes lead to mistakes.) When instruments are to be sent by post, the name of the Post Town as well as the District in which it is situated should be given, and when by railway, the nearest Railway Station should be distinctly stated. Indents should not be accompanied by forwarding letters unless more explanation is necessary than can be given on the face of the forms.

8 In the case of instruments issued on "cash payment" *prepayment* is necessary, and, whenever it is possible, they, or the railway receipt for them, will be sent by V.-P. P.

9. The carriage of instruments, etc., is *not* paid by the Mathematical Instrument Office: consequently the freight, etc., on all consignments despatched by this office must be paid by the officers receiving them.

10. The forms for indent, A; for requisition "for repairs," B; and for deposit of instruments "no longer required," C, as well as the rules and regulations and the price list can be obtained *gratis* on application from the Officer in charge, Mathematical Instrument Office.

T. BUTLER,
Offg. Secy. to the Govt. of Bengal.

RULES TO CARRY OUT THE OBJECTS OF THE BENGAL SMOKE NUISANCES ACT, 1905.

I.—Meetings of Commission.

Ordinary meetings.

1. The Commission shall meet for the transaction of business ordinarily once in every month upon such day and at such hour as the Commission shall from time to time determine.

Special meetings.

2. The President, or the member of the Commission to whom in his absence the President may delegate his duties, may, whenever he thinks fit, and shall upon requisition made in writing by not less than three members of the Commission, call a special meeting of the Commission.

Notice of meetings.

3 (*a*) At least five days' notice of all meetings shall be given to each member. Such notice shall be sent by post or by such other method as may be convenient:

Provided that the accidental failure of service of notice on any member shall not invalidate the proceedings at any meeting.

(*b*) The notice shall set forth the business to be transacted at the meeting, and no business other than that so stated shall be transacted, except with the consent of the majority of the members present.

Quorum.

4. At every meeting of the Commission four members shall constitute a quorum.

President at meetings.

5. Every meeting shall be presided over by the President of the Commission or, in his absence, by such member as the members present at the meeting shall choose from among their number to preside at such meeting.

Adjournment for completion of business.

6. The President of any meeting at which a quorum of the Commission is present may, with the consent of the majority of the members present, adjourn the meeting from time to time and from place to place.

Business to be transacted at meeting so adjourned.

7. No business shall be transacted at any meeting held in pursuance of an adjournment under rule 6 other than that which was left unfinished at the original meeting; and it shall not be necessary to give fresh notice of such adjourned meeting.

Adjournment where no quorum.

8. If at the time appointed for any meeting a quorum is not present, the meeting shall stand adjourned to some future date to be appointed by the President and five days' notice of such adjourned meeting shall be given. The members present at such adjourned meeting shall have power to dispose of all business before it, whether a quorum is present or not.

Motions and amendments.

9. The President may, if he thinks fit, require that every motion and amendment be duly put in writing and be proposed and seconded, before it is considered by the Commission.

Votes on resolutions.

10. (*a*) Whenever necessary, the votes of the members of the Commission present in meeting shall be taken by the President, and the resolution supported by the greater number of votes shall be deemed to be the resolution of the Commission at such meeting.

(*b*) The President shall have a second or casting vote in all cases of equality of votes:

Provided that when votes are taken, any member present may require that the votes given on each side shall be recorded.

Minutes of proceedings.

11. Minutes of the proceedings of every meeting of the Commission shall be drawn up and entered in a book to be kept for the purpose, and shall be submitted at the next ordinary meeting and, when approved, shall be signed by the President of such meeting.

Supply of minutes to the Local Government and to members.

12. A copy of the minutes of every meeting of the Commission shall, as soon as possible, be transmitted to the Local Government or to such officer as the Local Government may direct. A copy shall also be supplied to each member of the Commission.

Reconsideration of subject of business once disposed of.

13. Except on a requisition, in writing, made and signed by not less than four members, no subject of business which has once been disposed of at a meeting shall be reconsidered by the Commission within a period of six months from date of such disposal.

Fees for attendance at meetings.

14. A fee of thirty-two rupees shall be paid to each member of the Commission who attends any meeting of the Commission at which a quorum is present and business is transacted, and at which he is present from the beginning to the end thereof:

Provided always that no fee shall be paid in respect of any meeting at which is transacted such business only as has been adjourned from a former meeting.

Leave of absence and filling of vacancies.

15. (*a*) The Commission shall have power to grant leave of absence to any non-official member for a period not exceeding three months.

(*b*) Where any such member has been, or is likely to be, absent for a period exceeding three months, the President shall report the fact to the Local Government, with a request that steps may be taken for filling up the vacancy.

Sub-Committees.

16. (*a*) The Commission may from time to time, in accordance with a resolution passed at a meeting, appoint Sub-Committees of its members for the purpose of carrying into effect any of the provisions of the Act which the Commission is empowered to carry into effect, with such powers and under such instructions, directions or limitations as by such resolution may be defined; and may by a like resolution alter the constitution of, or dissolve, any such Sub-Committee.

(*b*) Two members of any such Sub-Committee shall form a quorum.

II.—Powers and Duties.

Exercise of authority of the Commission.

17. For the purposes of section 9 of the Act, the authority of the Commission shall be exercised by the President or by any of the members to whom the President may delegate his duties during his illness or his absence from Calcutta:

Provided that any action taken by the President, or by any member exercising authority under this rule, shall be reported to the Commission at its next ordinary meeting.

Duties of Inspectors.

18. Every Inspector appointed under section 5 of the Act shall—

(*a*) submit reports to the Commission regarding any specified area within which, in his opinion, it is expedient that all or any of the trades and manufactures mentioned in sub-section (*1*) of section 6 of the Act should be prohibited under the said section;

(*b*) draw up and submit to the Commission a list of furnaces to be inspected under clause (*a*) of sub-section (*1*) of section 9 of the Act;

(*c*) keep records of his inspections of furnaces, and of his observations on the smoke emitted therefrom;

(*d*) submit his diaries for the information of the Commission;

(*e*) carry out the orders of the Commission as to the reporting of offences against the Act and as to obtaining the authority of the Commission before prosecution; and

(*f*) carry out the orders of the Commission in respect of the inspection of any particular furnace, or class of furnaces, and in other respects generally for the purposes of the Act.

Method of dealing with reports and diaries.

19. (*a*) The President of the Commission, or, in his absence, any member named by him, shall peruse the reports and diaries submitted by Inspectors, and shall issue necessary orders in accordance with the provisions of the Act.

(*b*) Such reports and diaries shall be laid before the Commission at the monthly meetings.

Submission of Commission's recommendations to the Local Government.

20. Whenever the Commission is satisfied that it is expedient that any or all of the trades and manufactures mentioned in sub-section (*1*) of section 6 of the Act should be prohibited in any specified area, it may submit a recommendation to that effect to the Local Government, stating reasons for making such recommendation, and giving a specification of the boundaries of such area.

III.—Emission of Smoke.

Method of determining density of smoke.

21. The density of smoke emitted from a furnace shall be determined by reference to Ringelmann's Smoke Gauge according to the scales described below:—

Ringelmann's Smoke Gauge consists of six squares, corresponding to scales, upon a white background—

Scale 1—Consists of a white square which has no black lines across it and which is all white.

Scale 2—Consists of a white square with black lines drawn across the white background, vertically and horizontally 1 mm. in width and 9 mm. apart.

Scale 3—Consists of a white square with black lines, similarly drawn, 2·3 mm. in width and 7·7 mm. apart.

Scale 4—Consists of a white square with black lines similarly drawn, 3·7 mm. in width and 6·3 mm. apart.

Scale 5—Consists of a white square with black lines similarly drawn, 5·5 mm. in width and 4·5 mm. apart.

Scale 6—The square is entirely black.

The squares described in this scale, if held at a distance of from 30 to 40 paces from the observer, present the appearance of blacks and greys of varying density, with which the colour of the smoke emitted from a furnace may be compared.

Observation of density.

22. The smoke emitted from a furnace or furnaces shall be held to be the smoke emitted from the chimney connected therewith, and its density for the purpose of the rules shall be observed at its exit from the chimney.

Limits beyond which emission of smoke becomes an offence.

23. (*1*) Smoke of the scales of density Nos. 1, 2 and 3 as determined in accordance with rule 21 may be emitted from furnaces for any time.

(*2*) Smoke of the scales of density Nos. 4, 5 and 6, as determined in accordance with the said rule, may be emitted from furnaces for the times prescribed in respect of each such scale in the following table.

(*3*) Smoke of density varying from the scale of density No. 4 to the scale of density No. 6 may be emitted for times rateably reduced in accordance with the explanation to this rule and not in excess of the times entered in column 5 of the table, provided that smoke of the scale of density No. 6 shall in no case be emitted for times in excess of those entered in column 2.

Table of Limits of Smoke.

1	2	3	4	5
Smoke may be emitted from a chimney serving	In the case of density scale 6.	In the case of density scale 5.	In the case of density scale 4.	In the case of densities scales 6, 5 and 4 together.
	For minutes per hour.	For minutes per hour.	For minutes per hour.	For minutes per hour (rateably reduced in accordance with the explanation below).
One or two furnaces ...	1	2	3	3·21
Three or four furnaces...	2	3	4	5·13
Five or six furnaces ...	3	4	6	7·05
Seven, eight or nine furnaces.	4	5	6	8·97
Ten or more furnaces ...	5	6	7	10·89

Explanation—For the purposes of sub-clause (*3*) of this rule, the time during which smoke of the scale of densities Nos. 4 and 5 is emitted shall be reduced, in the case of smoke of the scale of density No. 4 in the ratio of 0 37 to 1 and in the case of smoke of the scale of density No. 5 in the ratio of 0·55 to 1.

Example.

Smoke of density scale 6 is emitted from a chimney serving ten furnaces for 5 minutes per hour, of density scale 5 for 6 minutes, and of density scale 4 for 7 minutes. The total time during which smoke of these densities is emitted is, when rateably reduced, $5 \times 1 + 6 \times 0\,55 + 7 \times 0\,37$ or 10·89 minutes.

Extension of time in case of original lighting or stoking of furnaces.

24. In lighting up fires in furnaces, or in stoking furnaces to raise steam, for the purpose of commencing the work of the factory, double the time prescribed in the above table shall be allowed during the first two hours, once a day.

Furnaces of ocean-going steamers.

25. The furnaces of the main boilers of ocean-going steamers shall not be held to be furnaces within the meaning of the Bengal Smoke Nuisances Act, 1905, for a period of two hours previous to leaving moorings.

Altitude of chimneys from which smoke may be emitted.

26. Smoke shall not be emitted from a furnace at a lower altitude than 100 feet :

Provided that this rule shall not apply in the following cases :—

(1) Existing chimneys that are, in the opinion of the Commission, of sufficient height for the purpose of the Act.

(2) Furnaces in portable or travelling engines.

(3) Furnaces of engines which, in the opinion of the Commission, are intended for temporary purposes.

(4) Furnaces in steam-vessels.

(5) Any other furnace especially exempted by the Commission.

Issue of warning by Inspectors.

27. When it appears to an Inspector that an offence has been committed under the Act in respect of any furnace, he may serve the owner of such furnace with a written warning by registered post. Such warning shall inform the owner of the furnace of the time and date of such offence, and shall be accompanied by a copy of the record of the observation taken, and it shall inform the owner that if the offence is again committed after the expiry of a period, which shall not be less than ten days, he will be liable to prosecution under the Act :

(*i*) Provided that if, in the opinion of the Inspector, material alterations in the furnace are necessary or appliances require to be fitted to the furnace, the period of warning may be extended to four months, or a longer period, if in the opinion of the Commission, it is necessary.

(*ii*) Provided also that no warning need be given in the case of any steam-ship, locomotive or portable engine, before a prosecution is instituted.

Record of observations.

28. Records shall be kept by the Commission of the observations of the smoke from furnaces under the signature of the Inspector who has made the observations.

Numbering of chimneys.

29. A number shall be given to each chimney, and the number of each chimney, from which smoke is emitted in greater density or for a longer period than is allowed by these rules, shall be reported to the Commission.

SENATE HOUSE,
The 24th August 1907.

CALCUTTA UNIVERSITY.

NOTICE.

THE Senate will proceed in the month of August 1908 to the election of a Tagore Professor of Law for the term of one year, to commence on the 1st of August 1909.

The salary of the Professorship is Rs 9,000 per annum, and the Professor will be expected to deliver a course of not less than twelve lectures on one of the following subjects:—

(*i*) Mercantile Law and Usage, including the Law of Sale of Goods, with special reference to British India.

(*ii*) Codification in British India.

(*iii*) The General Principles of Hindu Jurisprudence.

The salary of the Professor shall be paid in twelve equal monthly instalments, the first instalment to be paid on the first day of the month following that in which the first lecture is delivered.

Candidates for the Professorship are requested to forward their applications to the Registrar on or before the 1st May 1908, stating on which of the abovenamed three subjects they are prepared to lecture. Each candidate will forward with his application one hundred copies of a brief Synopsis of his proposed lectures; and, if he so pleases, the same number of copies of his Introductory Lecture.

The Professor will not, later than the month of August following his election, forward to the Registrar a complete copy (manuscript or typewritten) of the Lectures which he proposes to deliver. The copy will be referred to a Committee of the Faculty of Law consisting of not more than three members to be chosen by the Faculty, who will examine the same and before the 1st November report to the Faculty whether the work is complete and ready for the press. If upon such report the Faculty are satisfied that the work is complete, the Professor will commence to deliver his lectures in the month of December, and complete the delivery thereof in the following February. The copy of the Lectures delivered will remain in the custody of the Registrar, and will be sent to press as soon as practicable after delivery thereof.

If the Professor fails to submit the copy of the Lectures, or if the copy submitted be found, on examination, to be incomplete and not ready for the press, the matter will be referred to the Faculty of Law, upon whose recommendation the Senate may either extend the time or cancel the appointment.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Barun-Daltonganj Railway, in the district of Palamau, will be put up to sale at 12 o'clock on 23rd October 1907, corresponding with the 9th Kartik 1314 Fusli, at Daltonganj.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the land closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

S. N. GHOSE, *for* Collector.

Advertisement for Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale to the below, undermentioned estates, situate in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 25th September 1907, corresponding to the 9th Ashin 1314 B.S.

The purchaser will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchaser of the estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estates will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and to the laws in force; and purchaser to be bound to respect the rights of the resident cultivators who have signed the schedule of assessment.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the succeeding day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

Dounai or Saigon River—Shoals in approach.

No. 394 (first publication).—The British Admiralty has given Notice (No. 1007 of 1907) containing the following information respecting the shoals in the approach to Donnai or Saigon river:—

River Soirap. A narrow sandy shoal upon which there are depths of from 3 to 3½ fathoms at low-water springs has formed in the entrance to the Soirap river; it is situated between the bearings of N. 2° W., through north, and N. 2° E. of Dong tranh light-house. Vessels are recommended to pass to the eastward of it where a depth of 3½ fathoms will be found.

Approximate position, Dong tranh light, lat. 10° 23′ N., long. 106° 52¾′ E.

Cape St. James. A survey of Ranza bank shows that the least depth over it is 4¼ fathoms, but it extends to the westward as far as the line of the Cocoanut bay leading lights on which there is a depth of 5¼ fathoms.

A shoal, with a depth of 3¼ fathoms over it at low-water, is situated at a distance of 3 1/10 mils S. 47° W. from cape St. James light-house, but the 2¼ fathoms patch shown on the chart 2 cables to the westward of this position does not exist. This shoal extends to the westward as far as the line of the Cocoanut leading lights, there being a depth of 4¾ fathoms on that line at a distance of 3 1/10 miles from the pier head light.

Depths of 2 fathoms and 2¼ fathoms exist at distances of 8 9/10 miles S. 53° W. and 9¼ miles S. 69° W., respectively, from cape St. James light-house, these depths respectively are on the south-eastern and north-western extremities of the shoal shown on the chart. There is a depth of 2¾ fathoms at 7¼ cables to the westward of the 2 fathoms head on the south-eastern extremity of this shoal. On this shoal the least depth is 1¾ fathoms situated at a distance of 9 miles S. 66° W. from cape St. James light-house. There is also another head on this shoal of 2¼ fathoms situated at a distance of 8 9/10 miles S. 61° W. from the light-house.

Ganh rai bay. In Kua Kangio, northward of Kangio *red* light, in the fairway between it and the village, the depth has shoaled to 4 fathoms at low water. Vessels of heavy draught should not therefore attempt this passage at low water.

Cape St. James to cape Ti wan. The least depth on Formosa bank is 1¼ fathoms at low-water springs, situated on the western edge of the bank, at a distance of 11 9/10 cables S. 48° E. from cape St. James light-house.

The least depth on the 4¾ fathoms patch shown on the chart about 5¼ miles south-eastward from cape St. James is 4¼ fathoms, which is situated at a distance of 5 9/10 miles S. 72° E. from cape St. James light-house. This shoal, as delineated by the 5 fathoms contour, extends about 4 cables in an easterly direction, and 11 cables in a N. 75° W. direction from the 4¼ fathoms patch, and is about 2 cables broad.

Pernambuco rock. This rock was found and is correctly placed on the charts, but a shoal, with a least depth of 4½ fathoms over it, exists at a distance of 6¼ cables N. 62° W. from the rock. This shoal extends in an easterly and westerly direction.

Approximate position, cape St. James light-house, lat. 10° 19¾′ N., long. 107° 5′ E.

Tukang Besi Islands—Shoals westward of—.

No. 375 (third publication).—The British Admiralty has given notice No. (928 of 1907) of the existence of the undermentioned shoals to the westward of Tukang Besi Islands :—

(*a*) A reef extending in a west-north-westerly and east-south-easterly direction, with very little water over it, the western end of which is situated in approximately lat. 5° 29½′ S, long. 123° 26′ E.

(*b*) A reef about 5 miles long in a north-westerly and south-easterly direction, and 3 miles broad, the centre of which is situated in approximately lat. 5° 53½′ S., long. 123° 42½′ E.

(*c*) A reef about 5½ miles long in a north-easterly and south-westerly direction, and 2 miles broad, the north-eastern point of which is situated at a distance of 8 miles, S. 84 W., from the north point of Binongka island, and the centre in approximately lat. 5° 55′ S, long. 123° 49′ E.

(*d*) A reef about 2½ cables in diameter exists in approximately lat. 5° 54½′ S., long. 123° 53′ E.

The above dangers are partially dry, and their limits are indicated by discoloured water

(*e*) Between the positions of lat. 5° 31′ S., long. 123° 31′ E., and lat. 5° 57′ S., long. 123° 41½′ E., are several reefs, the positions and limits of which are not yet determined. A danger line between these positions has, therefore, been substituted for that at present shown on the chart.

The Brothers—Non-existence of Coral Patch reported eastward of.

No. 376 (third publication).—With reference to Notice to Mariners No. 252, dated 31st December 1897, issued by this office, the British Admiralty has given further notice (No. 930 of 1907) that information has been received from Commander F. H. Walter, H. M. Surveying Vessel *Merlin* that he has made a close and careful search over an area of 200 square miles without success for the coral patch reported by the Master of the German steam-vessel *Hertha*, in 1897, in approximately lat. 12° 8′ N., long. 53° 50½′ E.

Although the weather was fine and clear, and the bottom visible at depths of 16 and even at 20 fathoms, no indication of any danger was observed. It is therefore probable that the Master of the *Hertha* was deceived by the appearance of a discolouration of the water, as he got no soundings and only stated that he saw a bank. This shoal has in consequence been erased from the charts.

No. 380 (third publication).—The British Admiralty has given notice (No. 942 of 1907) of the existence of a shoal, named Williams rocks, off Good Hope cape, in the approach to port Swatau. This shoal, which consists of boulders lying on a muddy bottom, has three heads, with depths of 4, 4½, and 5 fathoms over them at low water; the 4-fathom head is situated in a position from which Good Hope cape light-house bears West, distant 4½ cables, and Green island submit N. 43° W.

Approximate position on chart No. 854, lat. 23° 14½′ N., long. 116° 48¾′ E.

The 4½-fathom and 5-fathom heads are situated at distances of about half a cable N. 9° E. and 1½ cables N. 22° E. respectively from the above position.

Sugarloaf light-house in line with the east side of Bill island, bearing N. 33° W., leads about 1½ cables eastward of the shoals.

(*Variation Nil in 1907.*)

This Notice affects the following Admiralty Charts :—Namoa island, No. 1957; port of Swatau, No. 854: also China Sea Directory, vol. III, 1904, page 148.

CHINA, EAST COAST—Yang tse Kiang.

Wusung River Bar—Regulations for crossing.

No. 381 (third publication).—The British Admiralty has given Notice (No. 945 of 1907) that, in order to prevent accidents to vessels crossing the inner and outer bars of the Wusung river, the following regulations were put into force July 1906, and must be strictly adhered to by Mariners:—

(1) A careful look-out is to be kept on approaching the Wusung bars by inward-bound vessels when about a mile below the outer bar, and by outward-bound vessels when abreast of the southern end of Gough island:—

(*a*) Vessels having the tide against them must wait for vessels having a fair tide.

(*b*) Overtaking vessels must regulate their speed to allow overtaken vessels to clear the bars first.

(2) Captains and pilots are not to attempt to cross either bar when the signals at Wusung indicate less water than their vessels are drawing. Sometimes, however, a greater depth can be obtained by not following the bar-leading marks. Captains and pilots desiring to avail themselves of this information should apply to the Harbour Master's Officer at Shanghai, or to the Berthing Officer at Wusung shortly before they wish to cross the bar.

(3) Vessels anchoring outside Wusung must take up a berth well clear of leading marks over the outer bar in order to avoid all risk of collision with vessels crossing the bar.

Approximate position Wusung, lat. 31° 23′ N., long. 121° 29′ E.

This Notice affects the following Admiralty Chart:—Wusung river, No. 1601: also China Sea Directory, vol. III, 1904, pages 413, 415.

BAY OF BENGAL—Burma coast—Rangoon river.

Lighted Fairway buoy—Position.

No. 383 (third publication).—The Principal Port Officer, Burma, has given notice (Channel Circular No. 99 of 1907) that the Lighted Fairway buoy recently placed on the station has been laid about 400 feet to the northward of the old buoy, which has been removed.

AUSTRALIA, SOUTH—Spencer Gulf.

Lowly Point Light—Alteration intended.

No. 383 (third publication).—The President, Marine Board, Port Adelaide, has given notice (No. 5 of 1907) that it is intended to alter the Lowly Point light so that its range of visibility may be increased by one and-a-half miles.

Operations will be commenced on or about the 1st October next, and for a period of about one month therefrom it is probable that the revolution of the light will be somewhat irregular.

A further notice will be issued when the improvements are effected.

This Notice affects Admiralty Chart No. 2389b.

Sr. L. S. Warden, Comdr., R.I.M.,
Port Officer, Calcutta.
